**This Alien Shore** C.S. Friedman,1999-07-01 This lauded work of science fiction and New York Times Notable Book of the Year explores a universe where genetic mutations have allowed certain individuals to traverse the stars. It is the second stage of human colonization—the first age, humanity's initial attempt to people the stars, ended in disaster when it was discovered that Earth's original superluminal drive did permanent genetic damage to all who used it—mutating Earth's far-flung colonists in mind and body. Now, one of Earth's first colonies has given humanity back the stars, but at a high price—a monopoly over all human commerce. And when a satellite in Earth's outer orbit is viciously attacked by corporate raiders, an unusual young woman flees to a ship bound for the Up-and-Out. But her narrow escape does not mean safety. For speeding across the galaxy pursued by ruthless, but unknown adversaries, this young woman will discover a secret which is buried deep inside her psyche—a revelation the universe may not be ready to face....

**From the Brink of the Apocalypse** John Aberth,2013-09-13 Praise for the first edition: Aberth wears his very considerable and up-to-date scholarship lightly and his study of a series of complex and somber calamities is made remarkably vivid. -- Barrie Dobson, Honorary Professor of History, University of York The later Middle Ages was a period of unparalleled chaos and misery -in the form of war, famine, plague, and death. At times it must have seemed like the end of the world was truly at hand. And yet, as John Aberth reveals in this lively work, late medieval Europeans' cultural assumptions uniquely equipped them to face up positively to the huge problems that they faced. Relying on rich literary, historical and material sources, the book brings this period and its beliefs and attitudes vividly to life. Taking his themes from the Four Horsemen of the Apocalypse, John Aberth describes how the lives of ordinary people were transformed by a series of crises, including the Great Famine, the Black Death and the Hundred Years War. Yet he also shows how prayers, chronicles, poetry, and especially commemorative art reveal an optimistic people, whose belief in the apocalypse somehow gave them the ability to transcend the woes they faced on this earth. This second edition is brought fully up to date with recent scholarship, and the scope of the book is broadened to include many more examples from mainland Europe. The new edition features fully revised sections on famine, war, and plague, as well as a new epitaph. The book draws some bold new conclusions and raises important questions, which will be fascinating reading for all students and general readers with an interest in medieval history.

**Medieval Death** Paul Binski,1996 In this richly illustrated volume, Paul Binski provides an absorbing account of the social, theological, and cultural issues involved in death and dying in Europe from the end of the Roman Empire

to the early sixteenth century. He draws on textual, archaeological, and art historical sources to examine pagan and Christian attitudes toward the dead, the aesthetics of death and the body, burial ritual, and mortuary practice. Illustrated throughout with fascinating and sometimes disturbing images, Binski's account weaves together close readings of a variety of medieval thinkers. He discusses the impact of the Black Death on late medieval art and examines the development of the medieval tomb, showing the changing attitudes toward the commemoration of the dead between late antiquity and the late Middle Ages. In one chapter, Binski analyzes macabre themes in art and literature, including the Dance of Death, which reflect the medieval obsession with notions of humility, penitence, and the dangers of bodily corruption. In another, he studies the progress of the soul after death through the powerful descriptions of Heaven, Hell, and Purgatory in Dante and other writers and through portrayals of the Last Judgment and the Apocalypse in sculpture and large-scale painting.

**Pakistan's Cotton and Textile Economy** Caesar Bucia Cororaton,David Orden,2008-01-01 Pakistan's cotton, textile, and apparel industries are key sectors of the nation's economy; their performance can contribute to either a rise or fall in poverty. These vital industries have faced a variety of challenges and opportunities in recent years, including world cotton price instability, liberalization of the multilateral clothing and textile trade, and sharp swings in the Pakistani macroeconomic situation. Using a computable general equilibrium (CGE) model and drawing on a national survey of Pakistani households, the authors of this report evaluate the consequences of several recent or prospective economic changes on Pakistan's cotton, textile, and apparel industries and poverty levels. The economic changes include an increased inflow of foreign capital, higher world cotton and textile prices, government subsidization of the textile industry, increased productivity in the cotton and textile sectors, and other possible developments. By presenting these scenarios, the report offers policymakers and analysts a guide to anticipating and shaping the future of economic growth and poverty reduction in Pakistan.
