Living Literacies Kate Pahl, Jennifer

Rowse, 2020-09-22 An approach to literacy that understands it as lived and experienced in the everyday across varied spaces and populations. This book approaches literacy as lived and experienced in the everyday. A living literacies approach draws not only on such official, schooled activities as reading, writing, speaking, and listening but also on such routine, tacit activities as scrolling through Instagram, watching news footage, and listening to music. It goes beyond well-worn framings of literacy as an object of study to reimagine literacy as constantly in motion, vital, and dynamic, filled with affective intensities. A lived literacies approach implies a turn to activism, to hopeful practice, and to creativity. The authors examine literacies through a series of active verbs: seeing, disrupting, hoping, knowing, creating, and making. Case studies--ranging from an exploration of photography as a way to shift perspectives to a project in which adults teach young people how to fish--show lived literacies in both theory and practice. With these chapters, Pahl and Rowse, along with contributors Collier, Pool, Rasool, and Trzeciak, make it possible to see literacy in everyday activities, woven into the modes of seeing and knowing. By disruption and activism, literacy can encompass a wide array of practices--exchanging information at a school gate or making a collage. Grounding theory in the sites and spaces of their research, working with artists, photographers, poets, and makers, the authors issue a call to action for literacy education.

Handbook of Portfolio Construction John B. Guerard, Jr., 2009-12-12 Portfolio construction is fundamental to the investment management process. In the 1950s, Harry Markowitz demonstrated the benefits of efficient diversification by formulating a mathematical program for generating the efficient frontier to summarize optimal trade-offs between expected return and risk. The Markowitz framework continues to be used as a basis for both practical portfolio construction and emerging research in financial economics. Such concepts as the Capital Asset Pricing Model (CAPM) and the Arbitrage Pricing Theory (APT), for example, provide the foundation

for setting benchmarks, for predicting returns and risk, and for performance measurement. This volume showcases original essays by some of today's most prominent academics and practitioners in the field on the contemporary application of Markowitz techniques. Covering a wide spectrum of topics, including portfolio selection, data mining tests, and multi-factor risk models, the book presents a comprehensive approach to portfolio construction tools, models, frameworks, and analyses, with both practical and theoretical implications.

Internationalist Aesthetics Edward

Tyerman, 2021-12-07 Winner, 2022 AATSEEL Best Book in Literary Studies, American Association of Teachers of Slavic and European Languages Honorable Mention, 2022 Aldo and Jeanne Scaglione Prize for Comparative Literary Studies, Modern Language Association Following the failure of communist revolutions in Europe, in the 1920s the Soviet Union turned its attention to fostering anticolonial uprisings in Asia. China, divided politically between rival military factions and dominated economically by imperial powers, emerged as the Comintern's prime target. At the same time, a host of prominent figures in Soviet literature, film, and theater traveled to China, met with Chinese students in Moscow, and placed contemporary China on the new Soviet stage. They sought to reimagine the relationship with China in the terms of socialist internationalism—and, in the process, determine how internationalism was supposed to look and feel in practice. *Internationalist Aesthetics* offers a groundbreaking account of the crucial role that China played in the early Soviet cultural imagination. Edward

Tyerman tracks how China became the key site for Soviet debates over how the political project of socialist internationalism should be mediated, represented, and produced. The central figure in this story, the avant-garde writer Sergei Tret'iakov, journeyed to Beijing in the 1920s and experimented with innovative documentary forms in an attempt to foster a new sense of connection between Chinese and Soviet citizens. Reading across genres and media from reportage and biography to ballet and documentary film, Tyerman shows how Soviet culture sought an aesthetics that could foster a sense of internationalist community. He reveals both the aspirations and the limitations of this project, illuminating a crucial chapter in Sino-Russian relations. Grounded in extensive sources in Russian and Chinese, this cultural history bridges Slavic and East Asian studies and offers new insight into the transnational dynamics that shaped socialist aesthetics and politics in both countries.

Co-locating Transactional and Data Warehouse Workloads on System Z,2010

Lower Ed Tressie McMillan Cottom,2017-02-28 More than two million students are enrolled in for-profit colleges, from the small family-run operations to the behemoths brandished on billboards, subway ads, and late-night commercials. These schools have been around just as long as their bucolic not-for-profit counterparts, yet shockingly little is known about why they have expanded so rapidly in

recent years—during the so-called Wall Street era of for-profit colleges. In *Lower Ed* Tressie McMillan Cottom—a bold and rising public scholar, herself once a recruiter at two for-profit colleges—expertly parses the fraught dynamics of this big-money industry to show precisely how it is part and parcel of the growing inequality plaguing the country today. McMillan Cottom discloses the shrewd recruitment and marketing strategies that these schools deploy and explains how, despite the well-documented predatory practices of some and the campus closings of others, ending for-profit colleges won't end the vulnerabilities that made them the fastest growing sector of higher education at the turn of the twenty-first century. And she doesn't stop there. With sharp insight and deliberate acumen, McMillan Cottom delivers a comprehensive view of postsecondary for-profit education by illuminating the experiences of the everyday people behind the shareholder earnings, congressional battles, and student debt disasters. The relatable human stories in *Lower Ed*—from mothers struggling to pay for beauty school to working class guys seeking “good jobs” to accomplished professionals pursuing doctoral degrees—illustrate that the growth of for-profit colleges is inextricably linked to larger questions of race, gender, work, and the promise of opportunity in America. Drawing on more than one hundred interviews with students, employees, executives, and activists, *Lower Ed* tells the story of the benefits, pitfalls, and real costs of a for-profit education. It is a story about broken social contracts; about education transforming from a public interest to a private gain; and about all Americans and the challenges we face in our divided, unequal society.

Promising Practices in 21st Century Music Teacher Education Michele Kaschub, Janice Smith, 2014

Technological innovations, evolving demographics in the school-age population, and students' omnipresent access to music and music making all suggest that contemporary teaching and learning occurs in environments that are much more complex than those of the nineteenth century that served as music education's primary model. This book surveys emerging music and education landscapes to present a sampling of the promising practices of music teacher education that may serve as new models for the twenty-first century.

The Museum of Augustus Peter Heslin, 2015-05-01 In the *Odes*, Horace writes of his own work, "I have built a monument more enduring than bronze,"—a striking metaphor that hints at how the poetry and built environment of ancient Rome are inextricably linked. This fascinating work of original scholarship makes the precise and detailed argument that painted illustrations of the Trojan War, both public and private, were a collective visual resource for selected works of Virgil, Horace, and Propertius. Carefully researched and skillfully reasoned, the author's claims are bold and innovative, offering a strong interpretation of the relationship between Roman visual culture and literature that will deepen modern readings of Augustan poets. The *Museum of Augustus* first provides a comprehensive reconstruction of paintings from the remaining fragments of the cycle of Trojan frescoes that once decorated the Temple of Apollo in Pompeii. It then finds the echoes of these paintings in the Augustan-

dated Portico of Philippus, now destroyed, which was itself a renovation of Rome's de facto temple of the Muses—in other words, a museum, both in displaying art and offering a meeting place for poets. It next examines the responses of the Augustan poets to the decorative program of this monument that was intimately connected with their own literary aspirations. The book concludes by looking at the way Horace in the Odes and Virgil in the Georgics both conceptualized their poetic projects as temples to rival the museum of Augustus.
