Five Laterals and a Trombone Tyler Bridges,2022-11-15 In conjunction with the 40th anniversary of The Play—a thrilling and nuanced chronicle of college football's most unforgettable ending The wildest finish ever to a college football game occurred when five laterals on the final kickoff ended with a sprint through the opposing team's marching band—prematurely in celebration on the field—for the winning touchdown. It was 21 seconds of action so unfathomable it has become known simply as The Play. Five Laterals and a Trombone captures the madcap story as it developed in November 1982, tracing the ups and downs, mood swings and hijinks surrounding the 85th Big Game between the

University of California at Berkeley and Stanford University. Journalist Tyler Bridges has deftly reconstructed the pivotal moments and resulting lore thanks to hundreds of interviews with all the key figures on both sides of the rivalry, including players, coaches, referees, and stadium personnel. Among the memorable characters are Stanford star quarterback John Elway, Cal linebacker Ron Rivera, the final lateral receiver Kevin Moen, and the immortalized Cardinal trombone player Gary Tyrrell. The Play was not televised live. There was no instant replay—let alone a viral video. In 1982, Steve Wozniak and Steve Jobs, who had founded Apple Computer Company in a garage only 10 miles from the Stanford campus, were just developing the first personal computers. It took hours for news of the rivalry game's outcome to spread across the country, yet football fans would remain enthralled by the bizarre sequence for decades to come. Readers will be transported onto the field and inside the huddle in this definitive history of college football's ultimate oddity.

The Veiled Web Catherine Asaro, 2022-09-27 "A near-future layering of East and West, of religion and technology . . . and of love and its loss—all woven into an intriguing tapestry." —Diana Gabaldon, bestselling author of the *Outlander* series Winner of the Homer Award for Best Science Fiction Novel A renowned prima ballerina, Lucia del Mar is far more comfortable expressing herself through dance than with words. Shy and introverted, she spends most of her spare time on her laptop. Still, Lucia's job forces her out of her comfort zone, which is how she winds up at a White House reception where she meets Rashid al-Jazari, the wealthy CEO of a multinational corporation. Although attracted to him, Lucia can't help but feel awkward and shrugs off their encounter as a one-time event. Not realizing he feels a similar attraction, she never imagines Rashid will seek out her performances; he is the last person she expects to see when her dance company travels to Italy. Their reunion takes an even more unexpected turn when they're both drugged and kidnapped. Although they overcome their abductors, it leaves them stranded in North Africa. For her own safety, Lucia agrees to marry Rashid, at least for the time being. As she recovers at his family compound in Morocco, reeling from their brush with danger, she struggles to fit into a culture she

knows nothing about—and to deal with her growing feelings for Rashid. At the same time, at his secret office there, Rashid is developing a dramatic leap forward in artificial intelligence combined with virtual reality. He finds himself plunged into a fight for control of his work against powerful international forces, and caught in the middle, Lucia is swept into that battle . . . “A terrific novel, ripping a path from today’s headlines to tomorrow’s realities.” —Robert J. Sawyer, Nebula Award-winning author

The Mathematical Sciences in 2025 National Research Council, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on the Mathematical Sciences in 2025, 2013-06-13 The mathematical sciences are part of nearly all aspects of everyday life—the discipline has underpinned such beneficial modern capabilities as Internet search, medical imaging, computer animation, numerical weather predictions, and all types of digital communications. The Mathematical Sciences in 2025 examines the current state of the mathematical sciences and explores the changes needed for the discipline to be in a strong position and able to maximize its contribution to the nation in 2025. It finds the vitality of the discipline excellent and that it contributes in expanding ways to most areas of science and engineering, as well as to the nation as a whole, and recommends that training for future generations of mathematical scientists should be re-assessed in light of the increasingly cross-disciplinary nature of the mathematical sciences. In addition, because of the valuable interplay between ideas and people from all parts of the mathematical sciences, the report emphasizes that universities and the government need to

continue to invest in the full spectrum of the mathematical sciences in order for the whole enterprise to continue to flourish long-term.

The Blonde Geisha Jina Bacarr, 2014-08-01 The early summer of 1892 brought a heavy rainy season that year in Japan. Plum Rain, the Japanese called it, because it comes when the fruit bulges with ripeness and promise. Like a young girl reaching womanhood. A girl like me. In the ancient Japanese tradition of beauty and grace, sex and erotic fantasies are hidden secrets that only a select few may learn, and which are forbidden to foreigners. But when a threat to her father's life puts her own in jeopardy, young Kathlene Mallory is sent to live in safety at the Tea House of the Look-Back Tree, where she is allowed to glimpse inside the sensual world of the geisha. During the years of her training in the art of pleasuring men, Kathlene's desires are awakened by the promise of unending physical delights, and she eagerly prepares for the final ritual that will fulfill her dream of becoming a geisha — the selling of her virginity. The man willing to pay for such an honor, Baron Tonda, is not the man for whom Kathlene carries a secret longing, but he is the man who will bring ruin to the teahouse, and danger to Kathlene, if he is disappointed....
