How Ike Led Susan Eisenhower, 2020-08-11 How Dwight D. Eisenhower led America through a transformational time—by a DC policy strategist, security expert and his granddaughter. Few people have made decisions as momentous as Eisenhower, nor has one person had to make such a varied range of them. From D-Day to Little Rock, from the Korean War to Cold War crises, from the Red Scare to the Missile Gap controversies, Ike was able to give our country eight years of peace and prosperity by relying on a core set of principles. These were informed by his heritage and upbringing, as well as his strong character and his personal discipline, but he also avoided making himself the center of things. He was a man of judgment, and steadying force. He sought national unity, by pursuing a course he called the Middle Way that tried to make winners on both sides of any issue. Ike was a strategic, not an operational leader, who relied on a rigorous pursuit of the facts for decision-making. His talent for envisioning a whole, especially in the context of the long game, and his ability to see causes and various consequences, explains his success as Allied Commander and as President. After making a decision, he made himself accountable for it, recognizing that personal responsibility is the bedrock of sound principles. Susan Eisenhower's *How Ike Led* shows us not just what a great American did, but why—and what we can learn from him today.

Power on the Precipice Andrew Imbrie, 2020-09-08 An essential guide to renewing American leadership in a turbulent, polarized, and postdominant world. Is America fated to decline as a great power? Can it recover? With absorbing insight and fresh perspective, foreign policy expert Andrew Imbrie provides a road map for bolstering American leadership in an era of turbulence abroad and deepening polarization at home. This is a book about choices: the tough policy trade-offs that political leaders need to make to reinvigorate American money, might, and clout. In the conventional telling, the United States is either destined for continued dominance or doomed to irreversible decline. Imbrie argues instead that the United States must adapt to changing global dynamics and compete more wisely. Drawing on the author's own experience as an adviser to Secretary of State John Kerry, as well as on interviews and comparative studies of the rise and fall of nations, this book offers a sharp look at American statecraft and the United States' place in the world today.

The Kill Chain Christian Brose, 2020-04-21 From a former senior advisor to Senator John McCain comes an urgent wake-up call about how new technologies are threatening America's military might. For generations of Americans, our country has been the world's dominant military power. How the US military fights, and the systems and weapons that it fights with, have been uncontested. That old reality, however, is rapidly deteriorating. America's traditional sources of power are eroding amid the emergence of new technologies and the growing military threat posed by rivals such as China. America is at grave risk of losing a future war. As Christian Brose reveals in this urgent wake-up call, the future will be defined by artificial intelligence, autonomous systems, and other emerging technologies that are revolutionizing global industries and are now poised to overturn the model of American defense. This fascinating, if disturbing, book confronts the existential risks on the horizon, charting a way for America's military to adapt and succeed with new thinking as well as new technology. America must build a battle network of systems that enables people to rapidly understand threats, make decisions, and take military actions, the process known as the kill chain. Examining threats from China, Russia, and elsewhere, *The Kill Chain* offers hope and, ultimately, insights on how America can apply advanced technologies to prevent war, deter aggression, and maintain peace.

America in the World Robert B. Zoellick, 2020-08-04 America has a long history of diplomacy—ranging from Benjamin Franklin, Alexander Hamilton, and Thomas Jefferson to Henry Kissinger, Ronald Reagan, and James Baker—now is your chance to see the impact these Americans have had on the world. Recounting the actors and events of U.S. foreign policy, Zoellick identifies five traditions that have emerged from America's encounters with the world: the importance of North America; the special roles trading, transnational, and technological relations play in defining ties with others; changing attitudes toward alliances and ways of ordering connections among states; the need for public support, especially through Congress; and the belief that American policy should serve a larger purpose. These traditions frame a closing review of post-Cold War presidencies, which Zoellick foresees serving as guideposts for the future. Both a sweeping work of history and an insightful guide to U.S. diplomacy past and present, *America in the World* serves as an informative companion and practical adviser to readers seeking

to understand the strategic and immediate challenges of U.S. foreign policy during an era of transformation.

Asia, America, and the Transformation of Geopolitics William H. Overholt, 2007-11-05 American security and prosperity now depend on Asia. William H. Overholt offers an iconoclastic analysis of developments in each major Asian country, Asian international relations, and US foreign policy. Drawing on decades of political and business experience, he argues that obsolete Cold War attitudes tie the US increasingly to an otherwise isolated Japan and obscure the reality that a US-Chinese bicondominium now manages most Asian issues. Military priorities risk polarizing the region unnecessarily, weaken the economic relationships that engendered American preeminence, and ironically enhance Chinese influence. As a result, US influence in Asia is declining. Overholt disputes the argument that democracy promotion will lead to superior development and peace, and forecasts a new era in which Asian geopolitics could take a drastically different shape. Covering Japan, China, Russia, Central Asia, India, Pakistan, Korea, and South-East Asia, Overholt offers invaluable insights for scholars, policy-makers, business people, and general readers.

China's Crisis of Success William H. Overholt, 2018-01-11 China's Crisis of

Success provides new perspectives on China's rise to superpower status, showing that China has reached a threshold where success has eliminated the conditions that enabled miraculous growth. Continued success requires re-invention of its economy and politics. The old economic strategy based on exports and infrastructure now piles up debt without producing sustainable economic growth, and Chinese society now resists the disruptive change that enabled earlier reforms. While China's leadership has produced a strategy for successful economic transition, it is struggling to manage the politics of implementing that strategy. After analysing the economics of growth, William H. Overholt explores critical social issues of the transition, notably inequality, corruption, environmental degradation, and globalisation. He argues that Xi Jinping is pursuing the riskiest political strategy of any important national leader. Alternative outcomes include continued impressive growth and political stability, Japanese-style stagnation, and a major political-economic crisis.

Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. *The son of the Wolf* (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, *The Call of the Wild* (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including *The Sea-Wolf* (1904), *White Fang* (1906), *South Sea Tales* (1911), and *Jerry of the South Seas* (1917). One of London's most interesting novels is the semi-autobiographical *Martin Eden* (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Understanding the City Through Its Margins Taylor & Francis Group, 2019-07-10 Cities the world over and in particular developing countries suffer from uneven development and inequality. This is often coupled with the view that these inequalities constitute unfortunate anomalies. In contrast,

this edited volume draws out the ways in which the city has not been able to exist without its margins, both materially, ideationally, and socially. In this book the margins are, first, the mirrors of the city and, second, a fundamental route through which various centers can legitimate and sustain their power. Contemporary case studies are compared to a number of those from history with the accent on Asia, Africa and the Middle East, and engage with the underlying theoretical questions of what is the urban margin and what is marginality in urban society and spaces?

Academic Discourse Across Disciplines Ken Hyland, Marina Bondi, 2006 This volume reflects the emerging interest in cross-disciplinary variation in both spoken and written academic English, exploring the conventions and modes of persuasion characteristic of different disciplines and which help define academic inquiry. This collection brings together chapters by applied linguists and EAP practitioners from seven different countries. The authors draw on various specialised spoken and written corpora to illustrate the notion of variation and to explore the concept of discipline and the different methodologies they use to investigate these corpora. The book also seeks to make explicit the valuable links that can be made between research into academic speech and writing as text, as process, and as social practice.
