*Global Mobile Media* Gerard Goggin, 2010-10-18 Gerard Goggin has produced an incisive and penetrating overview of the world according to mobiles. Covering sight, sound and status, plus a host of other issues, he provides a provocative analysis of how mobile communication gadgets come to play such a prominent role in our lives. Any scholar of New Media will want to read this book – James Katz, Department of Communication, Rutgers University, USA. With billions of users worldwide, the cell phone is not only a successful communications technology; it is also key to the future of media. *Global Mobile Media* offers an overview of the complex topic of mobile media, looking at the emerging industry structures, new media economies, mobile media cultures and network politics of cell phones as they move centre-stage in media industries. The development, adoption and significance of cell phones for society and culture have been registered in a growing body of work. Where existing books have focused on communication, and on the social and cultural aspects of mobile media, *Global Mobile Media* looks at the media dimensions. Goggin provides a pioneering yet measured evaluation of how cell phone corporations, media interests, users and policy makers are together shaping a new media dispensation. *Global Mobile Media* successfully places new mobile media historically, socially and culturally in a wider field of portable media technologies through extensive case studies, including: the rise of smartphones, with a detailed discussion of the Apple iPhone and how it has catalysed a new phase in convergent media, audiences and innovation the new agenda in cultural politics and media policy, featuring topics such as iPhone apps and control, mobile commons, and open mobile networks a succinct map of the political economy of mobile media, identifying key players, patterns of ownership and control, institutions, and issues a critical account of cell phones' involvement in and contribution to much-discussed new forms of production and consumption, such as user-generated content, p2p networks, open and free source software networks an anatomy of how cell phones relate to other online media, particularly the Internet and wireless technologies. *Global Mobile Media* is an engaging, accessible text which will be of immense interest to upper-level undergraduates, postgraduates and researchers in Communication Studies, Cultural Studies and Media Studies, as well as those taking New Media courses.

**Acoustics and Vibration of Mechanical Structures—AVMS 2019** Nicolae Herisanu, Vasile Marinca, 2020-11-19 This book contains selected and expanded contributions presented at the 15th Conference on Acoustics and Vibration of Mechanical Structures held in Timisoara, Romania, May 30-31, 2019. The conference focused on a broad range of topics related to acoustics and vibration, such as analytical approaches to nonlinear noise and vibration problems, environmental and occupational noise, structural vibration, biomechanics and bioacoustics, as well as experimental approaches to vibration problems in industrial processes. The different contributions also address the analytical, numerical and experimental techniques applicable to analyze linear and non-linear noise and vibration problems (including strong nonlinearity) and they are primarily intended to emphasize the actual trends and state-of-the-art developments in the above mentioned topics. The book is meant for academics, researchers and professionals, as well as PhD students concerned with various fields of acoustics and vibration of mechanical structures.

Sockology Brenna Maloney, 2011-08-01 “[A] gallery of fabulously funky projects . . . Instructions are provided for some lovely little animals” from the author of the bestselling *Socks Appeal* (Australian Homespun). Breanna Maloney is back with a new posse of cute creatures! In this sequel book *Sockology*, you are encouraged to take it one step further with slightly more complex construction and endless inspiration. From a lovable jointed bear and fluffy sheep to a quirky

many-eyed alien, these 16 projects will surely keep you entertained (and challenged) for hours. Don't worry, detailed hand-drawn templates are included to guide you every step of the way. Praise for Socks Appeal "Assigned to cover the recession and housing crises that was brewing in 2008, Maloney started making sock animals for her children as a stress reducer. Maloney found that the more traumatic her job got, the more creating a new sock animal each night seemed to help. Maloney's wit and candor in how she writes the instructions is hilarious." —Publishers Weekly "Her collection takes the classic idea of the sock monkey and makes it into something new using basic techniques and imagination . . . Most of the projects are easy enough for (supervised) children, but adults who like a little whimsy won't be disappointed, either." —Library Journal

**Engineering Mathematics by Example** Robert Sobot,2023-11-14 This textbook is a complete, self-sufficient, self-study/tutorial-type source of mathematical problems. It serves as a primary source for practicing and developing mathematical skills and techniques that will be essential in future studies and engineering practice. Rigor and mathematical formalism is drastically reduced, while the main focus is on developing practical skills and techniques for solving mathematical problems, given in forms typically found in engineering and science. These practical techniques cover the subjects of algebra, complex algebra, linear algebra, and calculus of single and multiple argument functions. In addition, the second part of the book covers problems on Convolution and Fourier integrals/sums of typical functions used in signal processing. Offers a large collection of progressively more sophisticated mathematical problems on main mathematical topics required for engineers/scientists; Provides, at the beginning of each topic, a brief review of definitions and formulas that are about to be used and practiced in the following problems; Includes tutorial-style, complete solutions, to all problems.

*Infrastructure in Africa* Ncube, Mthuli,Leyeka Lufumpa, Charles,2017-03-31 Good infrastructure is essential for socio-economic growth and sustainable development. Safe and accessible water supplies, reliable energy, good transport networks and communications technology are all vital to a region's development agenda. This book presents a comprehensive exploration of the state of infrastructure in Africa and provides an integrated analysis of the challenges the sector faces, based on extensive fieldwork across the continent. Contributors with a wide range of expertise challenge current policy, practice and thinking on issues including the politics of infrastructure development, social inclusion, domestic resource mobilisation and infrastructure financing. The book will be an important resource for academic researchers, students and early career development professionals as well as policymakers and NGOs engaged in

dialoguing the infrastructure development options for Africa.

*Introduction to Global Energy Issues* Renaud Gicquel, May Gicquel, 2013-08-06 From the discovery of fire to that of the atom, the development of human societies has largely been based on the conquest of energy. In all countries, energy has gradually become one of the key factors of social and economic development, as well as capital, labor and natural resources, and now no one can do without it. After decades of cheap energy flowing without any problem, over the last forty years crises have become the rule. This disruption of the energy landscape is of particular concern as the impact of energy crises on human societies became considerable. This book seeks to provide a basis for reflection on all global energy problems, offering an analysis of the main aspects to consider: energy supply, resource-dependent industries and technology available, macroeconomic implications of energy demand, geopolitical issues, and specifics of the situation in developing countries. It does not thoroughly address environmental issues, which would require further study beyond the limits we set. This book is the second edition of a book published in 1992, at a time when obtaining energy and economic data was much more difficult than today, when many databases are freely accessible on the Internet. In this new context, we hope it will assist the reader in finding his/her way in the considerable amount of information available. Energy is a vast field that can be approached from multiple angles. The approach proposed here is to start by providing the reader with technical bases on energy, and thus energy supply, before considering the demand, that is to say, the socio- and macro-economic dimensions, then addressing global issues relating to energy, and finally complete the study of the main issues that arise in this area today. This book summarizes the main issues related to energy and requires no special knowledge beforehand, whether in economics, engineering or international relations. It consists of nine chapters, the first being the introduction. Chapter 2 introduces the main energy sectors (oil, natural gas, coal, synthetic hydrocarbons, nuclear power, renewable energy, thermal or pneumatic storage), i.e. how the main sources of energy can be exploited. Chapter 3 presents the main macroeconomic and energy indicators that are commonly used to assess the energy situation in a country. Concepts that are introduced being then used consistently in other chapters, it is essential to understand well their definitions and limitations. The fourth chapter analyzes the impacts of energy at the macro level, including the links between economic activity and energy consumption. The fifth chapter introduces the main principles generally accepted in the development of energy policy and planning, and then discusses the institutional aspects. The sixth chapter is devoted to geopolitics: current consumption of energy, energy reserves and resources worldwide, international energy trade, and specific problems faced by developing countries. The seventh chapter is devoted to the study of the energy situation in eleven different countries, showing the contrast between them, depending on their level of economic development, demography, natural resource endowments, etc. The list of countries includes high-income developed countries (France, United States, United Kingdom), the emerging group called the BRICS (Brazil, Russia, India, China, South Africa), a North African oil exporting country (Algeria), a west African country (Côte d'Ivoire), and an Asian exporter of coal and natural gas (Indonesia). The eighth chapter discusses emerging issues related to energy, in particular its relationship to the environment and the success of policies aiming at controlling demand. The ninth and final chapter begins with a prospective study of various scenarios for the medium and long term. The analyses presented in the book are then summarized by outlining the main pending issues. The book includes 22 tables, 150 figures and 3 mind maps, as well as links to databases available online (World Bank, United Nations, BP). Also available: an online course covering the main topics dealt with in this book. Statistical Abstract of the United States 2007 Bernan Press,2007-02 The Statistical Abstract of the United States is one of the most reliable and popular statistical references in existence. The Bernan Press Library Edition presents the complete, official content of the Statistical Abstract in an easily readable format - with 25 percent larger type than in the U.S. government edition - and with a sturdy binding designed to withstand heavy use in libraries.

Free Speech after 9/11 Katharine Gelber,2016-04-15 Although there has been a lot written about how counter-terrorism laws impact on human rights and civil liberties, most of this work has focussed on the most obvious or egregious kinds of human rights abrogation, such as extended detention, torture, and extraordinary rendition. Far less has been written about the complex ways in which Western governments have placed new and far-reaching limitations on freedom of speech in this context since 9/11. This book compares three liberal democracies - the United States, the United Kingdom and Australia, in particular showing the commonalities and similarities in what has occurred in each country, and the changes in the appropriate parameters of freedom of speech in the counter-terrorism context since 9/11, achieved both in policy change and the justification for that change. In all three countries much speech has been criminalized in ways that were considered anachronistic, or inappropriate, in comparable policy areas prior to 9/11. This is particularly interesting because other works have suggested that the United States' unique protection of freedom of speech in the First Amendment has prevented speech being limited in that country in ways that have been pursued in others. This book shows that this kind of argument misses the detail of the policy change that has occurred, and privileges a textual reading over a more comprehensive policy-based understanding of the changes that have occurred. The author argues that we are now living a new-normal for freedom of speech, within which restrictions on speech that once would have been considered aberrant, overreaching, and impermissible are now considered ordinary, necessary, and justified as long as they occur in the counter-terrorism context. This change is persistent, and it has far reaching implications for the future of this foundational freedom.

**European Data Collection on Sexual Offences Against Minors** Gert Vermeulen,Fleur Dhont,Arne Dormaels,2001 The fight against the sexual exploitation of and trade in children has gained particular and renewed international attention in the last few years and has become one of the most important concerns in the context of international law enforcement policy and cooperation. Since 1998, policy makers have come up with new legal initiatives at global as well as regional levels in order to tackle this problem in a more effective and coordinated way. This proves that the time has come to match words and actions, and to come up with concrete and useful tools for law enforcement services and NGO's active in the areas concerned. The current study therefore examines the feasibility of the further elaboration and implementation of recommendations from a previous project (96/STOP/003) regarding the systematic gathering and administration of data concerning missing minors, minor victims of trafficking in or sexual exploitation of children and perpetrators of sexual offences against minors, with the goal to further prepare the practical setting up of several international databases with immediate relevance to the police and the prosecuting or investigating

magistrates or officials, both in the EU Member States and the candidate countries. It is recommended to give Interpol a mandate to host an international database on missing persons and to create an EU monitoring centre responsible for the gathering and administration of reliable statistics and legal information on sexual exploitation of children and trafficking in human beings. It is also recommended for Interpol to host an international reference database on child pornography and to set up an analysis/intelligence child porn database at Europol. Regarding suspected and convicted sex offenders, it is proposed to create a database on pending investigations, an EU criminal records database and a database at Europol containing encoded information on both suspected and convicted offenders of sexual offences against children. Finally, it is suggested to create a European network of national DNA databases. The book also contains a summary of the conclusions in French.

Essentialism Greg McKeown, 2014-04-15 NEW YORK TIMES BESTSELLER • More than one million copies sold! Essentialism isn't about getting more done in less time. It's about getting only the right things done. "A timely, essential read for anyone who feels overcommitted, overloaded, or overworked."—Adam Grant Have you ever: • found yourself stretched too thin? • simultaneously felt overworked and underutilized? • felt busy but not productive? • felt like your time is constantly being hijacked by other people's agendas? If you answered yes to any of these, the way out is the Way of the Essentialist. Essentialism is more than a time-management strategy or a productivity technique. It is a systematic discipline for discerning what is absolutely essential, then eliminating everything that is not, so we can make the highest possible contribution toward the things that really matter. By forcing us to apply more selective criteria for what is Essential, the disciplined pursuit of less empowers us to reclaim control of our own choices about where to spend our precious time and energy—instead of giving others the implicit permission to choose for us. Essentialism is not one more thing—it's a whole new way of doing everything. It's about doing less, but better, in every area of our lives. Essentialism is a movement whose time has come.
