## **Academic E-Books Suzanne M. Ward,Robert S.**

Freeman,Judith M. Nixon,2015-11-15 Academic E-Books:

Publishers, Librarians, and Users provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout

program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

*Recognition and Management of Pesticide Poisonings (5th Ed.*  
) J. Routt Reigart, 2009-06 This 5th ed. is an update and expansion of the 1989 4th ed. This EPA manual provides health professionals with information on the health hazards of pesticides currently in use, and current consensus recommendations for management of poisonings and injuries caused by them. As with previous updates, this new ed. incorporates new pesticide products that are not necessarily widely known among health professionals. Contents: (1) General Information: Introduction; General Principles in the Management of Acute Pesticide Poisonings; Environmental and Occupational History; (2) Insecticides; (3) Herbicides; (4) Other Pesticides; (5) Index of Signs and Symptoms; Index of Pesticide Products. Charts and tables.

*Windows Server 2008 Inside Out* William Stanek, 2008-02-27  
Learn how to conquer Windows Server 2008—from the inside out! Designed for system administrators, this definitive resource features hundreds of timesaving solutions, expert insights,

troubleshooting tips, and workarounds for administering Windows Server 2008—all in concise, fast-answer format. You will learn how to perform upgrades and migrations, automate deployments, implement security features, manage software updates and patches, administer users and accounts, manage Active Directory directory services, and more. For customers who purchase an ebook version of this title, instructions for downloading the CD files can be found in the ebook.

Intelligent Systems Technologies and Applications 2016 Juan Manuel Corchado Rodriguez, Sushmita Mitra, Sabu M. Thampi, El-Sayed El-Alfy, 2016-09-19 This book constitutes the thoroughly refereed proceedings of the second International Symposium on Intelligent Systems Technologies and Applications (ISTA'16), held on September 21–24, 2016 in Jaipur, India. The 80 revised papers presented were carefully reviewed and selected from 210 initial

submissions and are organized in topical sections on image processing and artificial vision, computer networks and distributed systems, intelligent tools and techniques and applications using intelligent techniques.

**Springer Handbook of Acoustics** Thomas Rossing,2007-06-21

This is an unparalleled modern handbook reflecting the richly interdisciplinary nature of acoustics edited by an acknowledged master in the field. The handbook reviews the most important areas of the subject, with emphasis on current research. The authors of the various chapters are all experts in their fields. Each chapter is richly illustrated with figures and tables. The latest research and applications are incorporated throughout, including computer recognition and synthesis of speech, physiological acoustics, diagnostic imaging and therapeutic applications and acoustical oceanography. An accompanying CD-ROM contains audio and video files.

**Cataloging Cultural Objects** Murtha Baca,2006-06-12 In a visual and artifact-filled world, cataloging one-of-a-kind cultural objects without published guidelines and standards has been a challenge. Now for the first time, under the leadership of the Visual

Resources Association, a cross-section of five visual and cultural heritage experts, along with scores of reviewers from varied institutions, have created a new data content standard focused on cultural materials. This cutting-edge reference offers practical resources for cataloging and flexibility to meet the needs of a wide range of institutions—from libraries to museums to archives. Consistently following these guidelines for selecting, ordering, and formatting data used to populate metadata elements in cultural materials' catalog records: Promotes good descriptive cataloging and reduces redundancy Builds a foundation of shared documentation Creates data sharing opportunities Enhances end-user access across institutional boundaries Complements existing standards (AACR) This is a must-have reference for museum professionals, visual resources curators, archivists, librarians and anyone who documents cultural objects (including architecture, paintings, sculpture, prints, manuscripts, photographs, visual media, performance art, archaeological sites, and artifacts) and their images.

**The Geography of Networks and R&D Collaborations** Thomas Scherngell, 2016-08-23 The geography of networks and R&D collaborations, in particular the spatial dimension of interactions

between organisations performing joint R&D, have attracted a burst of attention in the last decade, both in the scientific study of the networks and in the policy sector. The volume is intended to bring together a selection of articles providing novel theoretical and empirical insights into the geographical dynamics of such networks and R&D collaborations, using new, systematic data sources and employing cutting-edge spatial analysis and spatial econometric techniques. It comprises a section on analytic advances and methodology and two thematic sections on structure and spatial characteristics of R&D networks and the impact of R&D networks and policy implications. The edited volume provides a collection of high-level research contributions with an aim to contribute to the recent debate in economic geography and regional science on how the structure of formal and informal networks modifies and influences the spatial and temporal diffusion of knowledge.

The Story of Milan Ella Noyes Noyes, 2017-06-26 Everybody has been in Milan, but who knows Milan? The traveller in search of the picturesque and mediæval sees nothing to arrest him—except comfortable hotels—in a city which seems to tell only of yesterday. A glance at the Cathedral, at St. Ambrogio, at the most famous of the pictures, and he hurries on. Yet a little longer stay reveals a

wealth of artistic interest in the many fine churches, in the rich galleries and museums, and much also that is worth learning even in the outward aspect of the city in the present day. The historic buildings have mostly fallen, the old crooked ways have given place to broad thoroughfares, the picturesque life of the past has been smothered by the sombre bustle of modern commercialism. But her heritage of beauty is to some extent inalienable. She remains always Italian. Colour and atmosphere lend an indestructible charm even to her modernity. The warm brick of the buildings against the limpid blue sky, the gold and grey of sunshine and shadow, the shining canals that border some of the further streets with a still and pensive melancholy, make a lovely and characteristic harmony still, as in the days of the Quattrocentist artists who painted them in the backgrounds of their Madonnas and San Roccas. And there are some old streets left, mostly in the heart of the city, such as the Via del Pesce and the Via Tre Alberghi, long cobbled alleys ribboned with triple lines of pavement, where the tall houses and bowed-out balconies of curious ironwork, rusted by age and weather, if they cannot remember the days of Milan's earlier glory, must have known at least something of the sad centuries of bondage which followed, before they shook to the

roar of the Cinque Giornate sixty years ago. The compass of this small volume has made it impossible to tell otherwise than summarily of the great past of this city and of her artistic riches to-day. I have had to pass over, or barely mention, many noteworthy things.

**A Short History of Italy (476- 1900)** Henry Dwight Sedgwick,2019-12-02 Henry Dwight Sedgwick's volume A Short History of Italy is an invaluable book on Italian history, taking a

reader from the fall of the Roman Empire to the beginning of the twentieth century. The author gives an insight into the main points of Italian history like the decline and fall of the Western Roman Empire, the conquests at the hands of the Eastern Romans (Byzantines), the Normans, and other peoples, the rise of the Papacy, and the intriguing ministry of Francis of Assisi, the rise of Venice as a prominent medieval power, the Renaissance in all of its glory in science and the arts, the slow and steady movement towards Italian nationalism, the rise of the mafia in Southern Italy and Sicily and much more.

#### Field Programmable Logic and Applications Patrick

Lysaght, James Irvine, Reiner Hartenstein, 1999-08-20 This book contains the papers presented at the 9th International Workshop on Field Programmable Logic and Applications (FPL'99), hosted by the University of Strathclyde in Glasgow, Scotland, August 30 – September 1, 1999. FPL'99 is the ninth in the series of annual FPL workshops. The FPL'99 programme committee has been fortunate to have received a large number of high-quality papers addressing a wide range of topics. From these, 33 papers have been selected for presentation at the workshop and a further 32 papers have been accepted for the poster sessions. A total of 65 papers from

20 countries are included in this volume. FPL is a subject area that attracts researchers from both electronic engineering and computer science. Whether we are engaged in research into software or hard software seems to be primarily a question of perspective. What is unquestionable is that the interaction of groups of researchers from different backgrounds results in stimulating and productive research. As we prepare for the new millennium, the premier European forum for researchers in field programmable logic remains the FPL workshop. Next year the FPL series of workshops will celebrate its tenth anniversary. The contribution of so many overseas researchers has been a particularly attractive feature of these events, giving them a truly international perspective, while the informal and convivial atmosphere that pervades the workshops have been their hallmark. We look forward to preserving these features in the future while continuing to expand the size and quality of the events.

**Cybersecurity Framework Manufacturing Profile** National Institute of Standards, 2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The

Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:

- \* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system
- \* An evaluation of their ability to operate the control environment at their acceptable risk level
- \* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security

Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and

includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology. *Emerging Market Economies and Financial Globalization*

Leonardo E. Stanley, 2018-03-15 In the past, foreign shocks arrived to national economies mainly through trade channels, and transmissions of such shocks took time to come into effect. However, after capital globalization, shocks spread to markets almost immediately. Despite the increasing macroeconomic dangers that the situation generated at emerging markets in the South, nobody at the North was ready to acknowledge the procyclicality of the financial system and the inner weakness of “decontrolled” financial innovations because they were enjoying from the “great moderation.” Monetary policy was primarily centered on price stability objectives, without considering the mounting credit and asset price booms being generated by market

liquidity and the problems generated by this glut. Mainstream economists, in turn, were not majorly attracted in integrating financial factors in their models. External pressures on emerging market economies (EMEs) were not eliminated after 2008, but even increased as international capital flows augmented in relevance thereafter. Initially economic authorities accurately responded to the challenge, but unconventional monetary policies in the US began to create important spillovers in EMEs. Furthermore, in contrast to a previous surge in liquidity, funds were now transmitted to EMEs throughout the bond market. The perspective of an increase in US interest rates by the FED is generating a reversal of expectations and a sudden flight to quality. Emerging countries' currencies began to experience higher volatility levels, and depreciation movements against a newly strong US dollar are also increasingly observed. Consequently, there are increasing doubts that the “unexpected” favorable outcome observed in most EMEs at the aftermath of the Global Financial Crisis (GFC) would remain.

#### **Evolutionary Computing and Mobile Sustainable Networks V.**

Suma, Nouredine Bouhmala, Haoxiang Wang, 2020-07-31 This book features selected research papers presented at the

International Conference on Evolutionary Computing and Mobile Sustainable Networks (ICECMSN 2020), held at the Sir M. Visvesvaraya Institute of Technology on 20–21 February 2020. Discussing advances in evolutionary computing technologies, including swarm intelligence algorithms and other evolutionary algorithm paradigms which are emerging as widely accepted descriptors for mobile sustainable networks virtualization, optimization and automation, this book is a valuable resource for researchers in the field of evolutionary computing and mobile sustainable networks.
