**Promoting Democracy and Human Rights in Russia** Sinikukka Saari, 2009-12-04 European regional organisations have spent significant amount of time, energy and money in supporting Russia's transition towards the western liberal-democratic model since the end of the cold war. This book explores the role the Council of Europe, European Union and Organisation for Security and Cooperation in Europe have played in Russia's post-Soviet transition in the field of human rights and democracy. The book argues that the organisations have played an important initial role in setting the reform agenda and in providing a general framework for interaction in the field of human rights and democracy. However, since the mid-1990s the impact of regional organisations has been slipping. Lately Russia has challenged the European human rights and democracy norms and now it threatens the whole framework for regional normative cooperation. Russia's attitude towards western liberal order has become more assertive and its defiance increasingly concerted even internationally. The main finding is that democracy and human rights promotion is not a one-way transference of norms like much of the theoretical literature and European practices presume. The Russian case demonstrates that the so-called target state can influence the norm promoters and the interpretation of the norms in a fundamental way. This is a finding that has significant implications both for theory and practice.

Russia's European Choice T. Hopf, 2008-05-26 Russia has never been able to escape its relationship with Europe, or Europe with Russia. Geography and history have conspired to make them both neighbors and unavoidable factors in each other's daily lives. From the early 1700s until the collapse of the Soviet Union in 1991, Europe and Moscow both relied on material power to balance against any threats emerging from East and West. More recently, Europe and the EU have adopted a different strategy: make Russia non-threatening by making it European, like us. Meanwhile, Russia's resistance to Europe's assimilationist mission is increasingly robust, fuelled by energy exports to Europe and the world. Contributors to this volume wrestle with the question of whether the European project is feasible, desirable, or even ethical.

The Degradation of the International Legal Order? Bill Bowring, 2008-02-19 Providing the basis for critical engagement with the pessimism of the contemporary age, *The Degradation of the International Legal Order?* argues passionately for a rehabilitation of the honour of historic events and processes, and of their role in generating legal concepts. Drawing primarily from the Marxian tradition, but also engaging with a range of contemporary work in critical theory and critical legal and human rights scholarship, this book analyses historical and recent international events and processes in order to challenge their orthodox interpretation. What is thus proposed is a new evaluation of international legal principles and human rights norms, the revolutionary content of which, it is argued, turns them from mere rhetoric into powerful weapons of struggle. Accessibly written, but theoretically sophisticated, this original and timely book is intended for critical teachers and students of international law,

human rights, and international relations, as well as legal and political activists.

*EU Personal Data Protection in Policy and Practice* Bart Custers, Alan M. Sears, Francien Dechesne, Ilina Georgieva, Tommaso Tani, Simone van der Hof, 2019-02-28 In this book, the protection of personal data is compared for eight EU member states, namely France, Germany, the United Kingdom, Ireland, Romania, Italy, Sweden and the Netherlands. The comparison of the countries is focused on government policies for the protection of personal data, the applicable laws and regulations, implementation of those laws and regulations, and supervision and enforcement. Although the General Data Protection Regulation (GDPR) harmonizes the protection of personal data across the EU as of May 2018, its open norms in combination with cultural differences between countries result in differences in the practical implementation, interpretation and enforcement of personal data protection. With its focus on data protection law in practice, this book provides in-depth insights into how different countries deal with data protection issues. The knowledge and best practices from these countries provide highly relevant material for legal professionals, data protection officers, policymakers, data protection authorities and academics across Europe. Bart Custers is Associate Professor and Director of Research at the Center for Law and Digital Technologies of the Leiden Law School at Leiden University, the Netherlands. Alan M. Sears, Francien Dechesne, Ilina Georgieva and Tommaso Tani are all affiliated to that same organization, of which Professor Simone van der Hof is the General Director.

*Aimee Semple McPherson* Silvia Sheaffer, 2013 After a devastating missionary trip to China on which her husband died, Aimee Semple McPherson refused to give up her dream of winning new souls to Christianity.

*EU-Russia Relations, 1999-2015* Anna-Sophie Maass, 2016-07-15 This book traces the development of EU-Russia relations in recent years. It argues that a major factor influencing the relationship is the changing internal dynamics of both parties, in Russia's case an increasingly authoritarian state, in the case of the EU an increasing coherence in its foreign policy as applied to former Soviet countries which Russia regarded as interference in its own sphere. The book considers the impact of conflicts in Kosovo, Chechnya, Georgia and Ukraine, discusses the changing internal situation in both Russia and the EU, including the difficulties in overcoming fragmentation in EU policy-making, and concludes by assessing how the situation is likely to develop.

*An Overview of Historical and Socio-economic Evolution in the Americas* Alberto Ciferri, 2019-08-09 This book includes concise descriptions of the history of 28 nations on the American continent, and focuses on features that hinder authentic development, particularly ethnic or class conflicts and wealth distribution. Its purpose is to stimulate an appreciation of history and cultural values, thus reinforcing the harmony of social relations. Essential elements of history, economics and sociology are presented in a plain and easily readable form, allowing the book to be directed to a non-specialized audience of individuals and students at the bachelors level in both developed and developing countries. The leadership of new generations will need to consider new development models based on balanced compromises between economic and technological progress and the most basic aspirations of society. Each chapter includes a brief presentation of data on the territory and the ethnic composition and

current socio-economic situation of a particular American nation. They also provide a scholarly description of the main historical events, and end with a brief insight into how the successes or difficulties of the individual country relate to cultural and historical events and to the evolution of that country's national identity or, indeed, identities.

*Comparative Renewables Policy* Elin Lerum Boasson, Merethe Dotterud Leiren, Jørgen Wettestad, 2020-10-29 Challenging one-eyed technology-focused accounts of renewables policy, this book provides a ground-breaking, deep-diving and genre-crossing longitudinal study of policy development. The book develops a multi-field explanatory approach, capturing inter-relationships between actors often analyzed in isolation. It provides empirically rich and systematically conducted comparative case studies on the political dynamics of the ongoing energy transition in six European countries. While France, Germany, Poland and the United Kingdom opted for 'technology-specific' renewables support mixes, Norway and Sweden embarked on 'technology-neutral' support mixes. Differences between the two groups result from variations in domestic political and organizational fields, but developments over time in the European environment also spurred variation. These findings challenge more simplistic and static accounts of Europeanization. This volume will be of key interest to scholars and students of energy transitions, comparative climate politics, policy theory, Europeanization, European integration and comparative European politics more broadly, as well practitioners with an interest in renewable energy and climate transition. **The Ephemeral History of Perfume** Holly Dugan, 2011-09-14 In contrast to the other senses, smell has long been thought of as too elusive, too fleeting for traditional historical study. Holly Dugan disagrees, arguing that there are rich accounts documenting how men and women produced, consumed, and represented perfumes and their ephemeral effects. She delves deeply into the cultural archive of olfaction to explore what a sense of smell reveals about everyday life in early modern England. In this book, Dugan focuses on six important scents -- incense, rose, sassafras, rosemary, ambergris, and jasmine. She links these smells to the unique spaces they inhabited -- churches, courts, contact zones, plague-ridden households, luxury markets, and pleasure gardens -- and the objects used to dispense them. This original approach provides a rare opportunity to study how early modern men and women negotiated the environment in their everyday lives and the importance of smell to their daily actions. Dugan defines perfume broadly to include spices, flowers, herbs, animal parts, trees, resins, and other ingredients used to produce artificial scents, smokes, fumes, airs, balms, powders, and liquids. In researching these Renaissance aromas, Dugan uncovers the extraordinary ways, now largely lost, that people at the time spoke and wrote about smell: objects ambered, civited, expired, fetored, halited, resented, and smeeked or were described as breathful, embathed, endulced, gracious, halited, incensial, odorant, pulvil, redolent, and suffite. A unique contribution to early modern studies, *The Ephemeral History of Perfume* is an unparalleled study of olfaction in the Renaissance, a period in which new scents and important cultural theories about smell were

developed. Dugan's inspired analysis of a wide range of underexplored sources makes available to scholars a remarkable wealth of information on the topic.

**Clinical Preventive Services in Substance Abuse and Mental Health Update** Joel L. Nitzkin, 2004 This report has been prepared to summarize the most promising preventive interventions of a behavioral nature intended to impact mental and substance use disorders, or in some cases, medical outcomes. This review focuses on prevention interventions that are primarily delivered by health care systems. Interventions provided in schools, worksites, communities, and criminal justice systems were excluded, as were population-based interventions.

*German Yearbook of International Law* , 2000

**The Influence of Human Rights on International Law** Norman Weiß, Jean-Marc Thouvenin, 2015-02-25 This volume discusses the impact of human rights law on other fields of international law. Does international human rights law modify other fields of international law? Contributions focus on possible spillover effects of human rights on international economic or international criminal law. Does international human rights law have a streamlining effect on international law as a whole? This might be identified as a process of constitutionalisation. In this book, human rights can be understood as one of the core principles of international legal order and thus have an effect on the general law of treaties or on the settlement of disputes. Although human rights law is a relatively young field of international law, its content and core values today are of major importance for the interpretation of international law as a whole. As we witness a redefinition of sovereignty as a responsibility of states towards the people and a shift to greater relevance of the individual in international law in general, it is a logical consequence that human rights have an impact on other areas of international law.

**Prisons and Imprisonment** Cormac Behan, Abigail Stark, 2023-01-01 This textbook examines prisons and imprisonment. Historically, prisons and prisoners have been a source of interest to the general public. However, despite near universal acceptance of imprisonment as a feature of society, we know relatively little about the reality of prison life, or the effects it has on individuals and communities. Using academic scholarship, empirical research,

government papers, policy reports, and accounts from lived experiences of the institution, this book analyses the complexities and contradictions of prison life, the place of the prison in twenty-first century society, and its prospects for the future. This book will introduce readers to key debates surrounding the use of imprisonment, and challenge readers to interrogate conventional perspectives on an institution that reflects the society in which it is situated.
