**Present Knowledge in Nutrition** John W. Erdman, Jr., Ian A. MacDonald, Steven H. Zeisel, 2012-05-30 Present Knowledge in Nutrition, 10th Edition provides comprehensive coverage of all aspects of human nutrition, including micronutrients, systems biology, immunity, public health, international nutrition, and diet and disease prevention. This definitive reference captures the current state of this vital and dynamic science from an international perspective, featuring nearly 140 expert authors from 14 countries around the world. Now condensed to a single volume, this 10th edition contains new chapters on topics such as epigenetics, metabolomics, and sports nutrition. The remaining chapters have been thoroughly updated to reflect recent developments. Suggested reading lists are now provided for readers wishing to delve further into specific subject areas. An accompanying website provides book owners with access to an image bank of tables and figures as well as any updates the authors may post to their chapters between editions. Now available in both print and electronic formats, the 10th edition will serve as a valuable reference for researchers, health professionals, and policy experts as well as educators and advanced nutrition students.

*Economic Migration, Social Cohesion and Development* Patrick A. Taran, European Committee on Migration, 2009-01-01 In the final declaration of their 8th conference, the European ministers responsible for migration affairs committed to promoting and protecting the human rights of migrants, with special attention to gender equality and the rights of women; to strengthening dialogue and co-operation between receiving, transit and origin countries, particularly within Europe; and to promoting coherence at all levels (international, national, regional and local) between migration, development and integration policies. The ministers also agreed to manage economic migration with a view to promoting economic and social progress in receiving, transit and origin countries; to enhance social cohesion by improving the integration of migrants and persons of immigrant background and the re-integration of migrants who return to their countries of origin; and to strengthen the contribution of migrants and persons of immigrant background to development in receiving and origin countries and their involvement in co-development programmes. This report was prepared to support the ministerial debate during the conference. It presents the main aspects and characteristics of migration in the member states of the Council of Europe, analyses policy challenges raised by contemporary migration and identifies an integrated policy agenda.

Fibre-Rich and Wholegrain Foods Jan A Delcour, Kaisa Poutanen, 2013-03-26 Consumers are increasingly seeking foods that are rich in dietary fibre and wholegrains, but are often unwilling to compromise on sensory quality. Fibre-rich and wholegrain food reviews key research and best industry practice in the development of fibre-enriched and wholegrain products that efficiently meet customer requirements. Part one introduces the key issues surrounding the analysis, definition, regulation and health claims associated with dietary fibre and wholegrain foods. The links between wholegrain foods and health, the range of fibre dietary ingredients and a comparison of their technical functionality are discussed, as are consumption and consumer challenges of wholegrain foods. Part two goes on to explore dietary fibre sources, including wheat and non-wheat cereal dietary fibre ingredients,

vegetable, fruit and potato fibres. Improving the quality of fibre-rich and wholegrain foods, including such cereal products as wholegrain bread, muffins, pasta and noodles, is the focus of part three. Fibre in extruded products is also investigated before part four reviews quality improvement of fibre-enriched dairy products, meat products, seafood, beverages and snack foods. Companion animal nutrition as affected by dietary fibre inclusion is discussed, before the book concludes with a consideration of soluble and insoluble fibre in infant nutrition. With its distinguished editors and international team of expert contributors, Fibre-rich and wholegrain foods provides a comprehensive guide to the field for researchers working in both the food industry and academia, as well as all those involved in the development, production and use of fibre-enriched and wholegrain foods. Reviews key research and best industry practice in the development of fibre-enriched and wholegrain products Considers analysis, definition, regulation and health claims associated with dietary fibre and wholegrain foods Explores sources of dietary fibre including: wheat and non-wheat cereal, vegetable, fruit and potato fibres

Human Killing Machines Adam Lankford, 2012-07-10 Human Killing Machines offers a comparative analysis of the indoctrination methods used to produce violence in the famous Milgram and Zimbardo psychological experiments, as well as Iran, Nazi Germany, Al Qaeda, and Abu Ghraib. Based on these findings, specific policy recommendations are made for how we can begin to reform the U.S. military and increase its accountability, shake Al Qaeda terrorists' commitment to their missions, and reverse course on Iran to bring the oppressive regime down from the inside.

**Ireland's Great Famine in Irish-American History** Mary Kelly, 2013-11-18 Ireland's Great Famine in Irish-American History: Enshrining a Fateful Memory offers a new, concise interpretation of the history of the Irish in America. Author and distinguished professor Mary Kelly's book is the first synthesized volume to track Ireland's Great Famine within America's immigrant history, and to consider the impact of the Famine on Irish ethnic identity between the mid-1800s and the end of the twentieth century. Moving beyond traditional emphases on Irish-American cornerstones such as church, party, and education, the book maps the Famine's legacy over a century and a half of settlement and assimilation. This is the first attempt to contextualize a painful memory that has endured fitfully, and unquestionably, throughout Irish-American historical experience.

**Delightfully Healthy** Myriam Prati HHC CNC, 2022-03-21 Delightfully Healthy! This book is a practical guide to changing the foods we choose, our exercise, and our way of thinking into new habits toward a healthier life. In addition, through these pages, readers will also find a door that opens and a horizon that they can reach to discover those pleasures that make us more vital and give us true fulfillment. Delightfully Healthy! delves into, among other subjects, the impact of food on health, the impact so often unsuspected of sugar in our bodies, superfoods and longevity, some strategies to achieve balance between body and mind, techniques and tools to lower stress and anxiety, and more than fifty delicious and healthy recipes.

**The Middle East Peace Process and the EU** Taylan Özgür Kaya, 2012-12-20 EU policy-makers have in the past decade endeavoured to formulate a substantial redefinition of the organisation's international ambitions. Attempting to

carve out a new role as a key foreign and security policy actor in international politics, the EU has been involved in peace negotiations across the globe. Here, Taylan Ozgur Kaya looks at how this is enacted, with particular reference to the Middle East peace process. Expanding its political, diplomatic, economic and security role in the region, the EU, whilst still being the junior partner to the US, has increasingly played a more conspicuous role in the attempts to resolve (or at least mediate) the Israeli-Palestinian conflict. Bearing this in mind, Kaya examines to what extent the EU manages to live up to its self-image as a key player in conflict resolution and crisis management in the region and beyond. With the financial and diplomatic future of Europe ever more in the spotlight, this book will appeal both to researchers of the Peace Process and to policy-makers.

**Zero Emissions Power Cycles** Evgeny Yantovsky, J. Gorski, Mykola Shokotov, 2009-04-23 Focusing on fossil-fueled, nonpolluting power generation systems, Zero Emissions Power Cycles presents alternative solutions to the severe emissions problems of power plants. Along with a description of new thermodynamic cycles and the results of computational analyses, this volume provides modern analytical tools and equations to evaluate exergy a

**Probing Parapsychology** Grant R. Shafer, 2023-05-16 Parapsychology is a science made controversial by its subjects: extrasensory perception, psychokinesis (mind over matter) and disembodied minds, which imply life after death. Moreover, these parapsychological phenomena (called psi) challenge physicalism, the philosophy that everything can be completely understood in terms of physics. This book is a snapshot of the parapsychological field, with essays written by authors of diverse academic backgrounds and experiences. Essays examine parapsychological phenomena from prehistory, through the founding of the science by intellectuals distressed by physicalism, to the postmodern present. It includes both experimental and theoretical evaluations of the phenomena. Parapsychology is a science which may overturn the philosophy which has dominated science since Newton and may inspire curious readers who are disheartened by the consequent denial of the spirit.

UFOs Karl Svozil, 2023-08-01 Unidentified phenomena in space, in the Earth's atmosphere, and in waters are too important to leave their exploration to the military and scientific laypersons. Their proper scientific study is important for a variety of reasons; in particular, scientists and the public at large need to know the basic facts, to be informed about the way evidence is recorded, and to understand the difference between reliable evidence and fiction, as well as between plausible explanations and fantasy. With this objective, the book surveys the history of UFO observations, the variety of recorded phenomena, and recounts the efforts of investigative commissions and their published findings. Although wild rumors are demystified in the process, this is not an exercise in rumor-bashing. An open and at the same time critical mindset is the key. Many narratives and hypothesis appear implausible relative to our present state of knowledge; but this alone should not lead to their outright exclusion. Thus the author also pays attention to UFO sightings that have so far eluded explanation in terms of known physics or meteorology. Here the reader will encounter some of the more speculative

but scientifically tenable proposals, for example, relating to sudden zigzag motion without apparent inertia or recognizable propulsion, yet always with a clear guide to their plausibility. Last but not least, the book outlines plans and suggestions for future research capable of revealing the existence and intentions of extraterrestrial intelligences, outer-space engineers, or technologies so far known only from science fiction.

*Building Character in the American Boy* David I. Macleod, 2004-09-30 Among established American institutions, few have been more successful or paradoxical than the Boy Scouts of America. David Macleod traces the social history of America in this scholarly account of the origins of the Boy Scouts and other character-building agencies, through which adults tried to restructure middle-class boyhood. Back in print; First paperback edition.

*New Tourism Ventures* Dimitri Tassiopoulos, 2008 An entrepreneurial and managerial approach. Continual increases in wealth and leisure time have given a sharp rise to tourism, which resulted in the rapid development of tourism - related ventures such as hotels, bed and breakfast accommodation, travel agencies, restaurants, theme parks, event companies, resorts, tourist guides and tour operators, to mention a few. *New Tourism Ventures: An Entrepreneurial and Managerial Approach* provides a definitive grounding of how to create and manage such tourism ventures. It takes an entrepreneurial and managerial approach to the subject, underpinning the various concepts associated with entrepreneurship and demonstrating the linkages of the subject with the tourism economy within the context of international best practice and research.

Rethinking and Recontextualizing Glosses Patrizia Lendinara, Loredana Lazzari, Claudia Di Sciacca, Fédération internationale des instituts d'études médiévales, 2011 Glossing was a scribal practice in use since antiquity, but it was in the Middle Ages that it acquired a wider meaning and a different role, becoming one of the most widespread forms of literacy in the Germanic West, including the British Isles. Most of the essays collected in this volume focus on the late Anglo-Saxon period, that is a well-identified time-frame spanning from the Benedictine Reform to the eleventh century. As recent scholarship has convincingly established, the second half of the tenth century and the beginning of the eleventh saw the blooming of Anglo-Saxon scholarship and a remarkable advance in educational practices. Within this cultural resurgence, glossing undoubtedly played no small role and was particularly vital in centres such as Abingdon, Canterbury, and Winchester. In the contributions to the present volume, the relationship between glosses and the text they accompany is always explored on the basis of their manuscript context. The essays are devoted to both Latin and Old English apparatuses of glosses as well as to specific items of the Old Norse and Old Saxon glossarial production.
