Systemic Lupus Erythematosus: Clinical Aspects Jasper Meyer,2021-11-16 Systemic lupus erythematosus (SLE) is an autoimmune disease of the body in which the immune system attacks healthy tissue. It is known as the great imitator as it mimics the symptoms of other illnesses. Some common complaints are joint pains, fever, malaise, fatigue and muscle pains. The presentation of the disease can be different in males and females. Women tend to have more relapses, arthritis, a low white blood cell count, psychiatric symptoms and Raynaud's phenomenon. In contrast, men can have more seizures, serositis, kidney disease, peripheral neuropathy and skin problems. Skin symptoms can prevail in nearly 70% of individuals with lupus. Anti-extractable nuclear antigen and antinuclear antibody comprise the serologic testing for this disease. SLE cannot be cured but a range of treatment options are available to control it. Death may occur within 5 years if complications such as infections and organ failures occur. This is largely preventable with early diagnosis and treatment. This book aims to shed light on some of the unexplored aspects of systemic lupus erythematosus and the recent researches in this pathological condition. The objective of this book is to give a general view of the different aspects of its pathophysiology, diagnosis and management. The extensive content of this book provides the readers with a thorough understanding of this disease.

A History of the American Rice Industry, 1685-1985 Henry C. Dethloff,2000-06 Rice is a staple food for a majority of the world's people. Americans, however, traditionally have consumed corn and potatoes rather than rice. It thus may come as a surprise to some Americans that rice has been produced in America for more than three centuries and during that time has accounted for much of the world's trade. Most rice is consumed where it is produced, with little entering foreign markets. American rice has been primarily a product for the international export trade, but changing technology and political environments at home and abroad have made it a volatile commodity. Henry C. Dethloff has researched many original manuscript documents to gather the history of this American agribusiness that got its start when a British sea captain brought seed from Madagascar to the Carolinas in 1685. Plantations developed, and planters with resources for the complicated, labor-intensive production of rice made it the number-two colonial export cash crop. Louisiana, Texas, Arkansas, Tennessee, California, and Mississippi eventually became the primary rice-growing states, and new plant varieties, further mechanization of farming, and improved pumping and irrigation systems reinvigorated the industry at the turn of the century. In the twentieth century, the rice industry is even more tied to the political vagaries of the world and its markets than before. Events in foreign countries, trade policies, and the federal government's foreign policy have more impact on the industry than the weather in the rice fields.

The Attakapas Country Harry Lewis Griffin,1999-12-31 This comprehensive volume traces the history of Lafayette Parish, from its earliest beginnings and the struggle between the Attakapas Indians and the first white settlers, French Canadians, English traders, and French trappers to the conditions in 1959, when this historical work was first published. Over the course of this history, Griffin analyses everything from the territorial and political evolution of the parish to the development of transportation and travel, and from the founding of the schools to the early financial and industrial conditions. Griffin also provides accounts of the flood of 1927, the greatest challenge Lafayette Parish had to overcome in its early history and a sign of the persevering spirit that would help the parish to overcome such destructive forces.

F Power Mode Fitness Mehrshad Dave,2016-12-26 F Power Mode Fitness Systematic workout Program for no doubt gives you the best results to achieving a fit body but challenging yourself with new exercises and workouts is a different discussion. When your body gets used to a specific workout program, it loses its effectiveness. For example if you do sit-ups every day in a month and increase the number of reps as days pass, not only it doesn't help your body to burn fats and build muscles, but it makes this exercise easy for your body and it loses its effectiveness. If you always get your body in to new challenges and learn more exercises, for sure, your body is going to be fit. In this book we challenge you and your body to new workouts and exercises. All of the body parts, legs, abs, and upper body... have been categorized in their own section and each section consists of steps. Each step is different from each other and is a challenge for you. From step 1 as you go forward you face new exercises and different levels of reps for each exercise which has been divided to 3 Modes: Minimum, Middle, and Maximum. Each step is a prerequisite for the next one. If you find a step hard, don't rush ahead to the next step. Just practice this one in your workout till you get comfortable with it and then go for the next step. Choose your Specific Body Type workout program that suits your body. Follow along with our workout program and know that if you are serious to be fit, you are in the right way. Remember, always challenge yourself.
