Strategy for the Global Market Vladimir Kvint,2015-10-05 In the twenty-first century, the global community constantly strives to bring structure and order to the world through strategic means. From the highest levels of governments and militaries to multilateral institutions, NGOs, and corporations, a strategy for the future of a company, region, country, or even the world is tantamount to success. Yet few understand what strategy actually is and how it can be developed, planned, and implemented. Strategy for the Global Market combines a fundamental study of the theory of strategy with its practical applications to provide a new approach to the global emerging market. Due to the technological transformations in communications and transportation, and the birth and development of both the global community and the global marketplace over the past twenty years, the world's population and corporations are in much closer contact with their counterparts across the globe than ever before. This has led to increasing competition and even rivalries. Understanding the strategic environment, as well as solving problems either through amicable means or conflict, requires the powerful instrument of strategy to remain efficient and to triumph. Features of this book include: Methodology and practical recommendations for all stages of developing and implementing strategy. A comprehensive guide with explanations and descriptions, for the preparation and orderly compilation of all necessary strategy documents. Real-world examples taken from corporate, government, and military strategizing practices in emerging market countries and the global marketplace. This book should be on the desk of every national, regional, and military leader, corporate executive, manager, and student of strategy.

The Global Emerging Market Vladimir Kvint,2010-04-26 Despite the growing importance of the global emerging market (GEM) for the world's business, economies, and politics, it has received a relatively scant amount of academic attention in business and economics courses. This textbook is the first to focus on the GEM and its strategic and economic characteristics. The Global Emerging Market: Strategic Management and Economics describes the fundamental economic base and trends of the global marketplace (GMP) as well as business and management development for the conditions of emerging-market countries (EMCs). Focusing on the formation of a strategic mindset and the decision making process, it explains how to analyze the basic economic factors and the global order, especially in times of crisis. This text also explains how to classify countries related to this new market of tremendous opportunities. Furthermore, the book includes recommendations on how to develop entry and exit strategies for the GEM, work in it and create efficient management systems. Features include: Extensive tables, charts, and graphs illustrating the strategic considerations of the GMP and the GEM End-of-chapter study questions Practical examples based on the author's involvement in the development of the GEM, from both sides of the international transactions This academic book is the ideal guide for current business leaders and students on how to make strategic, symmetric, and asymmetric time-sensitive decisions related to the GEM.

Infrastructure and Productivity in Asia J. Kidd,F. Richter,2005-02-11 There is a feeling that Asia is at a crossroad, and is facing a new crisis. The earlier crisis of 1997/98 showed that effective systems were missing. Afterwards governments, foreign investors and foreign managers initiated more holistic infrastructures, but corruption, poorly connecting systems, and a lack of transparent management have ensured that these are under performing. In this book well-informed authors offer insights on Asia's political, educational and physical infrastructures, and indicate the routes leading to better integrated futures.

Sources for a Better Education Piet Kommers,2022-02-22 This textbook evolves from the intersection between 'Research', 'Educational Information Technologies' and recent 'Best Practices'. It offers diplomacy and erudite rhetoric in order to harvest from innovation projects and see how new professional needs for teachers are emerging day by day. The volume launches the compact background for the 21st century education that every teacher faces after being in charge for 3 or 6 years after pre-service training. 'Sources for a better education' refers to the deep understanding and to the incentives for encouraging teachers to leave the comfort zone and experiment the next steps into a further sophisticated professionalism, without the threat of feeling in a 'Dilemma'. The first candidate for extending one's teaching effectiveness is to tailor one's teaching to the test to be expected. 'Teaching to the Test' is an understandable tactic, however it endangers the students' full understanding of underlying concepts and analogies. The second candidate for professionalism is the deeper layer of knowledge on how curricular domains are related. In simpler terms: better teachers know how to 'bridge' topics and subjects so that students develop a deeper understanding on the patterns and structure in knowledge. The 21st century education prioritizes higher degrees of flexible-, divergent and abstract thinking, so that creative problem solving comes into reach. ICT tools for making prior knowledge explicit is a major example on how learners harvest upon prior knowledge, thinking and intuition. The third source for a better education is the courage to envisage one's meta knowledge in order to see patterns in learning and understanding. The more conscious prior knowledge gets decompiled into genetic metaphors; the better future learning can be anticipated. The fourth asset for meta-cognitive skills is the wide spectrum of tools that the web offers for building knowledge infra-structures so that knowledge becomes transformed into problem solving skills; the availability of knowledge is no longer sufficient for finding creative and authentic solutions in future situations. This is the case for both students and teachers. By tradition, the bottom-up strategy from reproductive factual learning up to the levels of problem solving and creative thinking has been favoured. The 'one-click away' access to information on the web asks a more strategic attitude from learners and practitioners to cope with the periphery between known and unknown, so that a more effective meta-cognition develops. The fifth stimulus for more effective learning is the expanding impact of social media. Social media tend to intimidate learners with incomplete understanding to jump on biases as delivered through political and conspiracy agendas. This books aims at the challenge to build upon learners' existential needs and developing interest for a longer-term learning perspective. "Renaissance man and philosopher Piet Kommers presents us with an interesting question: What makes education exciting? His book covers a range of lessons learnt through research and practice, covering philosophies and paradoxes, ranging from learning to learn to machine learning for learning. In 35 chapters he takes us on an exciting, comprehensive journey of just about every conceivable aspect of technology and education. This is a must-have for every 21st Century bookshelf!" By: Johannes Cronjé, professor of Digital Teaching and Learning in the Department of Information Technology at the Cape Peninsula University of Technology, South Africa. "Piet Kommers has in 400 pages provided an overview of teaching based on practical experience. It is not a summary of pedagogic models, but a guide to important factors in how to motivate students and thus improve their learning. New technologies changes teaching, and we need to understand how application of such technologies can improve the learning. This book provides such knowledge and I wish I had it when I started teaching at university many years ago." By: Jan Frick, Professor Business School, University of Stavanger, Norway. Piet Kommers delivers a very thorough book with a holistic perspective on Learning Technologies. This book is a result of many years of experience that the author has in Higher Education. It comprises lessons learned from the author's professional career, including inputs from European Union research projects, as well as diversified interactions with a wide range of Peoples and Cultures. The result is a unique perspective that is a must-read for anyone interested in Learning Technologies, past, present, and future! By: Pedro Isaías, associate professor at the Information Systems & Technology Management School of The University of New South Wales (UNSW - Sydney), Australia. "Distinguished Professor and Thinker Dr. Piet Kommers presents the academic community with a new horizon on education that reflects the current and future technology trends in the e-Learning and Fast Internet ubiquity. The Book discusses the current and most recent advances in research and application of most effective learning methods in conjunction with the future directions in machine learning in support of learning. The Book's 35 chapters present cutting-edge technologies and state-of-the-art learning methods in support of best educational practices and the student's best learning experience. The Book is most valuable asset to educator's community pursuing the mission of excellence in the Third Millennium!" By: Eduard Babulak, Professor, Computational Sciences, Liberty University, Lynchburg, USA. Well-known scientist, (e-)learning expert and philosopher Piet Kommers presents us with an interesting question: What makes education exciting? His book covers a range of lessons learnt through research and practice, covering philosophies and paradoxes, ranging from 'learning to learn' to 'machine learning for learning'. In 35 chapters he takes us on an exciting, comprehensive journey of just about every conceivable aspect of technology and education. This is an interesting and useful publication for all educators as well as

learners and must-have for every 21st Century bookshelf! By: Eugenia Smyrnova-Trybulska, Dr. hab., associate professor, Institute of Pedagogy, Faculty of Art and Sciences of Education, University of Silesia in Katowice, Poland. “The book presents a mosaic of assets reflecting the vast international experience in research and realization of learning technologies of the author, honourable professor of the UNESCO Chair in New information technologies in education for all, Piet Kommers. Describing various aspects of learning strategies, approaches, techniques and technologies in a concise way, he engages the readers into the mental construction of a big picture and makes them reconsider routine processes of teaching and learning. Exciting and thought-provoking reading for educators, researchers, and devoted learners.” By: professor Volodymyr Gritsenko, Director of the International Research and Training Centre for Information Technologies and Systems, National Academy of Sciences and Ministry of Education and Science of Ukraine, Head of the UNESCO Chair.

Pragmatic Analysis of Political Data Fareed Hameed Al-Hindawi,Waleed Ridha Al-Juwaid,2017 This book tackles various pragmatic issues which are manipulated by politicians in diverse contexts where the principle of being honest is less important than fulfilling their goals. These issues range from Irony to Impoliteness, Deception, Diplomacy, Fallacy, and Political Accusations. Besides, it reveals what pragmatic strategies are appealed to by those politicians to win over their opponents or convince their audience. Revealing those strategies is done by pragmatic analytical models which are applied to verbal and nonverbal data. Thus, the book can be useful to politicians, pragmaticians, and applied linguists. Additionally, the book is indispensable to researchers interested in pragmatics as it suggests different approaches about how to build pragmatic analytical models and how to use them to analyze political data or any other kind of data.

India's Approach to Border Management Pushpita Das,2022-12-29 This book attempts to provide a comprehensive understanding of the circumstances which have shaped India’s approach towards its international borders and the framework it has developed to better manage its borders. The book argues that persistence of various cross-border threats and challenges and an absence of robust intra-regional trade among its neighbouring countries forced India to employ a security-centric and unilateral approach to border management with emphasis on hardening the borders to cross-border trade and travel and keeping the border areas underdeveloped to act as a buffer against external conventional threats. Besides discussing the threats and challenges that India faces along the borders, the book aims to develop an understanding of India’s border management practices by analysing various programmes and initiatives such as the raising of border guarding forces; building of physical and electronic fences; the establishment of modern facilities for smoothening legitimate cross-border travel; the development of the border areas through special programmes; and increasing trade and connectivity as well as other cooperative bilateral mechanisms. Perl & LWP Sean M. Burke,2002-06-20 Perl soared to popularity as a language for creating and managing web content, but with LWP (Library for WWW in Perl), Perl is equally adept at consuming information on the Web. LWP is a suite of modules for fetching and processing web pages. The Web is a vast data source that contains everything from stock prices to movie credits, and with LWP all that data is just a few lines of code away. Anything you do on the Web, whether it's buying or selling, reading or writing, uploading or downloading, news to e-commerce, can be controlled with Perl and LWP. You can automate Web-based purchase orders as easily as you can set up a program to download MP3 files from a web site. Perl & LWP covers: Understanding LWP and its design Fetching and analyzing URLs Extracting information from HTML using regular expressions and tokens Working with the structure of HTML documents using trees Setting and inspecting HTTP headers and response codes Managing cookies Accessing information that requires authentication Extracting links Cooperating with proxy caches Writing web spiders (also known as robots) in a safe fashion Perl & LWP includes many step-by-step examples that show how to apply the various techniques. Programs to extract information from the web sites of BBC News, Altavista, ABEBooks.com, and the Weather Underground, to name just a few, are explained in detail, so that you understand how and why they work. Perl programmers who want to automate and mine the web can pick up this book and be immediately productive. Written by a contributor to LWP, and with a foreword by one of LWP's creators, Perl & LWP is the authoritative guide to this powerful and popular toolkit.

Primates in Fragments Laura K. Marsh,Colin A. Chapman,2013-09-07 This book is number two in a series for Primates in Fragments. In this volume, ten years after the first <http://www.springer.com/social+sciences/anthropology+%26+archaeology/book/978-0-306-47696-9>, we continue to address issues regarding primates within a fractured landscape. There are seven sections based on specific categories of primates in fragments. In the Introductory section, authors discuss the issues surrounding primates in remnant habitats as well as encourage discussion about what we mean by fragmentation on a landscape scale. In the Long-Term and Regional Studies section, authors present information on changes that have occurred during longer studies as well as changes that have occurred over regions. In the Landscape, Metapopulations and the Matrix section, authors cover topics from dry to moist forests, and from metapopulations to single species use of multiple fragments locations. In Feeding and Behavioral Ecology, authors take a closer look at the flexibility and responsiveness of primates in fragments in terms of their food choices, resource use, and behavioral changes. In Endemic, Endangered, and Nocturnal Primates authors uncover details involving critical primates living in major city centers to the heights of the Himalayas. In Genetics, Disease and Parasites authors cover topics including population viability, disease and parasite transmission between primates in fragments and humans. Finally, in the Conservation and Ecology: Threats and Management section, we synthesize information in this volume and make recommendations for the future of work in this field and the survivability of primates in fragments.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these

techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Recommendations for Improving the Recruiting and Hiring of Los Angeles Firefighters Chaitra M. Hardison,Nelson Lim,Kirsten M. Keller,Jefferson P. Marquis,Leslie Adrienne Payne,Robert Bozick,Louis T. Oak,Lisa Saum-Manning,2015-01-22 Reviews the Los Angeles Fire Department’s hiring practices as of June 2014 and outlines a recommended new firefighter hiring process that is intended to increase efficiency of the hiring process, bolster the evidence supporting the validity of it, and make it more transparent and inclusive.

Agrarian change in tropical landscapes Liz Deakin,Mrigesh Kshatriya,Terry Sunderland,2016-01-25 Agricultural expansion has transformed and fragmented forest habitats at alarming rates across the globe, but particularly so in tropical landscapes. The resulting land-use configurations encompass varying mosaics of tree cover, human settlements and agricultural land units. Meanwhile, global demand for agricultural commodities is at unprecedented levels. The need to feed nine billion people by 2050 in a world of changing food demands is causing increasing agricultural intensification. As such, market-orientated production systems are now increasingly replacing traditional farming practices, but at what cost? The Agrarian Change project, coordinated by the Center for International Forestry Research, explores the conservation, livelihood and food security implications of land-use and agrarian change processes at the landscape scale. This book provides detailed background information on seven multi-functional landscapes in Ethiopia, Cameroon, Indonesia, Nicaragua, Bangladesh, Zambia and Burkina Faso. The focal landscapes were selected as they exhibit various scenarios of changing forest cover, agricultural modification and integration with local and global commodity markets. A standardized research protocol will allow for future comparative analyses between these sites. Each case study chapter provides a comprehensive description of the physical and socioeconomic context of each focal landscape and a structured account of the historical and political drivers of land-use change occurring in the area. Each case study also draws on contemporary information obtained from key informant interviews, focus group discussions and preliminary data collection regarding key topics of interest including: changes in forest cover and dependency on forest products, farming practices, tenure institutions, the role and presence of conservation initiatives, and major economic activities. The follow-on empirical study is already underway in the landscapes described in this book. It examines responses to agrarian change processes at household, farm, village and landscape levels with a focus on poverty levels, food security, dietary diversity and nutrition, agricultural yields, biodiversity, migration and land tenure. This research intends to provide much needed insights into how landscape-scale land-use trajectories manifest in local communities and advance understanding of multi-functional landscapes as socioecological systems.

Sovereignty, Space and Civil War in Sri Lanka Anoma Pieris,2018-10-25 Analyses of the Sri Lankan civil war (1983–2009) overwhelmingly represent it as an ethnonationalist contest, prolonging postcolonial arguments on the creation and dissolution of the incipient nation-state since independence in 1948. While colonial divide-and-rule policies, the rise of ethnonationalist lobbies, structural discrimination and majoritarian democracy have been established as grounds for inter-ethnic hostility, there are other significant transformative forces that remain largely unacknowledged in postcolonial analyses. This ambitious multiscalar spatial study of civil war in Sri Lanka offers an intersectional, de-ethnicised analysis of political sovereignty drawn out by the struggle for territory. Based on vital retrospective findings from the five-year postwar period, when wartime hostilities were still festering, it convincingly links ethnonationalism to postnational border politics, marketisation, militarised securitisation and illiberal democracy. This book argues that internecine conflict exposes the implicit violence within nation-state formations; mass human displacements heighten collective and individual ontological insecurity and neoliberalism makes the nation porous in unforeseen ways. Based around three themes – normative spaces, human mobilities and exilic states – it is organised into ten comprehensive, chapter-based explorations of a range of spatial units, including homes, cities, routes, camps and experiences of ruin that were irrevocably politicised by protracted conflict. Focusing on their material transformations over a thirty-seven-year period, the book explores what can be known of the war if we look beyond ethnicity to other salient, shared geographical features of this embattled history. The book uncovers how fealty to exclusionary cultures of political sovereignty aligns us with their violence, limiting our capacity for empathy, a boundary seemingly exacerbated by neoliberal opportunities. Making use of Sri Lanka as a case study to test geographic, architectural and urban methodologies for understanding violence, this book acts as a provocation to rethink current readings of the particular case study while reflecting on the more general impact of marketisation and militarisation in Asia. It will be of interest to an interdisciplinary audience, including those scholars interested in South Asian history, politics and civil war, South Asian studies, border studies, geography and architecture and urban studies.
