Audionarratology Jarmila Mildorf,Till Kinzel,2016-04-25 Audionarratology is a new 'postclassical' narratology that explores interfaces of sound, voice, music and narrative in different media and across disciplinary boundaries. Drawing on sound studies and transmedial narratology, audionarratology combines concepts from both while also offering fresh insights. Sound studies investigate sound in its various manifestations from disciplinary angles as varied as anthropology, history, sociology, acoustics, articulatory phonetics, musicology or sound psychology. Still, a specifically narrative focus is often missing. Narratology has broadened its scope to look at narratives from transdisciplinary and transmedial perspectives. However, there is a bias towards visual or audio-visual media such as comics and graphic novels, film, TV, hyperfiction and pictorial art. The aim of this book is to foreground the oral and aural sides of storytelling, asking how sound, voice and music support narrative structure or even assume narrative functions in their own right. It brings together cutting-edge research on forms of sound narration hitherto neglected in narratology: radio plays, audiobooks, audio guides, mobile phone theatre, performance poetry, concept albums, digital stories, computer games, songs.

Multilingual Corpora and Multilingual Corpus Analysis Thomas Schmidt,Kai Wörner,2012 This volume deals with different aspects of the creation and use of multilingual corpora. The term 'multilingual corpus' is understood in a comprehensive sense, meaning any systematic collection of empirical language data enabling linguists to carry out analyses of multilingual individuals, multilingual societies or multilingual communication. The individual contributions are thus concerned with a variety of spoken and written corpora ranging from learner and attrition corpora, language contact corpora and interpreting corpora to comparable and parallel corpora. The overarching aim of the volume is first to take stock of the variety of existing multilingual corpora, documenting possible corpus designs and uses, second to discuss methodological and technological challenges in the creation and analysis of multilingual corpora, and third to provide examples of linguistic analyses that were carried out on the basis of multilingual corpora.

Bildlichkeit im Zeitalter der Modellierung Sabine Ammon,Inge Hinterwaldner,2017 Es gibt kein Artefakt ohne Entwurfsvorgang. Wie geht dieser hochkomplexe Vorgang vonstatten? Der Band untersucht an Fallbeispielen die Rolle von Bildern und Modellen im Entwurfsprozess und an der Schwelle zur digitalen Wende.0Diese Wende scheint von einem Paradox geprägt: Der Siegeszug des Modells ist zugleich einer des Bildes, da digitale Modelle meist bildlich erschlossen werden. Bildliche Praktiken scheinen besonders geeignet, Neues zu entwerfen. In der Vorwegnahme des Zukünftigen erweisen sich diese operativen Artefakte in hohem Maße als nützlich: in der Konzeptentwicklung, Formgenese, bei der Variantenplanung und ihren Selektionsprozessen, in der Vermittlung oder der Prozesssteuerung.
