Chances are good that you've already heard about the flashy new Metro style of the Windows 8 interface. The new look may be the biggest news item you've been hearing about, but the changes in Windows 8 go far beyond the surface design changes. Windows 8 is a new program from the ground up, meaning that the experience it offers you will be much different from any version of Windows you've used before. Windows 8 is fast and fluid, bringing you the updates you need quickly, while providing reliable access to the programs and files you depend on as you go about your daily tasks. Whether you are sharing photos, checking your social media accounts, designing a presentation, or listening to your favorite podcast, Windows 8 gives you the means to move through your tasks smoothly in any order or combination you choose. Some folks welcome this kind of new energy in technology; others aren't so sure a complete makeover

is a good idea. Whichever camp you find yourself in, this book will help you learn more about what you can expect from Windows 8. Some of the biggest changes we'll discuss in this book include:

- Navigating the new Start screen, customizing Start screen colors, and displaying your favorite apps as you want them to appear

- Using touch and mouse-based techniques to personalize your Windows 8 experience and work with files, folders, and more
- Enhancing the security of your system by changing your Lock Screen, adding a picture password, and creating a PIN logon
- Learning to work fluidly with open apps, cycling through open apps, docking apps, and closing or suspending apps you no longer need
- Using the Refresh and Reset tools to give your computer a fresh start if you're having computer problems
- Shopping for apps in the Windows Store, installing apps on your computer, and adding ratings and reviews to let other shoppers know what you think
- Browsing with the sleek and streamlined Internet Explorer 10

Serena Ron Rash,2008-10-07 Penned by an award-winning writer, this Gothic tale of greed, corruption, and revenge is set against the backdrop of the 1930s wilderness and America's burgeoning environmental movement.

**Hit Squad** James Heneghan,2003-09 Students in an upscale high school decide to take on the bullies and take back their school, with decidedly mixed consequences.

A wealthy, notorious womanizer, he is captivated by a mysterious young Englishwoman, Helene Craig, and knows that she is the woman he has been searching for all his life. *Shakespeare Stories* Leon Garfield, William Shakespeare, 1985 By skillfully weaving his own prose with Shakespeare's language, Leon Garfield has refashioned twelve of the Elizabethan playwright's most memorable dramas into stories, capturing all the richness of the characters, plot, mood, and setting. This format will delight both those who know the great dramatist's works and those who are new to them. Michael Foreman's dramatic color illustrations and varied black-and-white line drawings are the perfect complement to this celebration of Shakespeare's genius.

**The Poetry Teatime Companion** Julie Bogart, Nancy Graham, 2016-04-30 A collection of public domain poems and images to celebrate the practice of poetry teatime with children.

*Digital Archaeology* Thomas Laurence Evans, Patrick T. Daly, 2006 The authors address how digital technologies have been and can be incorporated within different aspects of archaeology and

heritage management. They aim to stimulate widespread thought and debate on how IT can be holistically integrated into the study of past cultures.

**Planned Obsolescence** Kathleen Fitzpatrick, 2011 Academic institutions are facing a crisis in scholarly publishing at multiple levels: presses are stressed as never before, library budgets are squeezed, faculty are having difficulty publishing their work, and promotion and tenure committees are facing a range of new ways of working without a clear sense of how to understand and evaluate them. *Planned Obsolescence* is both a provocation to think more broadly about the academy's future and an argument for re-conceiving that future in more communally-oriented ways. Facing these issues head-on, Kathleen Fitzpatrick focuses on the technological changes especially greater utilization of internet publication technologies, including digital archives, social networking tools, and multimedia necessary to allow academic publishing to thrive into the future. But she goes further, insisting that the key issues that must be addressed are social and institutional in origin. Confronting a change-averse academy, she insists that before we can successfully change the systems through which we disseminate

research, scholars must re-evaluate their ways of working; how they research, write, and review; while administrators must reconsider the purposes of publishing and the role it plays within the university. Springing from original research as well as Fitzpatrick's own hands-on experiments in new modes of scholarly communication through MediaCommons, the digital scholarly network she co-founded, *Planned Obsolescence* explores all of these aspects of scholarly work, as well as issues surrounding the preservation of digital scholarship and the place of publishing within the structure of the contemporary university. Written in an approachable style designed to bring administrators and scholars into a conversation, *Planned Obsolescence* explores both symptom and cure to ensure that scholarly communication will remain vibrant and relevant in the digital future.

about the future of data in higher education, *Debates in the Digital Humanities 2019* brings together a broad array of important, thought-provoking perspectives on the field's many sides. With a wide range of subjects including gender-based assumptions made by algorithms, the place of the digital humanities within art history, data-based methods for exhuming forgotten histories, video games, three-dimensional printing, and decolonial work, this book assembles a who's who of the field in more than thirty impactful essays. **Reading Machines** Stephen Ramsay, 2011-12-01 Besides familiar and now-commonplace tasks that computers do all the time, what else are they capable of? Stephen Ramsay's intriguing study of computational text analysis examines how computers can be used as reading machines to open up entirely new possibilities for literary critics. Computer-based text analysis has been employed for the past several decades as a way of searching, collating, and indexing texts. Despite this, the digital revolution has not penetrated the core activity of literary studies: interpretive analysis of written texts. Computers can handle vast amounts of data, allowing for the comparison of texts in ways that were previously too overwhelming for individuals, but they may also assist in enhancing the entirely necessary role of subjectivity in critical interpretation. *Reading Machines* discusses the importance of this new form of text analysis conducted with the assistance of computers. Ramsay suggests that the rigidity of computation can be enlisted in the project of intuition, subjectivity, and play.

Mobilizing the Past for a Digital Future Erin Walcek Averett, Jody Michael Gordon, Derek B Counts, 2016-10-19 *Mobilizing the Past* is a collection of 20 articles that explore the use and impact of

mobile digital technology in archaeological field practice. The detailed case studies present in this volume range from drones in the Andes to iPads at Pompeii, digital workflows in the American Southwest, and examples of how bespoke, DIY, and commercial software provide solutions and craft novel challenges for field archaeologists. The range of projects and contexts ensures that *Mobilizing the Past for a Digital Future* is far more than a state-of-the-field manual or technical handbook. Instead, the contributors embrace the growing spirit of critique present in digital archaeology. This critical edge, backed by real projects, systems, and experiences, gives the book lasting value as both a glimpse into present practices as well as the anxieties and enthusiasm associated with the most recent generation of mobile digital tools. This book emerged from a workshop funded by the National Endowment for the Humanities held in 2015 at Wentworth Institute of Technology in Boston. The workshop brought together over 20 leading practitioners of digital archaeology in the U.S. for a weekend of conversation. The papers in this volume reflect the discussions at this workshop with significant additional content. Starting with an expansive introduction and concluding with a series of

reflective papers, this volume illustrates how tablets, connectivity, sophisticated software, and powerful computers have transformed field practices and offer potential for a radically transformed discipline.

*The Language of Less* Michael Darling, David Raskin, 2011 This book accompanies an exhibition at MCA Chicago inspired by the museum's rich holdings of Minimalist and post-Minimalist art of the 60s and 70s. These are complemented by works from a younger generation of artists, such as Leonor Antunes, Carole Bove, Jason Dodge, Gedi Sibony and Oscar Tuazon. 0Exhibition: Museum of Contemporary Art, Chicago, USA (2011 and 2012). 0.
