The French Book Trade in Enlightenment Europe II Simon Burrows, 2018-08-09 This is a rich and path-breaking comparative study of reading tastes in the final years of old regime Europe. Based on extensive research in the account books of the Swiss publishers, the Société Typographique de Neuchâtel (STN), and related archives, it charts the dissemination of literature and reading tastes across Europe in the years leading up to the French revolution. In the process, it recasts our understanding of late 18th-century print culture and the contours of the enlightenment. The fruit of a widely acclaimed five year database project, the STN database, it is also a story of pioneering efforts to apply the latest digital technology and GIS mapping techniques to traditional historical and bibliographic problems. Although written to serve as a standalone study, this book is ideally complemented by its companion volume, Mark Curran's *The French Book Trade in Enlightenment Europe I: Selling Enlightenment*, which offers a radical reinterpretation of the structure and practices of the European book trade. The STN database is now recognised as a cutting-edge digital project of global significance. Robert Darnton has called it a prodigious accomplishment and a joy to use while Jeremy Popkin adds, No one working in the field of French Enlightenment studies ... can afford to ignore the rich mine of data

that Simon Burrows and his collaborators have made accessible, in an eminently usable form, and the new possibilities it opens up for scholars. The French Book Trade in Enlightenment Europe I and II offer a roadmap of that data and what it can show us.

Stratospheric Ozone Depletion and Climate Change Rolf Müller (physicien.), 2012 In recent years, several new concepts have emerged in the field of stratospheric ozone depletion, creating a need for a concise in-depth publication covering the ozone-climate issue. This monograph fills that void in the literature and gives detailed treatment of recent advances in the field of stratospheric ozone depletion. It puts particular emphasis on the coupling between changes in the ozone layer and atmospheric change caused by a changing climate. The book, written by leading experts in the field, brings the reader the most recent research in this area and fills the gap between advanced textbooks and assessments.

**After the Sands** Gordon Laxer,2015-10-03 After the Sands outlines a vision and a road map to transitioning Canada to a low-carbon society. Despite its oil abundance, with no strategic reserves, Canada is woefully unprepared for the next global oil supply crisis. There's no good reason for Canadians to use much more oil per capita than people in other sparsely populated, northern countries like Norway, Finland and Sweden—nations that use 27 to 39 percent less oil per person. In *After the Sands*, Alberta-based political economist Gordon Laxer proposes a bold strategy of deep conservation and a Canada-first perspective to ensure that all Canadians have sufficient energy at affordable prices. The most achievable way to gain energy security is to supply Canadians with their own oil, natural gas and renewable energy. And the best way to cut carbon emissions is by phasing out Canada's role as a carbon-fuel exporter. Canada has all the oil, gas and coal needed to transition to a low-carbon future. Remarkable hydro power resources give Canadians a large base of renewable energy, which can be expanded with wind, solar, geothermal and biomass. Few countries have these options in adequate quantities. But, as Laxer argues, Canada will not get there until we overcome the power of vested interests and untangle the trade agreements that block Canadians from secure and fair access to the nation's own energy resources. Impeccably researched, *After the Sands* is critical reading for anyone concerned with climate change and the future of Canada.

**The Betrayal of the Powerless** Frederick Aprim,2021-02-24 The indigenous Assyrians, Yezidis and the other smaller groups in Iraq were jubilant listening to U.S. President Bush explain the

objectives behind the 2003 war on Iraq, promising to end the oppressive regime of Saddam Hussein and securing freedom for all Iraqi people, regardless of their ethnicity or religious belief. It did not take long before the Assyrians began witnessing a genocide and yet another betrayal (the first was that promise made by of the British post World War I) when the U.S. deserted the indigenous Assyrians and Yezidis and surrendered to the demands of the Shi'a Arabs and the Kurds. The continuous attacks on the Christians in Iraq and bombing of churches started in 2004 and intensified through 2011. In 2014, ISIS invaded the Assyrian and Yezidi towns in northern Iraq and caused a new tragedy and genocide while the Kurds and Shi'a strengthened their positions in the new Iraq.

*Uniting of Europe* Ernst B. Haas, Ernst Haas, Dr, 2020-11-15 The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the power to redirect the loyalties and expectations of political actors. In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a united Europe took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and

historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.
