Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

International Standard Classification of Occupations International Labour Office, 2012 The International Standard Classification of Occupations 2008 (ISCO-08) is a four-level hierarchically structured classification that covers all jobs in the world. Developed with the benefit of accumulated national and international experience as well as the help of experts from many countries and agencies, ISCO-08 is fully supported by the international community as an accepted standard for international labour statistics. ISCO-08 classifies jobs into 436 unit groups. These unit groups are aggregated into 130 minor groups, 43 sub-major groups and 10 major groups, based on their similarity in terms of the skill level and skill specialisation required for the jobs. This allows the production of relatively detailed internationally comparable data as well as summary information for only 10 groups at the highest level of aggregation. Each group in the classification is designated by a title and code number and is associated with a definition that specifies the scope of the group. The classification is divided into two volumes: Volume I presents the structure and definitions of all groups in ISCO-08 and their correspondence with ISCO-88, which it supersedes, while Volume II provides an updated and expanded index of occupational titles and associated ISCO-08 and ISCO-88 codes.

Manual on the Measurement of Volunteer Work International Labour Office, 2011 Intended as a guide for countries in generating systematic and comparable data on volunteer work by means of regular supplements to labour force or other household surveys. The objective is to make available comparative cross-national data on a significant form of work which is growing in importance but is often ignored or rarely captured in traditional economic statistics in order to establish the economic value of volunteering.

International Contracting Larry A. DiMatteo, 2021-11-05 For well over a decade, this prized guide has served practitioners handling the legal ramifications of international contracting projects. The fifth edition expands on issues discussed in the earlier one, along with new topics that continue to redefine the researching, drafting, and execution of international contracts. All the invaluable features of earlier editions are of course still here, including analysis of key contract issues unique to various types of contracting, common contract clauses, contract checklists, insights gleaned from actual cases and arbitral proceedings, and clear explanation of the principles of good contract drafting. The major relevant international conventions, model laws, pertinent national laws, legal guides, and other documents and instruments are all covered, with primary texts provided in the appendices. Some of the new issues and topics covered include: new potential causes of force majeure and hardship (pandemics and BREXIT); review of Incoterms 2020; new clauses covered (anti-slavery, exclusion, interpretation, no-waiver, sub-contracting, sustainability clauses, among others); rise of new international commercial courts; legaltech, smart contracts, and artificial intelligence; ethics; implementation of technology in legal practice; enforceability of penalty clauses; Internet sales and agency contracts; long-term contracts and goodwill compensation; data protection and the General Data Protection Regulation (GDPR); alliance, collaboration, and cooperation agreements; noncompete and nonsolicitation clauses; e-mail disclaimers; and separation and release agreements. The book acts as a single-volume reference in the negotiating and drafting of international contracts and offers expert insights regarding the reasonableness of many contract clauses and the likelihood of their enforcement in a foreign jurisdiction. An adroit combination of contract theory and contract practice, the book continues to provide guidance to law practitioners and students alike. “International Contracting is an excellent single volume reference that highlights the different issues relating to a variety of contracts. I recommend it to drafting attorneys writing domestic as well as transborder contracts.” – Christopher E. Howard (complex commercial transactions and development projects), Managing Partner, Pierce Atwood LLP, Portland, Maine “The latest edition of Professor DiMatteo's International Contracting constitutes a broad yet detailed coverage of international contract law and laws, as well as international practice. It drills down into the level of detail that supplies invaluable practical guidance of the sort not to be found in other publications.” – Professor Michael G. Bridge, London School of Economics “International Contracting is an ideal source for practitioners whether of the civil or common law. It also provides a concise review of international contracting issues and practices for the scholar and student interested in this area of law. I highly recommend it as a general resource on the topic.” – Michel Cannarsa, Dean & Professor, Lyon Catholic University

Trade Governance in the Digital Age Mira Burri, Thomas Cottier, 2012-05-21 The development of new digital technologies has resulted in significant transformations in daily life, from the arrival of online shopping to more fundamental changes in the ways we work and communicate. Many of these changes raise questions that transcend market access and liberalisation, and demand cooperation and coherent regulatory design. International trade regulation has hitherto not reacted in a forward-looking manner to the digital revolution and, particularly at the multilateral level, legal engineering has yielded few tangible results. This book examines whether WTO laws possess the necessary flexibility and resilience to accommodate the changes brought about by burgeoning digital trade. By revealing both the potential and the limitations of the WTO framework, it provides a broad picture of the interaction between digital technologies and trade regulation, links the often disconnected discourses of international trade law, intellectual property and cyberlaw and explores discrete problems in different domains of global trade regulation.

Calcium Orthophosphates Sergey V. Dorozhkin, 2012-06-04 Due to a great chemical similarity with the biological calcified tissues, many calcium orthophosphates possess remarkable biocompatibility and bioactivity. Materials scientists use this property extensively to construct artificial bone grafts that are either entirely made of or only surface-coated with the biologically relevant calcium orthophosphates. Porous scaffolds made of calcium orthophosphates are very promising tools for tissue engineering applications. A comprehensive overview of calcium orthophosphates, this book highlights their importance and biomedical uses.

Mastering Purchasing Management for Inbound Supply Chains Thomas A. Cook, 2016-04-19 Importing finished products, components, and raw materials has become the status quo in today's increasingly competitive business landscape. The lessons of inbound supply, however, can be very costly if learned through a trial-and-error approach—especially foreign purchasing. By not understanding the parameters of landed costs alone, purchasing managers can cause serious and expensive disruptions to their supply chain. Leaving little to chance, Mastering Purchasing Management for Inbound Supply Chains details the fundamentals regarding logistics and compliance. It emphasizes the importance of bonded warehouses and cost modeling and presents case studies from a wide range of industries that illustrate best practices in imports, logistics, and landed cost modeling. International trade expert Thomas Cook provides valuable insights for avoiding common foreign trade zone pitfalls. He also explains the best ways to handle and minimize landed costs, including duties, shipping costs, and transfer pricing. This comprehensive purchasing guide covers the potential risks and complications involved with U.S. Customs (CBP), freight, INCO terms, and title and payment issues. Complete with a multitude of references to additional information in print and on the Web, the text provides the well-rounded understanding needed to avoid costly mistakes and make purchasing one of the strongest links in your global supply chain.

Challenges in Cybersecurity and Privacy - the European Research Landscape Jorge Bernal Bernabe, Antonio Skarmeta, 2022-09-01 Cybersecurity and Privacy issues are becoming an important barrier for a trusted and dependable global digital society development. Cyber-criminals are continuously shifting their cyber-attacks specially against cyber-physical systems and IoT, since they present additional vulnerabilities due to their constrained capabilities, their unattended nature and the usage of potential untrustworthiness components. Likewise, identity-theft, fraud, personal data leakages, and other related cyber-crimes are continuously evolving, causing

important damages and privacy problems for European citizens in both virtual and physical scenarios. In this context, new holistic approaches, methodologies, techniques and tools are needed to cope with those issues, and mitigate cyberattacks, by employing novel cyber-situational awareness frameworks, risk analysis and modeling, threat intelligent systems, cyber-threat information sharing methods, advanced big-data analysis techniques as well as exploiting the benefits from latest technologies such as SDN/NFV and Cloud systems. In addition, novel privacy-preserving techniques, and crypto-privacy mechanisms, identity and eID management systems, trust services, and recommendations are needed to protect citizens' privacy while keeping usability levels. The European Commission is addressing the challenge through different means, including the Horizon 2020 Research and Innovation program, thereby financing innovative projects that can cope with the increasing cyberthreat landscape. This book introduces several cybersecurity and privacy research challenges and how they are being addressed in the scope of 15 European research projects. Each chapter is dedicated to a different funded European Research project, which aims to cope with digital security and privacy aspects, risks, threats and cybersecurity issues from a different perspective. Each chapter includes the project's overviews and objectives, the particular challenges they are covering, research achievements on security and privacy, as well as the techniques, outcomes, and evaluations accomplished in the scope of the EU project. The book is the result of a collaborative effort among relative ongoing European Research projects in the field of privacy and security as well as related cybersecurity fields, and it is intended to explain how these projects meet the main cybersecurity and privacy challenges faced in Europe. Namely, the EU projects analyzed in the book are: ANASTACIA, SAINT, YAKSHA, FORTIKA, CYBECO, SISSDEN, CIPSEC, CS-AWARE. RED-Alert, Truessec.eu. ARIES, LIGHTest, CREDENTIAL, FutureTrust, LEPS. Challenges in Cybersecurity and Privacy - the European Research Landscape is ideal for personnel in computer/communication industries as well as academic staff and master/research students in computer science and communications networks interested in learning about cyber-security and privacy aspects.
