EGirls, ECitizens Valerie Steeves,Jane Bailey,2015-04-23 eGirls, eCitizens is a landmark work that explores the many forces that shape girls' and young women's experiences of privacy, identity, and equality in our digitally networked society. Drawing on the multi-disciplinary expertise of a remarkable team of leading Canadian and international scholars, as well as Canada's foremost digital literacy organization, MediaSmarts, this collection presents the complex realities of digitized communications for girls and young women as revealed through the findings of The eGirls Project (www.egirlsproject.ca) and other important research initiatives. Aimed at moving dialogues on scholarship and policy around girls and technology away from established binaries of good vs bad, or risk vs opportunity, these seminal contributions explore the interplay of factors that shape online environments characterized by a gendered gaze and too often punctuated by sexualized violence. Perhaps most importantly, this collection offers first-hand perspectives collected from girls and young women themselves, providing a unique window on what it is to be a girl in today's digitized society.

*Vulnerable* Colleen M. Flood,Vanessa MacDonnell,Jane Philpott,Sophie Th riault,Sridhar Venkatapuram,2020-07-14 The novel coronavirus SARS-CoV-2, which causes the disease known as COVID-19, has infected people in 212 countries so far and on every continent except Antarctica. Vast changes to our home lives, social interactions, government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited, multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences, along with the legal, ethical and policy responses. These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance and legal structures; and vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will forces us to deeply reflect on how we govern and our policy priorities; to focus preparedness, precaution, and recovery to include all, not just some. Published in English with some chapters in French.

The Work Ahead EDWARD. TAYLOR-KALE ALDEN (LAURA.),Laura Taylor-Kale,2018-04-10 The world is in the midst of a transformation in the nature of work, as smart machines, artificial intelligence, new technologies, and global competition remake how people do their jobs and pursue their careers. The Work Ahead focuses on how to rebuild the links among work, opportunity, and economic security for all Americans.

**The Victory at Sea** William Sowden Sims,Burton J. Hendrick,2024-01-18 This 1921 Pulitzer Prize awarded history has been written in response to a demand for some account of the generally very misunderstood German submarine campaign in the World War I and particularly of the means by which it was defeated. The interest of the public in such a story is due to the fact that during the war the sea forces were compelled to take all possible precautions to keep the enemy from learning anything about the various devices and means used to oppose or destroy the underwater craft. Contents: When Germany Was Winning the War The Return of the Mayflower The Adoption of the Convoy American Destroyers in Action Decoying Submarines to Destruction American College Boys and Subchasers The London Flagship Submarine Against Submarine The American Mine Barrage in the North Sea German Submarines Visit the American Coast Fighting Submarines from the Air The Navy Fighting on the Land Transporting Two Million American Soldiers to France

**Is Two-Tier Health Care the Future?** Colleen M. Flood,Bryan Thomas,2020-04-28 Canadians are deeply worried about wait times for health care. Entrepreneurial doctors and private clinics are bringing Charter challenges to existing laws restrictive of a two-tier system. They argue that Canada is an outlier among developed countries in limiting options to jump the queue. This book explores whether a two-tier model is a solution. In *Is Two-Tier Health Care the Future?*, leading researchers explore the public and private mix in Canada, Australia, Germany, France, and Ireland. They explain the history and complexity of interactions between public and private funding of health care and the many regulations and policies found in different countries used to both inhibit and sometimes to encourage two-tier care, such as tax breaks. This edited collection provides critical evidence on the different approaches to regulating two-tier care across different countries and what could work in Canada. This book is published in English.

**China's Business Reforms** Russell Smyth,On Kit Tam,Malcolm Warner,Cherrie Jihua Zhu,2004-11-10 This book examines the key areas, all of which are linked, where China is grappling with institutional reforms as it opens up to the outside world.

*Life, Fish and Mangroves* Melissa Marschke,2012-01-28 In *Life, Fish and Mangroves*, Melissa Marschke explores the potential of resource governance, offering a case study of resource-dependent village life. Following six households and one village-based institution in coastal Cambodia over a twelve-year period, Marschke reveals the opportunities and constraints facing villagers and illustrates why local resource management practices remain delicate, even with a sustained effort. She highlights how government and business interests in community-based management and resource exploitation combine to produce a complex, highly uncertain dynamic. With this instructive study, she demonstrates that in spite of a significant effort, spanning many years and engaging many players, resource governance remains fragile and coastal livelihoods in Cambodia remain precarious.

*Barometers of Quality of Life Around the Globe* Valerie M ller,Denis Huschka,Alex C. Michalos,2008-09-16 Quality of life (QOL) research has made great strides since the social indicator movement started as a scientific enterprise in the 1960s. Following the lead of pioneers in North America and Europe, social scientists in other regions of the world have adopted and refined social data systems or barometers to monitor progress in enhancing the welfare and well-being of citizens. A distinctive feature of these barometers is that they measure both individual and societal quality of life. While not overlooking the more basic needs and material standards of

living, the barometers also inform on issues of individual freedoms and choices and constraints on citizen empowerment that enhance and depress quality of life. Designed to capture nuances in local definitions of the good life, regional barometers are unique expressions of the obstacles facing different societies in their quest to achieve the good life. Scholars of public policy as well as policy makers will find inspiration from reviews of innovative initiatives to monitor contemporary quality of life in six regions of the world spanning South America, the Arctic, Europe, Africa, Asia, and Australia.

**Law and the "Sharing Economy"** Derek McKee, Finn Makela, Teresa Scassa, 2018-11-27 Controversy shrouds sharing economy platforms. It stems partially from the platforms' economic impact, which is felt most acutely in certain sectors: Uber drivers compete with taxi drivers; Airbnb hosts compete with hotels. Other consequences lie elsewhere: Uber is associated with a trend toward low-paying, precarious work, whereas Airbnb is accused of exacerbating real estate speculation and raising the cost of long-term rental housing. While governments in some jurisdictions have attempted to rein in the platforms, technology has enabled such companies to bypass conventional regulatory categories, generating accusations of "unfair competition" as well as debates about the merits of existing regulatory regimes. Indeed, the platforms blur a number of familiar distinctions, including personal versus commercial activity; infrastructure versus content; contractual autonomy versus hierarchical control. These ambiguities can stymie legal regimes that rely on these distinctions as organizing principles, including those relating to labour, competition, tax, insurance, information, the prohibition of discrimination, as well as specialized sectoral regulation. This book is organized around five themes: technologies of regulation; regulating technology; the sites of regulation (local to global); regulating markets; and regulating labour. Together, the chapters offer a rich variety of insights on the regulation of the sharing economy, both in terms of the traditional areas of law they bring to bear, and the theoretical perspectives that inform their analysis. Published in English.

**America's Kindergartners** Jerry West, Elvie Germino-Hausken, 2000-08 In the fall of 1998, about 4 million children were attending kindergarten in the U.S., approximately 95% of them for the first time. This report presents the first findings from a new national study of kindergartners, their schools, classrooms, teachers and families. The Early Childhood Longitudinal Study, Kindergarten Class of 1998-99 (ECLS-K), sponsored by the U.S. Dept. of Education, Nat. Center for Education Statistics, began following a nationally representative sample of some 22,000 kindergartners in the fall of 1998. The ECLS-K will follow the same cohort of children from their entry to kindergarten through their fifth grade year.

**Human Rights in the Age of Platforms** Rikke Frank Jorgensen, 2019-11-19 Scholars from across law and internet and media studies examine the human rights implications of today's platform society. Today such companies as Apple, Facebook, Google, Microsoft, and Twitter play an increasingly important role in how users form and express opinions, encounter information, debate, disagree, mobilize, and maintain their privacy. What are the human rights implications of an online domain managed by privately owned platforms? According to the Guiding Principles on Business and Human Rights, adopted by the UN Human Right Council in 2011, businesses have a responsibility to respect human rights and to carry out human rights due diligence. But this goal is dependent on the willingness of states to encode such norms into business regulations and of companies to comply. In this volume, contributors from across law and internet and media studies examine the state of human rights in today's platform society. The contributors consider the "datafication" of society, including the economic model of data extraction and the conceptualization of privacy. They examine online advertising, content moderation, corporate storytelling around human rights, and other platform practices. Finally, they discuss the relationship between human rights law and private actors, addressing such issues as private companies' human rights responsibilities and content regulation. Contributors Anja Bechmann, Fernando Bermejo, Agnès Callamard, Mikkel Flyverbom, Rikke Frank Jørgensen, Molly K. Land, Tarlach McGonagle, Jens-Erik Mai, Joris van Hoboken, Glen Whelan, Jillian C. York, Shoshana Zuboff, Ethan Zuckerman Open access edition published with generous support from Knowledge Unlatched and the Danish Council for Independent Research.
