EGirls, ECitizens Valerie Steeves,Jane Bailey,2015-04-23 eGirls, eCitizens is a landmark work that explores the many forces that shape girls' and young women's experiences of privacy, identity, and equality in our digitally networked society. Drawing on the multi-disciplinary expertise of a remarkable team of leading Canadian and international scholars, as well as Canada's foremost digital literacy organization, MediaSmarts, this collection presents the complex realities of digitized communications for girls and young women as revealed through the findings of The eGirls Project ([www.egirlsproject.ca](http://www.egirlsproject.ca)) and other important research initiatives. Aimed at moving dialogues on scholarship and policy around girls and technology away from established binaries of good vs bad, or risk vs opportunity, these seminal contributions explore the interplay of factors that shape online environments characterized by a gendered gaze and too often punctuated by sexualized violence. Perhaps most importantly, this collection offers first-hand perspectives collected from girls and young women themselves, providing a unique window on what it is to be a girl in today's digitized society.

Vulnerable Colleen M. Flood,Vanessa MacDonnell,Jane Philpott,Sophie Th  riault,Sridhar Venkatapuram,2020-07-14 The novel coronavirus SARS-CoV-2, which causes the disease known as COVID-19, has infected people in 212 countries so far and on every continent except Antarctica. Vast changes to our home lives, social interactions, government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited, multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences, along with the legal, ethical and policy responses. These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance and legal structures; and vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will forces us to deeply reflect on how we govern and our policy priorities; to focus preparedness, precaution, and recovery to include all, not just some. Published in English with some chapters in French.

**The Victory at Sea** William Sowden Sims,Burton J. Hendrick,2024-01-18 This 1921 Pulitzer Prize awarded history has been written in response to a demand for some account of the generally very misunderstood German submarine campaign in the World War I and particularly of the means by which it was defeated. The interest of the public in such a story is due to the fact that during the war the sea forces were compelled to take all possible precautions to keep the enemy from learning anything about the various devices and means used to oppose or destroy the under-water craft. Contents: When Germany Was Winning the War The Return of the Mayflower The Adoption of the Convoy American Destroyers in Action Decoying Submarines to Destruction American College Boys and Subchasers The London Flagship Submarine Against Submarine The American Mine Barrage in the North Sea German Submarines Visit the American Coast Fighting Submarines from the Air The Navy Fighting on the Land Transporting Two Million American Soldiers to France

**Is Two-Tier Health Care the Future?** Colleen M. Flood,Bryan Thomas,2020-04-28 Canadians are deeply worried about wait times for health care. Entrepreneurial doctors and private clinics are bringing Charter challenges to existing laws restrictive of a two-tier system. They argue that Canada is an outlier among developed countries in limiting options to jump the queue. This book explores whether a two-tier model is a solution. In *Is Two-Tier Health Care the Future?*, leading researchers explore the public and private mix in Canada, Australia, Germany, France, and Ireland. They explain the history and complexity of interactions between public and private funding of health care and the many regulations and policies found in different countries used to both inhibit and sometimes to encourage two-tier care, such as tax breaks. This edited collection provides critical evidence on the different approaches to regulating two-tier care across different countries and what could work in Canada. This book is published in English.

*Human Rights in the Age of Platforms* Rikke Frank Jorgensen,2019-11-19 Scholars from across law and internet and media studies examine the human rights implications of today's platform society. Today such companies as Apple, Facebook, Google, Microsoft, and Twitter play an increasingly important role in how users form and express opinions, encounter information, debate, disagree, mobilize, and maintain their privacy. What are the human rights implications of an online domain managed by privately owned platforms? According to the Guiding Principles on Business and Human Rights, adopted by the UN Human Right Council in 2011, businesses have a responsibility to respect human rights and to carry out human rights due diligence. But this goal is dependent on the willingness of states to encode such norms into business regulations and of companies to comply. In this volume, contributors from across law and internet and media studies examine the state of human rights in today's platform society. The contributors consider the "datafication" of society, including the economic model of data extraction and the conceptualization of privacy. They examine online advertising, content moderation, corporate storytelling around human rights, and other platform practices. Finally, they discuss the relationship between human rights law and private actors, addressing such issues as private companies' human rights responsibilities and content regulation. Contributors Anja Bechmann, Fernando Bermejo, Agn  s Callamard, Mikkel Flyverbom, Rikke Frank J  rgensen, Molly K. Land, Tarlach McGonagle, Jens-Erik Mai, Joris van Hoboken, Glen Whelan, Jillian C. York, Shoshana Zuboff, Ethan Zuckerman Open access edition published with generous support from Knowledge Unlatched and the Danish Council for Independent Research.

This report presents the first findings from a new national study of kindergartners, their schools, classrooms, teachers and families. The Early Childhood Longitudinal Study, Kindergarten Class of 1998-99 (ECLS-K), sponsored by the U.S. Dept. of Education, Nat. Center for Education Statistics, began following a nationally representative sample of some 22,000 kindergartners in the fall of 1998. *The Securitization of Migration* Philippe Bourbeau,2011-03-23 This book examines the process integrating international migration into security frameworks that emphasize policing and defence in Canada and France. It also describes how the concepts of power underlying security frameworks affect the treatment of migrants and immigrants. This book is one of the first to systematically and comparatively examine the role of political agents, media agents, and contextual factors in the process of securitizing migration.

**An Analysis of Marijuana Policy** National Research Council (U.S.). Committee on Substance Abuse and Habitual Behavior,1982-01-01 Defenders of marijuana use may seize on the ambiguity or absence of evidence for such damage and ignore any other effects on education or safety; those opposed to marijuana use may emphasize the possibility of chronic disease that is suggested by some laboratory findings and ignore the social, political, and economic costs of fighting a well-established custom. The Committee wishes to make clear what it regards as the limits of this report for the selection of policy alternatives. Scientific judgment can estimate the prevalence of different kinds of use, risks to health, economic costs, and the like under current policies and can try to project such estimates for new policies. It can come to some conclusions based on those estimates. But selection of an alternative is always a value-governed choice, which can ultimately be made only by the political process.
