**Wisconsin Sentencing in the Tough-on-Crime Era** Michael O'Hear, 2017-01-17

The dramatic increase in U.S. prison populations since the 1970s is often blamed on mandatory sentencing laws, but this case study of a state with judicial discretion in sentencing reveals that other significant factors influence high incarceration rates.

The Instructions of Gampopa Khenpo Karthar Rinpoche, 1996-01-01 Khenpo Karthar Rinpoche delivers profound insights in direct and inspiring language. In this commentary on the Precious Garland, one of Gampopa's masterworks, he outlines what practitioners of varying levels need to know to perfect their spiritual practice. He instructs on the correct view, meditation, and conduct, and offers frank answers to common questions concerning obstacles to Dharma practice. Gampopa (1070–1153) was the father of the Kagyu tradition and foremost student of Milarepa.

The Use of Force in International Law Tom Ruys, Olivier Corten, Alexandra Hofer, 2018-04-26 The international law on the use of force is one of the oldest branches of international law. It is an area twinned with the emergence of international law as a concept in itself, and which sees law and politics collide. The number of armed conflicts is equal only to the number of methodological approaches used to describe them. Many violent encounters are well known. The Kosovo Crisis in 1999 and the US-led invasion of Iraq in 2003 spring easily to the minds of most scholars and academics, and gain extensive coverage in this text. Other conflicts, including the Belgian operation in Stanleyville, and the Ethiopian Intervention in Somalia, are often overlooked to our peril. Ruys and Corten's expert-written text compares over sixty different instances of the use of cross border force since the adoption of the UN Charter in 1945, from all out warfare to hostile encounters between individual units, targeted killings, and hostage rescue operations, to ask a complex question. How much authority does the power of precedent really have in the law of the use of force?

International Law and the Classification of Conflicts Elizabeth Wilmschurst, 2012-08-02 This book comprises contributions by leading experts in the field of international humanitarian law on the subject of the categorisation or classification of armed conflict. It is divided into two sections: the first aims to provide the reader with a sound understanding of

the legal questions surrounding the classification of hostilities and its consequences; the second includes ten case studies that examine practice in respect of classification. Understanding how classification operates in theory and practice is a precursor to identifying the relevant rules that govern parties to hostilities. With changing forms of armed conflict which may involve multi-national operations, transnational armed groups and organized criminal gangs, the need for clarity of the law is all-important. The case studies selected for analysis are Northern Ireland, DRC, Colombia, Afghanistan (from 2001), Gaza, South Ossetia, Iraq (from 2003), Lebanon (2006), the so-called war against Al-Qaeda, and future trends. The studies explore the legal consequences of classification particularly in respect of the use of force, detention in armed conflict, and the relationship between human rights law and international humanitarian law. The practice identified in the case studies allows the final chapter to draw conclusions as to the state of the law on classification.

**The Making of Lebanese Foreign Policy** Henrietta Wilkins, 2013-05-29 Seeking to explain Lebanon's behavior in the international arena during the 2006 war between Hezbollah and Israel, this book offers a critique of both systemic and sub state factors in determining foreign policy decisions. The Making of Lebanese Foreign Policy illustrates how systemic theories are limited in terms of explaining foreign policy decisions because they largely ignore the role of internal, or sub state, factors. Within Lebanon, foreign policy is

split between the interests of different internal Lebanese groups working in alliance with external actors. The competing interests of these internal groups compromise the cohesion of the Lebanese state and its capacity to promote its own interests above those of the different internal groups. The example of Lebanon during the 2006 war thus demonstrates the importance of these sub state factors in influencing state behaviour on an international level. Arguing that a more pluralistic approach is necessary in order to understand the conditions that affect the foreign policy making of the Lebanese state, this book fills an important gap in the literature on the topic and will be of interest to students of International Relations, Middle East Studies and Islamic Studies amongst others.

**Transportation Decision Making** Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an

economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs. Evaluating a project's impact on economic development and land use as well as its impact on society and culture. Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics. Evaluating alternative projects on the basis of multiple performance criteria. Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals. Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decision making. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

**Hit Songs, 1900-1955** Don Tyler,2007-04-02 This is a chronology of the most famous songs from the years before rock 'n' roll. The top hits for each year are described, including vital information such as song origin, artist(s), and chart information. For many songs, the author includes any web or library holdings of sheet music covers, musical scores, and free audio files. An extensive collection of biographical sketches follows, providing performing credits, relevant professional awards, and brief biographies for hundreds of the era's most popular performers, lyricists, and composers. Includes an alphabetical song index and bibliography.

**The International Court of Justice and Self-Defence in International Law** James A. Green,2009-07-30 The legal rules governing the use of force between States are one of the most fundamental, and the most controversial, aspects of international law. An essential part of this subject is the question of when, and to what extent, a State may lawfully use force against another in self-defence. However, the parameters of this inherent right remain obscure, despite the best efforts of scholars and, notably, the International Court of Justice. This book examines the burgeoning relationship between the ICJ and the right of self-defence. Since 2003 there have been three major decisions of the ICJ that have dealt directly with the law governing self-defence actions, in contrast to only two such cases in the preceding fifty years. This, then, is an opportune moment to reconsider the jurisprudence of the

Court on this issue. This book is the first of its kind to comprehensively draw together and then assess the merits of this jurisprudence. It argues that the contribution of the ICJ has been confused and unhelpful, and compounds inadequacies in existing customary international law. The ICJ's fundamental conception of a primary criterion of 'armed attack' as constituting a qualitatively grave use of force is brought into question. The book then goes on to examine the underlying causes of the problems that have emerged in the jurisprudence on this crucial issue. Winner of the American Society of International Law's Lieber Society Book Prize 2009 Dr Green's monograph demonstrates a thorough understanding of the law of self-defence, coupled with an informed and evaluative discussion of the role and function of the International Court. It is an impressive analysis of the International Court of Justice's jurisprudence on self-defence. Professor Iain Scobbie, Judge of the American Society of International Law's Lieber Society Book Prize 2009, Sir Joseph Hotung Research Professor, School of Oriental and African Studies, London James Green's *The International Court of Justice and Self-Defence in International Law* usefully draws together the jurisprudence of the International Court of Justice on the international law governing self-defence. The work could not be more timely in light of both contemporary State practice and the Court's recent controversial judgements on the topic. Of particular note is his analysis of the very complex, and as yet unsettled, notion of armed attack. Professor Michael Schmitt, Chairman of the American

Society of International Law's Lieber Society Book Prize Committee, Chair of Public International Law, Durham University Winner of the University of Reading Faculty of Social Sciences outputs prize for the best research output in 2010.

**Parallel Processing and Applied Mathematics, Part II** Roman Wyrzykowski, Jack Dongarra, Konrad Karczewski, Jerzy Wasniewski, 2012-07-04 This two-volume-set (LNCS 7203 and 7204) constitutes the refereed proceedings of the 9th International Conference on Parallel Processing and Applied Mathematics, PPAM 2011, held in Torun, Poland, in September 2011. The 130 revised full papers presented in both volumes were carefully reviewed and selected from numerous submissions. The papers address issues such as parallel/distributed architectures and mobile computing; numerical algorithms and parallel numerics; parallel non-numerical algorithms; tools and environments for parallel/distributed/grid computing; applications of parallel/distributed computing; applied mathematics, neural networks and evolutionary computing; history of computing.

**Pathways to State Welfare in Korea** Gyu-Jin Hwang, 2017-03-02 Why has Korean social policy developed differently from that of other East Asian countries? While in many respects Korea can be compared with Taiwan, Hong Kong and Singapore, where economic development has been the chief priority of state action, Korea has also implemented extensive welfare reform, expanding its welfare provision even under recent conditions of economic downturn. Gyu-Jin

Hwang traces the development of the Korean welfare state, providing a fascinating case study for observers of East Asian industrial growth and the public management of social risks. Arguing that the extension of state welfare presents a unique challenge to existing theoretical propositions underlying social policy development, he draws on detailed empirical analysis of key policy areas, namely public assistance, national pensions, health care and employment insurance. The book offers a definitive analysis of the development of Korean social policy programmes and the politics of implementing them. The book will be important reading for all those interested in comparative Social Policy and more specifically the development of Social Welfare in Asian countries.

News W. Lance Bennett, 2016-09-14 Can real news survive in an era of social media and spin? An updated edition of the “smart, provocative introduction to media and American politics.”—Paul Freedman, author of Campaign Advertising and American Democracy For over thirty years, *News: The Politics of Illusion* has not simply reflected the political communication field—it has played a major role in shaping it. Today, the familiar news organizations of the legacy press are operating in a fragmenting and expanding mediaverse as online competitors challenge the very definition of news itself. We’re inundated with opinions, gossip, clickbait, false equivalencies, targeting, and other challenges—while at the same time, the rise of serious investigative organizations such as ProPublica presents yet a different

challenge to legacy journalism. Lance Bennett's thoroughly revised tenth edition offers an up-to-date guide to understanding how and why the media and news landscapes are being transformed. It explains the mix of old and new, and points to possible outcomes. Where areas of change are clearly established, key concepts from earlier editions have been revised. There are new case studies, updates on old favorites, and insightful analyses of how novel kinds of information and engagement are affecting our politics. As always, News presents fresh evidence and arguments that invite new ways of thinking about the political information system and its place in democracy. "Bennett argues that the American political information system—with news at its center—is broken, with serious consequences for democracy. Bennett lays out his case and invites readers to make up their own minds."—Paul Freedman, University of Virginia

**Travels of Bollywood Cinema** Anjali Gera Roy, Chua Beng Huat, 2014-11-10 From Bombay (Mumbai) and other production centres on the Indian subcontinent, Indian popular cinema has travelled globally for nearly a century, culminating in the Bollywood-inspired, Oscar-winning film *Slumdog Millionaire*. This volume brings together perspectives on Indian popular cinema, universally known as Bollywood now, from different disciplinary and geographical locations to look afresh at national cinemas. It shows how Bollywood cinema has always crossed borders and boundaries: from the British Malaya, Fiji, Guyana, Trinidad, Mauritius, and East and South Africa to the

former USSR, West Asia, the UK, the USA, Canada, and Australia. While looking at the meanings of nation, diaspora, home, and identity in cinematic texts and contexts, the essays also examine how localities are produced in the new global process by broadly addressing nationalism, regionalism, and transnationalism, politics and aesthetics, as well as spectatorship and viewing contexts.

*Health, United States, 2016, with Chartbook on Long-Term Trends in Health*  
National Center for Health Statistics, Center For Disease Control And Preventio, 2017-08-16 This annual overview report of national trends in health statistics contains a Chartbook that assesses the nation's health by presenting trends and current information on selected measures of morbidity, mortality, health care utilization and access, health risk factors, prevention, health insurance, and personal health-care expenditures. Chapters devoted to population characteristics, prevention, health risk factors, health care resources, personal health care expenditures, health insurance, and trend tables may provide the health/medical statistician, data analyst, biostatistician with additional information to complete experimental studies or provide necessary research for pharmaceutical companies to gain data for modeling and sampling. Undergraduate students engaged in applied mathematics or statistical compilations to graduate students completing biostatistics degree programs to include statistical inference principles, probability, sampling methods and data analysis as well as specialized medical statistics

courses relating to epidemiology and other health topics may be interested in this volume. Related products: Your Guide to Choosing a Nursing Home or Other Long-Term Services & Supports available here:

**Process Plant Layout** Sean Moran, 2016-11-16 Process Plant Layout, Second Edition, explains the methodologies used by professional designers to layout

process equipment and pipework, plots, plants, sites, and their corresponding environmental features in a safe, economical way. It is supported with tables of separation distances, rules of thumb, and codes of practice and standards. The book includes more than seventy-five case studies on what can go wrong when layout is not properly considered. Sean Moran has thoroughly rewritten and re-illustrated this book to reflect advances in technology and best practices, for example, changes in how designers balance layout density with cost, operability, and safety considerations. The content covers the 'why' underlying process design company guidelines, providing a firm foundation for career growth for process design engineers. It is ideal for process plant designers in contracting, consultancy, and for operating companies at all stages of their careers, and is also of importance for operations and maintenance staff involved with a new build, guiding them through plot plan reviews. Based on interviews with over 200 professional process plant designers Explains multiple plant layout methodologies used by professional process engineers, piping engineers, and process architects Includes advice on how to choose and use the latest CAD tools for plant layout Ensures that all methodologies integrate to comply with worldwide risk management legislation

**World Drug Report 2008** United Nations Office on Drugs and Crime, 2008-06-26  
The Report continues to provide in depth trend analysis of the four main drug markets in its first section. In addition, to mark the one hundred year

anniversary of the Shanghai Opium Commission, and one hundred years of international drug control, the Report contains an in-depth look at the development of the international drug control system. The Report also contains a small statistical annex which provides a detailed look at production, prices and consumption. As in previous years, the present Report is based on data obtained primarily from the annual reports questionnaire (ARQ) sent by Governments to UNODC in 2007, supplemented by other sources when necessary and where available. Two of the main limitations herein are: (i) that ARQ reporting is not systematic enough, both in terms of number of countries responding and of content, and (ii) that most countries lack the adequate monitoring systems required to produce reliable, comprehensive and internationally comparable data. National monitoring systems are, however, improving and UNODC has contributed to this process.
