Achieving the Paris Climate Agreement Goals Sven Teske, 2019-02-01 This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

Nondestructive Materials Characterization Norbert G. H. Meyendorf, Peter B. Nagy, Stanislav I. Rokhlin, 2013-11-21 With an emphasis on aircraft materials, this book describes techniques for the material characterization to detect and quantify degradation processes such as corrosion and fatigue. It introduces readers to these techniques based on x-ray, ultrasonic, optical and thermal principles and demonstrates the potential of the techniques for a wide variety of applications concerning aircraft materials, especially aluminum and titanium alloys. The advantages and disadvantages of various techniques are evaluated.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Global Civil Society 2005/6 Helmut K Anheier, Marlies Glasius, Mary Kaldor, 2005-11-05 The Global Civil Society Yearbook is the standard work on all aspects of contemporary global civil society for activists, practitioners, students and academics alike.

Religion and Film Melanie Wright, 2006-10-27 From silent films to contemporary blockbusters, religion has always proved a popular theme for the cinema. However, all too often religion and film are discussed from narrowly confessional perspectives, with the result that the field has long been dominated by the question of a film's fidelity to a religious text or worldview, or its value as a tool in ministry and mission. Religion and Film: An Introduction seeks to redress this balance, and argues for a new, holistic approach to the subject that draws on work from cultural studies, religious studies and film studies alike. Wright argues that the 'meanings' of a film are not encoded by its textual organisation, but are bound up with its interpretation by viewers in specific contexts. Focusing on religiously diverse films like The Ten Commandments, La Passion de Jeanne d'Arc, Kadosh, Lagaan, My Son the Fanatic, Keeping the Faith, The Wicker Man and Mel Gibson's The Passion of The Christ, the author looks at varied screen representations of religion; at films shaped by strong convictions about the place of religion in society; and at the roles that audiences play as consumers of film. The book will have strong appeal to students as well as general readers interested in all aspects of the inter-relationship of religion and the cinema.

Dismantling the Iraqi Nuclear Programme Gudrun Harrer, 2014-04-03 This book is an authoritative account of the nuclear weapons inspections regime in Iraq from 1991 to 1998. Without a proper understanding of those years, the 2003 US invasion of Iraq after a futile WMD search remain unintelligible. In the 1990s, after adapting to a completely new kind of intrusive inspections with unprecedented access rights, the IAEA discovered and dismantled Iraq's clandestine nuclear weapons program and put in place an efficient monitoring system which could have contained Saddam Hussein's attempts to reconstitute his nuclear programs - had he ever tried to. However, the politicisation of the inspection process led to an end of the inspections in 1998. Based on various sources including inspection reports and other documents in the archive of the IAEA Iraq Action Team at the IAEA headquarters in Vienna, Dismantling the Iraqi Nuclear Programme presents completely new information about the weapons inspection regime in Iraq and offers valuable lessons for future non-proliferation and disarmament cases. The book also draws on discourse from Iraqi scientists, which provides a close look into not only the motivation of involved Iraqis, but also Iraqi concealment mechanisms. This book will be of much interest to students of nuclear proliferation, arms control, Middle Eastern politics, diplomacy, international security and IR.

Greene's Protective Groups in Organic Synthesis Peter G. M. Wuts, Theodora W. Greene, 2012-12-20 The Fourth Edition of Greene's Protective Groups in Organic Synthesis continues to be an indispensable reference for controlling the reactivity of the most common functional groups during a synthetic sequence. This new edition incorporates the significant developments in the field since publication of the third edition in 1998, including... New protective groups such as the fluorous family and the uniquely removable 2-methoxybenzenesulfonyl group for the protection of amines New techniques for the formation and cleavage of existing protective groups, with examples to illustrate each new technique Expanded coverage of the unexpected side reactions that occur with protective groups New chart covering the selective deprotection of silyl ethers 3,100 new references from the professional literature The content is organized around the functional group to be protected, and ranges from the simplest to the most complex and highly specialized protective groups.

Mercy in Her Eyes John Kenneth Muir, 2006 (Applause Books). This the first book to examine the films of the acclaimed and popular Indian-born and Harvard educated filmmaker, Mira Nair. A unique voice in cinema today, she is one of the few female directors who made it to the top of a male-dominated profession. Her films feature an incomparably sensuous visual style yet at the same time often record the injustice of the disenfranchised and the cross-pollination of East and West. Her twin themes of realism and romance make for dazzling cinema. John Kenneth Muir analyzes all of Nair's work, including: Salaam Bombay! (1988), the groundbreaking story of a young boy abandoned by his family on the streets of Bombay; Mississippi Masala (1991), an interracial small town romance between an Indian woman (Sarita Choudhury) and an African American businessman (Denzel Washington); Monsoon Wedding (2001), featuring a Bollywood carnival atmosphere, one of the most successful foreign films ever released in the United States; Hysterical Blindness (2002), the HBO film featuring Uma Thurman and Juliette Lewis, looking for love in all the wrong places; The big-budget Hollywood adaptation of the Thackeray novel Vanity Fair (2004), starring Reese Witherspoon, Gabriel Byrne, and Eileen Atkins.

Ensuring Quality Cancer Care Institute of Medicine and National Research Council, Commission on Life Sciences, Institute of Medicine, National Cancer Policy Board, 1999-07-21 We all want to believe that when people get cancer, they will receive medical care of the highest quality. Even as new scientific breakthroughs are announced, though, many cancer patients may be getting the wrong care, too little care, or too much care, in the form of unnecessary procedures. How close is American medicine to the ideal of quality cancer care for every person with cancer? Ensuring Quality Cancer Care provides a comprehensive picture of how cancer care is delivered in our nation, from early detection to end-of-life issues. The National Cancer Policy Board defines quality care and recommends how to monitor, measure, and extend quality care to all people with cancer. Approaches to

accountability in health care are reviewed. What keeps people from getting care? The book explains how lack of medical coverage, social and economic status, patient beliefs, physician decision-making, and other factors can stand between the patient and the best possible care. The board explores how cancer care is shaped by the current focus on evidence-based medicine, the widespread adoption of managed care, where services are provided, and who provides care. Specific shortfalls in the care of breast and prostate cancer are identified. A status report on health services research is included. Ensuring Quality Cancer Care offers wide-ranging data and information in clear context. As the baby boomers approach the years when most cancer occurs, this timely volume will be of special interest to health policy makers, public and private healthcare purchasers, medical professionals, patient advocates, researchers, and people with cancer.

Bodies of Sound Susan C. Cook,Sherril Dodds,2016-04-08 From the ragtime one-step of the early twentieth century to the contemporary practices of youth club cultures, popular dance and music are inextricably linked. This collection reveals the intimate connections between the corporeal and the sonic in the creation, transmission and reception of popular dance and music, which is imagined here as ‘bodies of sound’. The volume provokes a wide-ranging, interdisciplinary conversation that includes scholarship from Asia, Europe and the United States, which explores topics from the nineteenth century through to the present day and engages with practices at local, national and transnational levels. In Part I: Constructing the Popular, the authors explore how categories of popular music and dance are constructed and de-stabilized, and their proclivity to appropriate and re-imagine cultural forms and meanings. In Part II: Authenticity, Revival and Reinvention, the authors examine how popular forms produce and manipulate identities and meanings through their attraction to and departure from cultural traditions. In Part III: (Re)Framing Value, the authors interrogate how values are inscribed, silenced, rearticulated and capitalized through popular music and dance. And in Part IV: Politics of the Popular, the authors read the popular as a site of political negotiation and transformation.
