Bovine Tuberculosis – International Perspectives on Epidemiology and Management Andrew W. Byrne,Adrian R. Allen,Daniel J. O’Brien,Michele A. Miller,2019-10-17 Bovine tuberculosis (bTB) is a significant zoonotic pathogen with a global distribution, and a considerable economic impact. It has a notoriously complex epidemiology, varying by affected region and often involving multiple-host species. Here we present an international collection of papers that address both national and international factors impacting on the control of bovine tuberculosis. We hope this research topic will provide a forum which may generate a greater understanding of the disease in a wider context, and inform future eradication efforts through the design of more effective interventions.
