**Termite Dust** Rev Aaron Kyle Nelson, 2015-06-03 TERMITE DUST VOLUME 2: BASHED TOGETHER is a compilation of issues 7 - 12 of Aaron Kyle Nelson's homemade, independently published zine. Continuing where VOLUME 1 left off, BASHED TOGETHER contains fictional tales of baser superheroes, true life accounts of drug addiction, nonsense poetry and other such befouled literary musings from AKN and several other collaborators. As with VOLUME 1, this new compendium is the result of one man's hero's journey through independent publishing, and as they say in the movies ... mistakes were made. There are misspellings. There are grammatical errors. There are lapses in logic. But such is the way of DIY, honest art.

**Mobile Unleashed** Don Dingee, 2015-12-08 This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be collaboration. Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company

wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.

Alternative Historiographies of the Digital Humanities Dorothy Kim, Adeline Koh, 2021 Alternative Historiographies of the Digital Humanities examines the process of history in the narrative of the digital humanities and deconstructs its history as a straight line from the beginnings of humanities computing. By discussing alternative histories of the digital humanities that address queer gaming, feminist game studies praxis, Cold War military-industrial complex computation, the creation of the environmental humanities, monolingual discontent in DH, the hidden history of DH in English studies, radical media praxis, cultural studies and DH, indigenous futurities, Pacific Rim post-colonial DH, the issue of scale and DH, the radical, indigenous, feminist histories of the digital database, and the possibilities for an antifascist DH, this collection hopes to re-set discussions of the DH straight, white origin myths. Thus, this collection hopes to reexamine the silences in such a straight and white masculinist history and how power comes into play to shape this straight, white DH narrative.--Page 4 of cover

3rd Symposium of Ubiquitous Computing and Ambient Intelligence 2008 Juan Manuel Corchado Rodríguez, Dante Tapia, Jose Bravo, 2008-09-16 The Symposium on Ubiquitous Computing and Ambient Intelligence (UCAmI) began as a workshop held in 2003 in San Sebastián (Spain) under the Spanish Artificial Intelligence Conference. This event gathered 32 attendees and 18 papers were presented. The second edition, already as a Symposium, took place in Granada (Spain) under the first Spanish Computer Science Conference (CEDI). Later, in 2006, a second workshop was celebrated in Ciudad Real and, in 2007; the second Symposium was organized in Zaragoza by the CEDI conference. Now we continue to work on the organization of this event in Salamanca, a beautiful Spanish city. The European Community and the Sixth and Seventh Framework Programs - encourage researchers to explore the generic scope of the Aml vision. In fact, some researchers have a crucial role in this vision. Emile Aarts from Philips describes - Ambient Intelligence as the integration of technology into our environment, so that people can freely and interactively utilize it. This idea agrees with the proposal of

Mark Weiser regarding the Ubiquitous Computing paradigm.

Nice White Ladies JESSIE. DANIELS, 2021-10-12 An acclaimed expert illuminates the distinctive role that white women play in perpetuating racism, and how they can work to fight it In a nation deeply divided by race, the Karens of the world are easy to villainize. But in Nice White Ladies, Jessie Daniels addresses the unintended complicity of even well-meaning white women. She reveals how their everyday choices harm communities of color. White mothers, still expected to be the primary parents, too often uncritically choose to send their kids to the best schools, collectively leading to a return to segregation. She addresses a feminism that pushes women of color aside, and a wellness industry that insulates white women in a bubble of their own privilege. Daniels then charts a better path forward. She looks to the white women who fight neo-Nazis online and in the streets, and who challenge all-white spaces from workplaces to schools to neighborhoods. In the end, she shows how

her fellow white women can work toward true equality for all.
