The story of your city Greg Clark,Tim Moonen,Jake Nunley,2018-10-31 By the end of this century, 9 out of 10 Europeans will live in an urban area. But what kind of city will they call home? You'll find all the answers in CITY, TRANSFORMED, the new essay series from the European Investment Bank. This panoramic first essay in the series lays out a great sweeping history of European cities over the last fifty years—and showcases new directions being taken by some of our most innovative cities. A Clinical Guide to the Treatment of the Human Stress Response George S. Everly Jr.,2012-12-06 In 1981, Plenum Press published a text entitled The Nature and Treatment of the Stress Response by Robert Rosenfeld, M. D. , and me. That text attempted to do what no other text from a major publisher had previously attempted, that is, to create a clinically practical guide for the treatment of excessive stress and its arousal-related syndromes-this to be captured between the same covers in combination with a detailed, clinically relevant pedagogy on the neurological and endocrinological foundations of the stress response itself. That volume has enjoyed considerable success having found markets among practicing professionals and clinical students as well. The fields of psychosomatic medicine, health psychology, behavioral medicine, and applied stress research have appreciably expanded their boundaries since the publication of the aforementioned volume. Although remarkably little of the clinical utility of that volume has been eroded with time, it was felt that an updated and more integrative clinical textbook needed to be offered to practicing clinicians and students within clinical rather than simply create a second edition of training programs. Therefore, was made to create a significantly revised the original volume, the decision and expanded volume that would cover many of the same topics as the original volume but would provide a primary emphasis on the treatment of excessive stress and that would employ an integrative phenomenological model to facilitate that end. This present volume entitled A Clinical Guide to the Treatment of the Human Stress Response is the result.

The Military Justice System United States. Air Force ROTC.,1962 This text is designed to give the advanced Air Force ROTC student an over-all view of the military justice system, of how it operates in the Air Force, and of the general responsibilities of those in 'authority or command' who must administer the system. And, above all, it is hoped that the text will engender a feeling that military justice is directly, intimately, and essentially concerned with human conduct - rather than with arbitrary rules, legalistic distinctions, and inflexible classifications--Pref.

Sewerage and Sewage Treatment Harold E. Babbitt,2021-11-05 Sewerage and Sewage Treatment by Harold E. Babbitt often goes overlooked as simply a manual about sewage and drainage protocol during the late 1800s and early 1900s. However, that is far from the truth. Babbitt, a university professor, manages to make the topic not only informative but also fascinating. By illustrating

the ways in which cities' drainage systems functioned, in fact, allows modern readers to learn about society during the time the text was written. Thus, even if the information contained within the pages of the book is outdated, the interest in reading it still remains.

Preterm Birth Institute of Medicine,Board on Health Sciences Policy,Committee on Understanding Premature Birth and Assuring Healthy Outcomes,2007-05-23 The increasing prevalence of preterm birth in the United States is a complex public health problem that requires multifaceted solutions. Preterm birth is a cluster of problems with a set of overlapping factors of influence. Its causes may include individual-level behavioral and psychosocial factors, sociodemographic and neighborhood characteristics, environmental exposure, medical conditions, infertility treatments, and biological factors. Many of these factors co-occur, particularly in those who are socioeconomically disadvantaged or who are members of racial and ethnic minority groups. While advances in perinatal and neonatal care have improved survival for preterm infants, those infants who do survive have a greater risk than infants born at term for developmental disabilities, health problems, and poor growth. The birth of a preterm infant can also bring considerable emotional and economic costs to families and have implications for public-sector services, such as health insurance, educational, and other social support systems. Preterm Birth assesses the problem with respect to both its causes and outcomes. This book addresses the need for research involving clinical, basic, behavioral, and social science disciplines. By defining and addressing the health and economic consequences of premature birth, this book will be of particular interest to health care professionals, public health officials, policy makers, professional associations and clinical, basic, behavioral, and social science researchers.

Cyber-nationalism in China Ying Jiang,2012 The prevailing consumerism in Chinese cyberspace is a growing element of Chinese culture and an important aspect of this book. Chinese bloggers, who have strongly embraced consumerism and tend to be apathetic about politics, have nonetheless demonstrated political passion over issues such as the Western media's negative coverage of China. In this book, Jiang focuses upon this passion - Chinese bloggers' angry reactions to the Western media's coverage of censorship issues in current China - in order to examine China's current potential for political reform. A central focus of this book, then, is the specific issue of censorship and how to interpret the Chinese characteristics of it as a mechanism currently used to maintain state control.--Cover description.

Global Debates, Local Dilemmas Tran Minh Hang,2018-12-20 The practice of sex-selective abortion is on the rise globally, stirring debates about gender inequality, medical ethics and reproductive autonomy. This book is the first ethnography to document practices of sex selection in Viet Nam. It shows how and why abortions are used to select the sex of children and how Vietnamese individuals and health professionals are implicated in this illicit and controversial practice. Telling the stories of women who have undergone sex-selective abortions, it traces their passage through sex determination and abortion decision-making phases, and investigates their experiences during and after their sex-selective abortions. It describes the turmoil experienced by individuals who undergo such abortions and explores their interactions with the spectrum of social actors and health institutions that facilitate practices of sex selection. As the first ethnographic study on sex-selective abortions in Viet Nam, this book delves into socially sensitive terrain and sheds light on personally fraught individual experiences of reproductive agency. It documents societal responses to sex-selective abortions in Viet Nam and identifies gaps in the state's capacity to regulate reproductive desire in a marketised economy. A resource for researchers, it contributes to ongoing debates on sex selection and provides a framework for developing relevant social policies, interventions and support services. 'This pioneering study offers a nuanced and sensitive account of sex-selective abortion as human experience. Through thought provoking case studies, the book provides rare ethnographic documentation of the complex quandaries that arise as selective reproductive technologies are routinised across the globe.' — Tine M. Gammeltoft, Department of Anthropology, University of Copenhagen
