Some folks welcome this kind of new energy in technology; others aren't so sure a complete makeover is a good idea. Whichever camp you find yourself in, this book will help you learn more about what you can expect from Windows 8. Some of the biggest changes we'll discuss in this book include: Navigating the new Start screen, customizing Start screen colors, and displaying your favorite apps as you want them to appear Using live tiles to get the latest information for your favorite apps Using touch and mouse-based techniques to personalize your Windows 8 experience and work with files, folders, and more Enhancing the security of your system by changing your Lock Screen, adding a picture password, and creating a PIN logon Learning to work fluidly with open apps, cycling through open apps, docking apps, and closing or suspending apps you no longer need Using the Refresh and Reset tools to give your computer a fresh start if you're having computer

From Memory to Marble Elizabeth Rankin,Rolf Michael Schneider,2020-02-10 For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's

socio-political debates in the 1930s and 1940s when it was made. The book considers the active role the Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of African Minds, co-publisher with De Gruyter writes: *From Memory to Marble* is an open access monograph in the true sense of the word. Both volumes of the digital version of the book are available in full and free of charge from the date of publication. This approach to publishing democratises access to the latest scholarly publications across the globe. At the same time, a book such as *From Memory to Marble*, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of *From Memory to Marble* to a range of interested readers. For more material you can browse at Stanford's database Voortrekker Monumentality: a digital archive.

The Next Four Decades Grayson K. Vincent, 2010 The purpose of this report is to present

information on how the age structure of the overall population and the composition of the older population in terms of age, sex, race, and Hispanic origin are expected to change over the next four decades. Between 2010 and 2050, the United States is projected to experience rapid growth in its older population. In 2050, the number of Americans aged 65 and older is projected to be 88.5 million, more than double its projected population of 40.2 million in 2010. The baby boomers are largely responsible for this increase in the older population, as they will begin crossing into this category in 2011. The aging of the population will have wide-ranging implications for the country. As the United States ages over the next several decades, its older population will become more racially and ethnically diverse. Projecting the size and structure, in terms of age, sex, race, and Hispanic origin, of the older population is important to public and private interests, both socially and economically. The projected growth of the older population in the United States will present challenges to policy makers and programs, such as Social Security and Medicare. It will also affect families, businesses, and health care providers.

Globalization, Biosecurity, and the Future of the Life Sciences National Research Council, Institute of Medicine, Board on Global Health, Policy and Global Affairs, Development, Security, and Cooperation, Committee on Advances in Technology and the Prevention of Their Application to Next Generation Biowarfare Threats, 2006-07-07 Biomedical advances have made it possible to identify and manipulate features of living organisms in useful ways-leading to improvements in public health, agriculture, and other areas. The globalization of scientific and technical expertise also means that many scientists and other individuals around the world are generating breakthroughs in the life sciences and related technologies. The risks posed by bioterrorism and the proliferation of biological weapons capabilities have increased concern about

how the rapid advances in genetic engineering and biotechnology could enable the production of biological weapons with unique and unpredictable characteristics. Globalization, Biosecurity, and the Future of Life Sciences examines current trends and future objectives of research in public health, life sciences, and biomedical science that contain applications relevant to developments in biological weapons 5 to 10 years into the future and ways to anticipate, identify, and mitigate these dangers.

Parks, Recreation, and Open Space Alexander Garvin,2000 What, exactly, is a park? What role have parks played in cities, and what will they need to be in the new economics and society of 21st century America? To answer these questions, noted planner and planning educator Alexander Garvin first describes the parks agenda of Frederick Law Olmsted, which dominated the design of American parks for over a century, until the last 50 years of suburbanization so radically changed the nation's landscape and society. Parks and open space, once thought of as essential to public life and an important government responsibility, are now often regarded as amenities that can be done without. In order to develop a new agenda that fits the economics, needs, and expectations of Americans in this century, Garvin studied the details of successful parks and open space projects throughout the country. He distilled a set of principles to guide the actions of public and private leaders in all aspects of park, recreation, and open space development. His ideas--many of which challenge existing practices and conventional wisdom--fit new times and circumstances in America. This beautiful report is extensively illustrated with plan drawings and the author's own color photographs of parks across America. *Parks, Recreation, and Open Space* was sponsored in part by the City Parks Forum (CPF), a fellowship of mayors, their park advisors, and community leaders that encourages

collaboration and exchange of ideas about the role of parks in communities. The CPF is administered by the American Planning Association and supported in part by the Wallace-Reader's Digest Funds and the Doris Duke Charitable Foundation. It is the first in a series of three reports by the City Parks Forum. The second report is Parks and Economic Development (PAS 502) by John L. Crompton.
