Transportation Decision Making Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decisionmaking. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

ITS Deployment Guidance for Transit Systems , 1997 This technical edition provides guidance for the transit community on developing and implementing ITS systems and using the National ITS Architecture. It is written specifically for the transit community and focuses on transit applications of ITS and the National ITS Architecture. It provides practical assistance based on real life experiences with developing and implementing transit ITS

systems. This is a comprehensive document that defines the key concepts, products, and components of ITS and the National ITS Architecture. This document serves as a basic reference tool for understanding and deploying ITS in transit. It consists of six major sections and four appendices.

Popol Vuh Dennis Tedlock,2013-02 Popol Vuh, the Quiché Mayan book of creation is not only the most important text in the native language of the Americas, it is also an extraordinary document of the human imagination. It begins with the deeds of Mayan Gods in the darkness of a primeval sea and ends with the radiant splendor of the Mayan Lords who founded the Quiché Kingdom in the Guatemalan highlands. Originally written in Mayan hieroglyphs, it was translated into the Roman alphabet in the 16th century. The new edition of Dennis Tedlock's unabridged, widely praised translation includes new notes and commentary, newly translated passages, newly deciphered hieroglyphs, and over 40 new illustrations.

The Bios Companion Phil Croucher,2001 This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

Doing Business 2017 World Bank,2016-10-25 Fourteenth in a series of annual reports comparing business regulation in 190 economies, Doing Business 2017 measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction

permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. This year's report introduces major improvements by expanding the paying taxes indicators to cover postfiling processes—tax audits, tax refunds and tax appeals—and presents analysis of pilot data on selling to the government which measures public procurement regulations. Also for the first time this year Doing Business collects data on Somalia, bringing the total number of economies covered to 190. Using the data originally developed by Women, Business and the Law, this year for the first time Doing Business adds a gender component to three indicators—starting a business, registering property, and enforcing contracts—and finds that those economies which limit women's access in these areas have fewer women working in the private sector both as employers and employees. The report updates all indicators as of June 1, 2016, ranks economies on their overall “ease of doing business†”, and analyzes reforms to business regulation †“ identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182 articles in peer-reviewed academic journals since its inception.

Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers: * A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share

with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. We publish compact, tightly-bound, full-size books (8 1/2 by 11 inches), with glossy covers. 4th Watch Books is a Service Disabled Veteran-Owned Small Business (SDVOSB), and is not affiliated with the National Institute of Standards and Technology. Climate Change, the Indoor Environment, and Health Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Effect of Climate Change on Indoor Air Quality and Public Health, 2011-10-01 The indoor environment affects occupants' health and comfort. Poor environmental conditions and indoor contaminants are estimated to cost the U.S. economy tens of billions of dollars a year in exacerbation of illnesses like asthma, allergic symptoms, and subsequent lost productivity. Climate change has the potential to affect the indoor environment because conditions inside buildings are influenced by conditions outside them. Climate Change, the Indoor Environment, and Health addresses the impacts that climate

change may have on the indoor environment and the resulting health effects. It finds that steps taken to mitigate climate change may cause or exacerbate harmful indoor environmental conditions. The book discusses the role the Environmental Protection Agency (EPA) should take in informing the public, health professionals, and those in the building industry about potential risks and what can be done to address them. The study also recommends that building codes account for climate change projections; that federal agencies join to develop or refine protocols and testing standards for evaluating emissions from materials, furnishings, and appliances used in buildings; and that building weatherization efforts include consideration of health effects. *Climate Change, the Indoor Environment, and Health* is written primarily for the EPA and other federal agencies, organizations, and researchers with interests in public health; the environment; building design, construction, and operation; and climate issues.

Flexible Imputation of Missing Data, Second Edition Stef van Buuren, 2018-07-17 Missing data pose challenges to real-life data analysis. Simple ad-hoc fixes, like deletion or mean imputation, only work under highly restrictive conditions, which are often not met in practice. Multiple imputation replaces each missing value by multiple plausible values. The variability between these replacements reflects our ignorance of the true (but missing) value. Each of the completed data set is then analyzed by standard methods, and the results are pooled to obtain unbiased estimates with correct confidence intervals. Multiple imputation is a general approach that also inspires novel solutions to old problems by reformulating the task at hand as a missing-data problem. This is the second edition of a popular book on multiple imputation, focused on explaining the application of methods through detailed worked examples using the MICE package as developed by the author. This new edition incorporates the recent developments in this fast-moving field. This class-tested book avoids mathematical and technical details as much as possible: formulas are accompanied by verbal statements that explain the formula in accessible terms. The book sharpens the reader's intuition on how to think about missing data, and provides all the tools needed to execute a well-grounded quantitative analysis in the presence of missing data.

Achieving Full Participation Through Universal Design Council of Europe. Committee on the Rehabilitation and Integration of People with Disabilities, Council of Europe. Committee of Experts on Universal Design, 2009-01-01 Many Europeans with disabilities are unable to participate in important areas of society, simply because policies and the built environment are not designed to meet their requirements. Moreover, with the number of

elderly people rapidly increasing, European societies will have to accommodate more and more disabled citizens in the future. This book invites member states to promote full participation in community life by ensuring access to all areas of society, including the built environment, transport, products and goods, information, public service, education, employment and health care and implement universal design as a strategy to ensure equal and democratic rights in society for all individuals, regardless of age, abilities or cultural background, including persons with disabilities.--Publisher's description.

In vitro Plant Breeding towards Novel Agronomic Traits Manoj Kumar, Annamalai Muthusamy, Vivek Kumar, Neera Bhalla-Sarin, 2019-11-23 This book presents a comprehensive overview of plant stresses caused by salt, drought, extreme temperatures, oxygen and toxic compounds, which are responsible for huge losses in crop yields. It discusses the latest research on the impact of salinity and global environment changes, and examines the advances in the identification and characterization of the mechanisms that allow plants to tolerate biotic and abiotic stresses. Further it presents our current understanding of metabolic fluxes and the various transporters that collectively open the possibility of applying in vitro technology and genetic engineering to improve stress tolerance. Exploring advanced methods that augment traditional plant tissue culture and breeding techniques toward the development of new crop varieties that can tolerate biotic and abiotic stresses to achieve sustainable food production, this book is a valuable resource for plant scientists and researchers.

Intercultural Dialogue on Campus Sjur Bergan, Jean-Philippe Restoueix, Council of Europe, 2009-01-01 Modern societies are inconceivable as isolated and mono-cultural entities. The interaction of various cultures is not only a fact of life for most Europeans, it also enriches our societies. However, we also witness tensions between cultures. Intercultural dialogue is therefore one of the political priorities of the Council of Europe, as shown most prominently by the adoption of the White Paper Living Together as Equals in Dignity in May 2008. Higher education, by its history and contemporary practice, is a natural partner in and promoter of intercultural dialogue and understanding. Higher education institutions and campuses are themselves multicultural societies, and as such are the focus of the present volume. A second volume will examine the role of higher education in furthering intercultural dialogue and understanding in broader society.

Satellite-based Applications on Climate Change John Qu, Alfred Powell, M.V.K. Sivakumar, 2013-03-19 Climate and other environmental changes are drawing unprecedented concern and attention from national governments, international organizations and local communities. Global warming has left

noticeable impacts on the environment and the ecosystems it supports (including humans), and has important implications for sustainable economic and social development in the future. Satellite observations of climate and environmental change have become an increasingly important tool in recent years in helping to shape the response of international communities to this critical global challenge. The book presents the latest advances in satellite-based remote sensing of the Earth’s environment - ranging from applications in climate and atmospheric science to hydrology, oceanography, hydrology, geomorphology, ecology and fire studies. Introductory chapters also cover key technical aspects such as instrumentation, calibration, data analysis, and GIS tools for decision-making.

Network and System Security Joseph K. Liu,Xinyi Huang,2019-12-10 This book constitutes the proceedings of the 13th International Conference on Network and System Security, NSS 2019, held in Sapporo, Japan, in December 2019. The 36 full papers and 7 short papers presented together with 4 invited papers in this book were carefully reviewed and selected from 89 initial submissions. The papers cover a wide range of topics in the field, including authentication, access control, availability, integrity, privacy, confidentiality, dependability and sustainability of computer networks and systems.
