Guidelines for the Management of Snakebites Second Edition Who Regional Office for South-East Asia,2016-08-17 Snakebites are well-known medical emergencies in many parts of the world especially in rural areas. Agricultural workers and children are most affected. The incidence of snakebite mortality is particularly high in South-East Asia. Rational use of snake anti-venom can substantially reduce mortality and morbidity due to snake bites. These guidelines are a revised and updated version of those published in 2011. The geographical coverage extends from India in the west to DPR Korea and Indonesia in the east Nepal and Bhutan in the north and to Sri Lanka and Indonesia in the south and south-east. Snakes inhabiting the Indonesian islands east of Wallace's line (West Papua and Maluku Islands) are part of the Australasian elapid fauna differing from those west of this line. This publication aims to pass on a digest of available knowledge about all clinical aspects of snake-bite to medically trained personnel including medical doctors nurses dispensers and community health workers. They aim to provide sufficient practical information to allow medically trained personnel to assess and treat patients with snake-bites at different levels of the health service.

It explains the transition in structural terms, presents characteristics of China00Cs political elites, and analyzes the balance of power among formal institutions as well as among factional groups. It also examines political interactions between Jiang Zemin and his cronies on the one side and Hu Jintao and his allies on the other over a number of issues: the epidemic of severe acute respiratory syndrome (SARS); ideological institutionalization; the politics over economic overheating; Jiang Zemin00Cs complete retirement; and Hu Jintao00Cs power consolidation in both ideological and personnel terms.

From Antagonism to Partnership Togzhan Kassenova, 2007-09-03 This book is a study of cooperative security efforts between the United States and Russia since the collapse of the Soviet Union. It undertakes an analysis of the Cooperative Threat Reduction (CTR) Program and several other programs established by different U.S. Departments. The CTR process demonstrates both, the achievements and limitations of the evolving new framework of interaction between the U.S. and Russia. This investigation is the first attempt to use the CTR process as a case study for U.S.-Russian strategic relations in the post-Cold War international security system. By answering the questions of why this process is prone to some persistent problems of implementation and why it was possible in the first place, it yields significant conclusions regarding the nature of U.S.-Russian relations, and the achievements as well as limitations in the bilateral relationship since the end of the Cold War. *From Antagonism to Partnership* contributes to the existing literature on cooperative threat reduction as a study linking CTR to the wider context of the opportunities, challenges and constraints determining the nature of post-Cold War relations between the U.S. and Russia.

Handbook of Research on Student-Centered Strategies in Online Adult Learning Environments Fitzgerald, Carlton J., Laurian-Fitzgerald, Simona, Popa, Carmen, 2018-06-08 As traditional classroom settings are transitioning to online environments, teachers now face the challenge of using this medium to promote effective learning strategies, especially when teaching older age groups. Because adult learners bring a different set of understandings and skills to education than younger students, such as more job and life experiences, the one-size-fits-all approach to teaching does not work, thus pushing educators to create a student-centered approach for each learner. The *Handbook of Research on Student-Centered Strategies in Online Adult Learning Environments* is an important resource providing readers with multiple perspectives to approach issues often associated with adult learners in an online environment. This publication highlights current research on topics including, but not limited to, online competency-based education, nontraditional adult learners, virtual classrooms in public universities, and teacher training for online education. This book is a vital reference for online trainers, adult educators, university administrators, researchers, and other academic professionals looking for emerging information on utilizing online classrooms and environments in student-centered adult education.

Dialogue Interpreting Rebecca Tipton, Olgierda Furmanek, 2016-02-05 Routledge *Interpreting Guides* cover the key settings or domains of interpreting and equip trainee interpreters and students of interpreting with the skills needed in each area of the field. Concise, accessible and written by leading

authorities, they include examples from existing interpreting practice, activities, further reading suggestions and a glossary of key terms. Drawing on recent peer-reviewed research in interpreting studies and related disciplines, *Dialogue Interpreting* helps practising interpreters, students and instructors of interpreting to navigate their way through what is fast becoming the very expansive field of dialogue interpreting in more traditional domains, such as legal and medical, and in areas where new needs of language brokerage are only beginning to be identified, such as asylum, education, social care and faith. Innovative in its approach, this guide places emphasis on collaborative dimensions in the wider institutional and organizational setting in each of the domains covered, and on understanding services in the context of local communities. The authors propose solutions to real-life problems based on knowledge of domain-specific practices and protocols, as well as inviting discussion on existing standards of practice for interpreters. Key features include: contextualized examples and case studies reinforced by voices from the field, such as the views of managers of language services and the publications of professional associations. These allow readers to evaluate appropriate responses in relation to their particular geo-national contexts of practice and personal experience activities to support the structured development of research skills, interpreter performance and team-work. These can be used either in-class or as self-guided or collaborative learning and are supplemented by materials on the Translation Studies Portal a glossary of key terms and pointers to resources for further development. *Dialogue Interpreting* is an essential guide for practising interpreters and for all students of interpreting within advanced undergraduate and postgraduate/graduate programmes in Translation and Interpreting Studies, Modern Languages, Applied Linguistics and Intercultural Communication.
