Plant Diversity and Ecology in the Chihuahuan Desert

Maria C. Mandujano,Irene Pisanty,Luis E. Eguiarte,2020-07-18 Environmental and specific diversity in the Chihuahuan desert in general, and in the Cuatro Ciénegas Basin in particular, has long been recognized as outstanding. This book provides a global ecological overview, together with in-depth studies of specific processes. The Chihuahuan desert is the warmest in North America, and has a complex geologic, climatic and biogeographical history, which affects today's distribution of vegetation and plants and generates complex phylogeographic patterns. The high number of endemic species reflects this complex set of traits. The modern distribution of environments, including aquatic and subaquatic systems, riparian environments, gypsum dunes and gypsum-rich soils, low levels of phosphorous

and organic matter, and high salinity combined with an extreme climate call for a range of adaptations. Plants are distributed in a patchy pattern based on punctual variations, and many of them respond to different resources and conditions with considerable morphological plasticity. In terms of physiological, morphological and ecological variability, cacti were identified as the most important group in specific environments like bajadas, characterized by high diversity values, while gypsophytes and gypsovagues of different phylogenies, including species with restricted distribution and endemics.

The Hadley Circulation: Present, Past and Future Henry F. Diaz, Raymond S. Bradley, 2007-11-05 The book examines potentially important factors that may have affected the Hadley and Walker Circulations and evaluates changes in the Hadley Circulation and the monsoons as simulated by coupled models of past climate conditions, and predicted future conditions under an enhanced greenhouse effect. This book is meant to serve as a fundamental reference work for current and future researchers, graduate students in the atmospheric sciences and geosciences, and climate specialists involved in interdisciplinary research.

Of Love and Papers Laura E. Enriquez, 2020-04-28 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Of Love and Papers explores how immigration policies are fundamentally reshaping Latino families. Drawing on two waves of interviews with undocumented young adults, Enriquez investigates how immigration status creeps into the most personal aspects of everyday life, intersecting with gender to constrain family formation. The imprint of illegality remains, even upon obtaining DACA or permanent residency. Interweaving the perspectives of US citizen romantic partners and children, Enriquez illustrates the multigenerational punishment that limits the upward mobility of Latino families. Of Love and Papers sparks an intimate understanding of contemporary US immigration policies and their enduring consequences for immigrant families.

Martinez,Angel R. Martinez,Jeffrey Solka,2017-08-07 Praise for the Second Edition: The authors present an intuitive and easy-to-read book. ... accompanied by many examples, proposed exercises, good references, and comprehensive appendices that initiate the reader unfamiliar with MATLAB. —Adolfo Alvarez Pinto, International Statistical Review Practitioners of EDA who use MATLAB will want a copy of this book. ... The authors have done a great service by bringing together so many EDA routines, but their main accomplishment in this dynamic text is providing the understanding and tools to do EDA. —David A Huckaby, MAA Reviews Exploratory Data Analysis (EDA) is an important part of the data analysis process. The methods presented in this text are ones that should be in the toolkit of every data scientist. As computational sophistication has increased and data sets have grown in size and complexity, EDA has become an even more important process for visualizing and summarizing data before making assumptions to generate hypotheses and models. Exploratory Data Analysis with MATLAB, Third Edition presents EDA methods from a computational perspective and uses numerous examples and applications to show how the methods are used in practice. The authors use MATLAB code, pseudo-code, and algorithm descriptions to illustrate the concepts. The MATLAB code for examples, data sets, and the EDA Toolbox are available for download on the book's website. New to the Third Edition Random projections and estimating local intrinsic dimensionality Deep learning autoencoders and stochastic neighbor embedding Minimum spanning tree and additional cluster validity indices Kernel density estimation Plots for visualizing data distributions, such as beanplots and violin plots A chapter on visualizing categorical data

Water and Sustainability in Arid Regions Graciela Schneier-Madanes, Marie-Francoise Courel, 2009-12-01

International voices fill the pages of *Water and Sustainability in Arid Regions*, forming an original scientific exploration of current water research and management issues. In arid regions, agriculture that is ill-adapted to the environment, accelerated urbanization, poverty, and increasing pollution challenge access to and uses of water. Understanding these issues requires incorporating findings from both the physical and social sciences at different temporal and spatial scales. The chapters in this book were written by hydrologists, remote sensing specialists, ecologists, historians, economists, political scientists, architects, archaeologists, and other experts who live in and study arid lands. The authors present updates, overviews, and analyses of water challenges these areas have faced and are striving to address, from salinization in the fabled Taklimakan Desert in China to land degradation in the northern Mediterranean to groundwater over-exploitation in the southwestern United States. The book also examines desertification, remote sensing, qanat systems, architecture, arsenic contamination, and other case studies from Iran, the Maghreb region, Argentina and Chile, and Mexico. From this conceptual mosaic of comparative perspectives and research methods emerges a strong assumption: an interdisciplinary

approach that combines physical and social sciences is the first step toward globally and comprehensively addressing water and sustainability. This book is a valuable and welcome contribution to the discussion of water and sustainable development. Through the collection of chapters, the book clearly illustrates the contemporary diversity of approaches to water scarcity and presents pertinent and new research findings that readers generally do not find compiled together. The result is a highly relevant, accessible, and timely resource that is unique in its international and interdisciplinary content. This is a must-read for anyone working on environmental and sustainability issues in arid lands. André Mariotti, University Pierre et Marie Curie, and INSU - CNRS (National Institute for Earth Sciences and Astronomy - National Center for Scientific Research/Centre National de la Recherche Scientifique), France Anyone who reads this book will find himself or herself contemplating the need to rethink how we approach the issue of water and sustainability in arid lands. Drawing on the expertise of both physical and social scientists, the chapters taken as a whole present global, historic, and current perspectives on water scarcity in a multi-layered way that rarely has been done before. Miguel Solanes, Madrid Water Institute, Spain

Queer Migration and Asylum in Europe Richard C. M. Mole, 2021-03-08 Europe is a popular destination for LGBTQ people

seeking to escape discrimination and persecution. Yet, while European institutions have done much to promote the legal equality of sexual minorities and a number of states pride themselves on their acceptance of sexual diversity, the image of European tolerance and the reality faced by LGBTQ migrants and asylum seekers are often quite different. To engage with these conflicting discourses, *Queer Migration and Asylum in Europe* brings together scholars from politics, sociology, urban studies, anthropology and law to analyse how and why queer individuals migrate to or seek asylum in Europe, as well as the legal, social and political frameworks they are forced to navigate to feel at home or to regularise their status in the destination societies. The subjects covered include LGBTQ Latino migrants' relationship with queer and diasporic spaces in London; diasporic consciousness of queer Polish, Russian and Brazilian migrants in Berlin; the role of the Council of Europe in shaping legal and policy frameworks relating to queer migration and asylum; the challenges facing bisexual asylum seekers; queer asylum and homonationalism in the Netherlands; and the role of space, faith and LGBTQ organisations in Germany, Italy, the UK and France in supporting queer asylum seekers.

The Forbidden Zone Mary Borden, 2023-09-01 Mary Borden worked for four years in an evacuation hospital unit following the front lines up and down the European theater of the First World War. This beautifully written book, to be read alongside the likes of Sassoon, Graves, and Remarque, is a collection of her memories and impressions of that experience. Describing the men as they march into battle, engaging imaginatively with the stories of individual soldiers, and recounting procedures at the field hospital, the author offers a perspective on the war that is both powerful and intimate.
