*Withdrawal from Iraq* Anthony H. Cordesman, Adam Mausner, 2009 Iraq and the US face a critical transition during the period through 2011 and beyond. There is still a war to finish, but this is only part of the challenge both countries face. No one can be certain whether Iraq can achieve a stable level of political accommodation to deal with its internal problems. Iran seeks to expand its influence, and Turkey will not tolerate a sanctuary for hostile Kurdish movements like the PKK. Arab support for Iraq remains weak, and Iraq's Arab neighbors fear both Shi'ite dominance and what that could mean in terms of Iran's role in Syria and Lebanon as well as Iraq. Even if it moves forward towards stability and political accommodation and largely ends the insurgency, it will be extremely difficult for Iraq to develop all of the security capabilities it needs for even the counterinsurgency mission before the full US withdrawal scheduled to take place by the end of 2011. This could force the US to hand over responsibility to the Iraqi Security Forces before these forces are fully able to do the job. It could also force the US to withdraw prematurely the US trainers and partner units that the IRS needs to secure the country and defend it from any threat from its neighbors. ... Dealing with these issues will be a critical priority for the US for at least half a decade to come.

**Net Zero Energy Buildings** Linda Reeder, 2016-03-31 This book presents 18 in-depth case studies of net zero energy buildings—low-energy building that generate as much energy as they consume over the course of a year—for a range of project types, sizes, and U.S. climate zones. Each case study describes the owner's goals, the design and construction process, design strategies, measurement and verification activities and results, and project costs. With a year or more of post-occupancy performance data and other project information, as well as lessons learned by project owners and developers, architects, engineers, energy modelers, constructors, and operators, each case study answers the questions: What were the challenges to achieving net zero energy performance, and how were these challenges overcome? How would stakeholders address these issues on future projects? Are the occupants satisfied with the building? Do they find it comfortable? Is it easy to operate? How can other projects benefit from the lessons learned on each project? What would the owners, designers, and constructors do differently knowing what they know now? A final chapter aggregates processes to engage in and pitfalls to avoid when approaching the challenges peculiar to designing, constructing, and owning a net zero energy building. By providing a wealth of comparable information, this book which will flatten the learning curve for designing, constructing, and owning this emerging building type and improve the effectiveness of architectural design and construction.

*Multinational Management* Rien Segers, 2016-01-29 This casebook demonstrates that the future of global business lies in how well the multinational landscape is charted and how the importance of Asian market leaders is deeply embedded in it. It offers international management students and researchers an extensive guide to the business history, strategy development, and foreign market entry modes used by emerging Asian multinationals. The cases focus on well-known companies such as Lenovo, Alibaba, Infosys, Huawei, Panasonic, and Rakuten. These companies, all of which generate huge revenues in their own countries (e.g. in China, India, South Korea, Taiwan, Vietnam),

are now becoming increasingly sophisticated and striving to become global brands, while also enjoying the active support of their governments in terms of their international business. Readers will learn about the current multinational landscape in Asia, the management challenges, and the future implications for traditional western companies seeking to retain their market share. Chapters on corporate entrepreneurship, human resource management and intercultural competence, and current branding trends in Asia will provide a cutting-edge update on international business strategy for students and practitioners alike.

World Economic Outlook, October 2013 International Monetary Fund. Research Dept., 2013-10-08 Global growth is in low gear, and the drivers of activity are changing. These dynamics raise new policy challenges. Advanced economies are growing again but must continue financial sector repair, pursue fiscal consolidation, and spur job growth. Emerging market economies face the dual challenges of slowing growth and tighter global financial conditions. This

issue of the World Economic Outlook examines the potential spillovers from these transitions and the appropriate policy responses. Chapter 3 explores how output comovements are influenced by policy and financial shocks, growth surprises, and other linkages. Chapter 4 assesses why certain emerging market economies were able to avoid the classical boom-and-bust cycle in the face of volatile capital flows during the global financial crisis.

**Hearing Impairment and Disability** Ariel Tenenbaum,Joav Merrick,Mohd N. Zakaria,2020 Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers--
