The Under Dog Francis Hopkinson Smith, 1903 1912. Illustrated. Smith had several careers: engineer, artist, illustrator and short story writer. His success in engineering included planning the foundations for the Statue of Liberty. He traveled frequently to Europe and became known for his portraits and illustration. Smith was an entertaining after-dinner storyteller and in his fifties he decided to commit his stories to paper and is remembered for his Colonel Carter novels. In the volume of stories, Smith explains to the readers that: In the strife of life some men lose place through physical weakness or lost opportunities or impaired abilities; struggle on as they may, they must always be the Under Dog in the fight...These Under Dogs-grave and gay-have always appealed to me. Their stories are printed here in the hope that they may also appeal to you. See other titles by this author available from Kessinger Publishing.

Good beekeeping practices for sustainable apiculture Food and Agriculture Organization of the United Nations, Apimondia, Chinese Academy of Agricultural Sciences, Istituto Zooprofilattico Sperimentale Lazio e Toscana, 2021-09-21 Bees provide a critical link in the maintenance of ecosystems, pollination. They play a major role in maintaining biodiversity, ensuring the survival of many plants, enhancing forest regeneration, providing sustainability and adaptation to climate change and improving the quality and quantity of agricultural production systems. In fact, close to 75 percent of the world's crops that produce fruits and seeds for human consumption depend, at least in part, on pollinators for sustained production, yield and quality. Beekeeping, also called apiculture, refers to all activities concerned with the practical management of social bee species. These guidelines aim to provide useful information and suggestions for a sustainable management of bees around the world, which can then be applied to project development and implementation.
