**Making Work Human: How Human-Centered Companies are Changing the Future of Work and the World** Eric Mosley, Derek Irvine, 2020-10-06 How do you keep your employees engaged, creative, innovative, and productive? Simple: Work human! From the pioneers of the management strategy that's transforming businesses worldwide, Making Work Human shows how to implement a culture of performance and gratitude in the workplace—and seize a competitive edge, increase profitability, and drive business momentum. Leaders of Workhuman, the world's fastest-growing social recognition and continuous performance management platform, Eric Mosley and Derek Irvine use game-changing data analytics to prove that when a workplace becomes more "human"—when it's fueled by a culture of gratitude—measurable business results follow. In Making Work Human, they show you how to: Apply analytics and artificial intelligence in ways that make work more human, not less Expand equity, diversity, and inclusion initiatives and strategies to include a wider range of backgrounds, life experiences, and capabilities Use recognition as an actionable strategy to create a truly inclusive, connected culture "The qualities that make us most human—connection, community, positivity, belonging, and a sense of meaning—have become the corporate fuel for getting things done—for innovating, for thriving in the global marketplace, and for outperforming the competition," the authors write. By building a sense of belonging, purpose, meaning, happiness, and energy in every employee, you'll create a profound connection between your organization and its goals. And Making Work Human provides everything you need to get there.

*The Flat-Footed Flies* Peter J. Chandler, 2001-01-01 The Flat-footed Flies (Diptera: Opetiidae and Platypezidae) of Europe presents a detailed account of the taxonomy, biology and distribution of the 44 European species of Opetiidae and Platypezidae. Two of these are here described as new to science. Known larvae develop in the larger fungi; adults are honey-dew feeders on broad leaves. Both families are characterised and proposals on their relationships and phylogeny are discussed. All European species are keyed and described in detail. Adult and larval biology are reviewed. The provincial distribution of 35 species occurring in Fennoscandia and Denmark is listed in a detailed catalogue. The work presents identification keys to genera and species and for each species descriptions and accounts of its nomenclature, biology and distribution. Known early stages are keyed to genera and described under each species. Altogether 427 line drawings and 6 beautiful colour illustrations accompany the text.
