Forty Studies that Changed Psychology Roger R. Hock, 2005 This unique book closes the gap between psychology books and the research that made them possible. Its journey through the "headline history" of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider's look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior. For individuals with an interest in an introduction to psychology.

Implementing the IBM Storwize V3500 Jon Tate, Uwe Dubberke, Justin Heather, Andrew Hickey, Imran Imtiaz, Nancy Kinney, Dieter Utesch, IBM Redbooks, 2013-10-21 Businesses of all sizes are faced with the challenge of managing huge volumes of data that are becoming increasingly valuable. But storing this data can be costly, and extracting value from the data is becoming more and more difficult. IT organizations have limited resources and cannot afford to make investment mistakes. The IBM® Storwize® V3500 system provides a smarter solution that is affordable, simple, and efficient, which enables businesses to overcome their storage challenges. IBM Storwize V3500 is the most recent addition to the IBM Storwize family of disk systems. It delivers easy-to-use, entry-level configurations that are specifically designed to meet the modest budgets of small and medium-sized businesses. IBM Storwize V3500 features the following highlights: - Consolidate and share data with low cost iSCSI storage networking. - Deploy storage in minutes and perform storage management tasks quickly and easily through a breakthrough graphical user interface. - Experience peace of mind with proven IBM Storwize family high-availability data protection with snapshot technology and IBM warranty support. - Optimize efficiency by allocating only the amount of disk space needed at the time it is required with high performance, thin-provisioning capabilities.

Ethics in Fiscal Administration Angela Pool-Funai, 2018-05-11 Ethics in Fiscal Administration: An Introduction integrates ethics into the public administration curriculum by weaving ethical dilemmas into the financial management and budgeting process of the public and nonprofit sectors. Inquiry-based discussion prompts challenge students to examine scenarios that they are likely to encounter in professional public service careers. Critics of the public sector often use the analogy that government should be run more like a business. Issues such as profitability versus social value preclude the public sector from becoming a mirror image of the private sector; however, ethical decision making in fiscal administration is an important concern across sectors. Using examples drawn from the public and nonprofit arenas, Ethics in Fiscal Administration: An Introduction will help prepare future budget managers and other public administrators for the important work of upholding the public financial trust.

Combinatorial Methods for Chemical and Biological Sensors Radislav A. Potyrailo, Vladimir M. Mirsky, 2009-03-21 Chemical sensors are in high demand for applications as varied as water pollution detection, medical diagnostics, and battlefield air analysis. Designing the next generation of sensors requires an interdisciplinary approach. The book provides a critical analysis of new opportunities in sensor materials research that have been opened up with the use of combinatorial and high-throughput technologies, with emphasis on experimental techniques. For a view of component selection with a more computational perspective, readers may refer to the complementary volume of Integrated Analytical Systems edited by M. Ryan et al., entitled "Computational Methods for Sensor Material Selection".

Guide to Wireless Sensor Networks Sudip Misra, Isaac Woungang, Subhas Chandra Misra, 2009-05-29 Overview and Goals Wireless communication technologies are undergoing rapid advancements. The last few years have experienced a steep growth in research in the area of wireless sensor networks (WSNs). In WSNs, communication takes place with the help of spatially

distributed autonomous sensor nodes equipped to sense specific information. WSNs, especially the ones that have gained much popularity in the recent years, are, typically, ad hoc in nature and they inherit many characteristics/features of wireless ad hoc networks such as the ability for infrastructure-less setup, minimal or no reliance on network planning, and the ability of the nodes to self-organize and self-configure without the involvement of a centralized network manager, router, access point, or a switch. These features help to set up WSNs fast in situations where there is no existing network setup or in times when setting up a fixed infrastructure network is considered infeasible, for example, in times of emergency or during relief operations. WSNs find a variety of applications in both the military and the civilian population worldwide such as in cases of enemy intrusion in the battlefield, object tracking, habitat monitoring, patient monitoring, fire detection, and so on. Even though sensor networks have emerged to be attractive and they hold great promises for our future, there are several challenges that need to be addressed. Some of the well-known challenges are attributed to issues relating to coverage and deployment, scalability, quality-of-service, size, computational power, energy efficiency, and security.

Mining for Change John Page, Finn Tarp, 2020 For a growing number of countries in Africa the discovery and exploitation of natural resources is a great opportunity, but one accompanied by considerable risks. This book presents research on how to better manage the revenues and opportunities associated with natural resources.

Rampage Nation Louis Klarevas, 2016-08-23 In the past decade, no individual act of violence has killed more people in the United States than the mass shooting. This well-researched, forcefully argued book answers some of the most pressing questions facing our society: Why do people go on killing sprees? Are gun-free zones magnets for deadly rampages? What can we do to curb the carnage of this disturbing form of firearm violence? Contrary to conventional wisdom, the author shows that gun possession often prods aggrieved, mentally unstable individuals to go on shooting sprees; these attacks largely occur in places where guns are not prohibited by law; and sensible gun-control measures like the federal Assault Weapons Ban—which helped drastically reduce rampage violence when it was in effect—are instrumental to keeping Americans safe from mass shootings in the future. To stem gun massacres, the author proposes several original policy prescriptions, ranging from the enactment of sensible firearm safety reforms to an overhaul of how the justice system investigates potential active-shooter threats and prosecutes violent crimes. Calling attention to the growing problem of mass shootings, Rampage Nation demonstrates that this unique form of gun violence is more than just a criminal justice offense or public health scourge. It is a threat to American security.

The Hacker's Dictionary Eric S. Raymond, 2017-06-19 This document is a collection of slang terms used by various subcultures of computer hackers. Though some technical material is included for background and flavor, it is not a technical dictionary; what we describe here is the language hackers use among themselves for fun, social communication, and technical debate.

Optimization Modelling Ruhul Amin Sarker, Charles S. Newton, 2007-10-15 Although a useful and important tool, the potential of mathematical modelling for decision making is often neglected. Considered an art by many and weird science by some, modelling is not as widely appreciated in problem solving and decision making as perhaps it should be. And although many operations research, management science, and optimization

International Marketing and Export Management Gerald S. Albaum, Edwin Duerr, Jesper Strandskov, 2005 Albaum, Duerr and Strandskov offer a unique focus on export management. The comprehensive coverage provides a wealth of examples and cases with a good spread of academic and non-academic sources. The balance between theory and practice is just right. I highly recommend this text. Geraldine Cohen, Lecturer, School of Business and Marketing, Brunel University Looking to learn about marketing decisions and management processes needed to develop export operations either in a small to medium size business or in a global corporation? With changing opportunities and challenges in the global environment, International Marketing and Export Management 5th edition

provides the most comprehensive and up-to-date coverage on the topic. In my opinion Albaum, Duerr and Strandskov have written an excellent text book on the subject of International Marketing and students will find it both readable and extremely informative. David Demick, Senior Lecturer, School of Marketing, Entrepreneurship and Strategy, University of Ulster Geared to both undergraduate and postgraduate courses on International Marketing or Export Marketing/International Trade, this book can also be used as a supplementary text on International Business courses and as a useful source of reference to even the most experienced of practitioners. New to this edition! In response to recent global developments, the authors have increased emphasis on the following: the impact of the Internet, World Wide Web, and e-commerce the increasing use of specialized software to assist in managing marketing functions, increasing efficiency in logistics, and coordinating and controlling enterprises the impact of technological advances on international marketing the changes resulting from China's rapid, export-led growth and from its entry into the World Trade Organization the growing concerns with respect to social responsibility, and the costs of failure to meet societal expectations. Visit www.booksites.net/albaum to access valuable teaching tools, including an Instructor's Manual and Power Point Slides. Gerald Albaum is Research Professor at the Robert O. Anderson Schools of Management, University of New Mexico and Professor Emeritus of Marketing at the University of Oregon, USA. He is also Senior Research Fellow at the IC2 Institute, University of Texas, Austin, USA. He has been a visiting professor and scholar at universities in Canada, Denmark, New Zealand, Australia, Turkey, France, Finland and Hong Kong. Edwin Duerr is a Professor Emeritus of International Business at San Francisco State University, USA. He has been a visiting professor at universities in Japan, Brazil, Germany, Denmark, Sweden and the Netherlands and has extensive consulting business around the globe. Duerr is also Senior Editor of The Journal of International Business and Economy. Jesper Strandskov is a Professor of International Business at Aarhus School of Business, Denmark. He has been visiting professor at universities in the USA and Australia. He also acts as an international business consultant to several business companies and public institutions.

Skywriting Jane Pauley, 2004-08-24 "Truth arrives in microscopic increments, and when enough has accumulated—in a moment of recognition, you just know. You know because the truth fits. I was the only member of my family to lack the gene for numbers, but I do need things to add up. Approaching midlife, I became aware of a darkening feeling—was it something heavy on my heart, or was something missing? Grateful as I am for the opportunities I've had, and especially for the people who came into my life as a result, I couldn't ignore this feeling. I had the impulse to begin a conversation with myself, through writing, as if to see if my fingers could get to the bottom of it. It was a Saturday morning eight or ten years ago when I began following this impulse to find the answers to unformed questions. Skywriting is what I call my personal process of discovery." And so begins this beautiful and surprising memoir, in which beloved broadcast journalist Jane Pauley tells a remarkable story of self-discovery and an extraordinary life, from her childhood in the American heartland to her three decades in television. Encompassing her beginnings at the local Indianapolis station and her bright debut—at age twenty-five on NBC's *Today* and later on *Dateline*—Pauley forthrightly delves into the ups and downs of a fantastic career. But there is much more to Jane Pauley than just the famous face on TVs. In this memoir, she reveals herself to be a brilliant woman with singular insights. She explores her roots growing up in Indiana and discusses the resiliency of the American family, and addresses with humor and depth a subject very close to her heart: discovering yourself and redefining your strengths at midlife. Striking, moving, candid, and unique, *Skywriting* explores firsthand the difficulty and the rewards of self-reinvention.
