Subsystem and Transaction Monitoring and Tuning with DB2 11 for z/OS Paolo Bruni,Felipe Bortoletto,Adrian Burke,Cathy Drummond,Yasuhiro Ohmori,IBM Redbooks,2022-08-31 This IBM® Redbooks® publication discusses in detail the facilities of DB2® for z/OS®, which allow complete monitoring of a DB2 environment. It focuses on the use of the DB2 instrumentation facility component (IFC) to provide monitoring of DB2 data and events and includes suggestions for related tuning. We discuss the collection of statistics for the verification of performance of the various components of the DB2 system and accounting for tracking the behavior of the applications. We have intentionally omitted considerations for query optimization; they are worth a separate document. Use this book to activate the right traces to help you monitor the performance of your DB2 system and to tune the various aspects of subsystem and application performance.

Land Use and Society, Revised Edition Rutherford H. Platt,2004-06-18 Land Use and Society is a unique and compelling exploration of interactions among law, geography, history, and culture and their joint influence on the evolution of land use and urban form in the United States. Originally published in 1996, this completely revised, expanded, and updated edition retains the strengths of the earlier version while introducing a host of new topics and insights on the twenty-first century metropolis. This new edition of Land Use and Society devotes greater attention to urban land use and related social issues with two new chapters tracing American city and metropolitan change over the twentieth century. More emphasis is given to social justice and the environmental movement and their respective roles in shaping land use and policy in recent decades. This edition of Land Use and Society by Rutherford H. Platt is updated to reflect the 2000 Census, the most recent Supreme Court decisions, and various topics of current interest such as affordable housing, protecting urban water supplies, urban biodiversity, and ecological cities. It also includes an updated conclusion that summarizes some positive and negative outcomes of urban land policies to date.

Decision Support Systems for Weed Management Guillermo R. Chantre,José L. González-Andújar,2020-07-31 Weed management Decision Support Systems (DSS) are increasingly important computer-based tools for modern agriculture. Nowadays, extensive agriculture has become highly dependent on external inputs and both economic costs, as well the negative environmental impact of agricultural activities, demands knowledge-based technology for the optimization and protection of non-renewable resources. In this context, weed management strategies should aim to maximize economic profit by preserving and enhancing agricultural systems. Although previous contributions focusing on weed biology and weed management provide valuable insight on many aspects of weed species ecology and practical guides for weed control, no attempts have been made to highlight the forthcoming importance of DSS in weed management. This book is a first attempt to integrate 'concepts and practice' providing a novel guide to the state-of-art of DSS and the future prospects which hopefully would be of interest to higher-level students, academics and professionals in related areas.

Industrial Clusters in Asia A. Kuchiki,M. Tsuji,2005-10-19 This book focuses on East Asia, which has been attracting FDI and a centre of industrial agglomeration, and because of this, the production structure in the world has been dynamically transforming. This book analyzes this world trend and provides a framework for strategy that is required not only for Japanese local governments to implement industrial cluster policy, but also for firms to survive the global competition.

Neo-Segregation at Yale Dion J. Pierre,Peter W. Wood,2019-04-29 The Supreme Court's 1954 decision in Brown v. Board of Education and the reinvigorated Civil Rights Movement spurred American colleges and universities by the early 1960s to a good-faith effort to achieve racial integration. To overcome the shortage of black students who were prepared for elite academic programs, universities such as Yale began to admit substantial numbers of under-qualified black students. Disaster ensued. More than a third of these students dropped out in the first year and those who remained were often embittered by the experience. They turned to each other for support and found inspiration in black nationalism. What emerged by the late sixties were radical and sometimes militant black groups on campus, rejecting the ideal of racial integration and voicing a new separatist ethic. On campus after campus, black separatists won concessions from administrators who were afraid of further alienating blacks. The pattern of college administrators rolling over to black separatist demands came to dominate much of American higher education. The old integrationist ideal has been sacrificed almost entirely. Instead of offering opportunities for students to mix freely with students of dissimilar backgrounds, colleges promote ethnic enclaves, stoke racial resentment, and build organizational structures on the basis of group grievance.Neo-segregation is the voluntary racial segregation of students, aided by college institutions, into racially exclusive housing and common spaces, orientation and commencement ceremonies, student associations, scholarships, and classes. This case study of Yale University is part of a larger project from the National Association of Scholars, Separate but Equal, Again: Neo-Segregation in American Higher Education. The Yale case study explains: 1) Yale's attempt to deal with the academic deficiencies of black students alternately by segregating them into remedial programs or mainstreaming them into programs they couldn't handle. 2) The readiness of black students to adopt race nationalist ideas and theatrics in preference to the ideals of racial integration. 3) Yale's willingness to buy temporary racial peace on campus by conceding to segregationist demands, even when this meant sacrificing academic standards and principles of equal application of rules regardless of race.

Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. Ukraine's WTO Accession Ihor Burakovsky,Lars Handrich,Lutz Hoffmann,2012-12-06 Lars Handrich German Advisory Group on Economic Reforms with the Ukrainian Government 1 Ukraine on the way to WTO membership The first announcements by Ukraine to join the World Trade Organisation (WTO) were made in 1993. In the following year the Working group on Ukraine's accession was established. But successive Ukrainian governments had to sideline the issue of WTO accession, as the country went through a decade of unprecedented and severe economic decline. Only in the year 2000 the Ukrainian economy started to achieve positive real economic growth. Since then Ukraine embarked on a stable path of economic

growth and continues to grow even under conditions of a sluggish world economy and protectionist reflexes in some of Ukraine's export markets. According to the macroeconomic forecast of the Institute for Economic Research and Policy Consulting Ukrainian GDP will grow by 5,4% in 2003 in real terms and by 5,1% in 2004. For Ukraine WTO accession is of special importance. Ukraine records an extremely high exports-to-GDP ratio of over 60% - almost twice the ratio for Germany.' The large ratio and the little diversified structure of Ukraine's imports and exports make Ukraine seriously vulnerable to external shocks resulting from changes in trade regimes. Joining the WTO, trade among WTO members amounting to more than 90% of world trade, could reduce the risks related to external trade and Ukraine could derive substantial economic and hence welfare benefits from the membership in WTO.

At the Crossroads Florence Ebam Etta, Laurent Elder, 2005 Raises questions about information and communication technologies (ICT) and their implementation in four East African countries, with particular focus on Kenya. Covers the respective roles of the public and private sectors, the applications of ICT in government, education, and in various economic sectors. Concludes with recommendations for responsible policy making.

Wealth Creation in the World's Largest Mergers and Acquisitions B. Rajesh Kumar, 2018-11-29 This book highlights research-based case studies in order to analyze the wealth created in the world's largest mergers and acquisitions (M&A). This book encourages cross fertilization in theory building and applied research by examining the links between M&A and wealth creation. Each chapter covers a specific case and offers a focused clinical examination of the entire lifecycle of M&A for each mega deal, exploring all aspects of the process. The success of M&A are analyzed through two main research approaches: event studies and financial performance analyses. The event studies examine the abnormal returns to the shareholders in the period surrounding the merger announcement. The financial performance studies examine the reported financial results of acquirers before and after the acquisition to see whether financial performance has improved after merger. The relation between method of payment, premium paid and stock returns are examined. The chapters also discuss synergies of the deal-cost and revenue synergies. Mergers and acquisitions represent a major force in modern financial and economic environment. Whether in times of boom or bust, M&As have emerged as a compelling strategy for growth. The biggest companies of modern day have all taken form through a series of restructuring activities like multiple mergers. Acquisitions continue to remain as the quickest route companies take to operate in new markets and to add new capabilities and resources. The cases covered in this book highlights high profile M&As and focuses on the wealth creation for shareholders of acquirer and target firms as a financial assessment of the merger's success. The book should be useful for finance professionals, corporate planners, strategists, and managers.

Infrastructure and Technology Management Tugrul U. Daim, Leong Chan, Judith Estep, 2018-01-10 This book presents emerging technology management approaches and applied cases from leading infrastructure sectors such as energy, healthcare, transportation and education. Featuring timely topics such as fracking technology, electric cars, Google's eco-friendly mobile technology and Amazon Prime Air, the volume's contributions explore the current management challenges that have resulted from the development of new technologies, and present tools, applications and frameworks that can be utilized to overcome these challenges. Emerging technologies make us rethink how our infrastructure will look in the future. Solar and wind generation, for example, have already changed the dynamics of the power sector. While they have helped to reduce the use of fossil fuels, they have created management complications due to their intermittent natures. Meanwhile, information technologies have changed how we manage healthcare, making it safer and more accessible, but not without implications for cost and administration. Autonomous cars are around the corner. On-line education is no longer a myth but still a largely unfulfilled opportunity. Digitization of car ownership is achievable thanks to emerging business models leveraging new communication technologies. The major challenge is how to evaluate the relative costs and benefits of these technologies. This book offers insights from both researchers and industry practitioners to address this challenge and anticipate the impact of new technologies on infrastructure now and in the future.

Planning Support Systems in Practice Stan Geertman, John Stillwell, 2012-11-02 The first worldwide overview of Planning Support Systems (PSS) and their application in practice. PSS are geo-technology related instruments consisting of theories, information, methods, tools, et cetera for support of unique professional public or private planning tasks at any spatial scale. The aim is to advance progress in the development of PSS, which are far from being effectively integrated into the planning practice. The text provides an Internet-based worldwide inventory of innovative examples and successful applications of PSS in a number of different planning contexts. In-depth insights into the purposes, content, workings, and applications of a very wide diversity of PSS are given.

UN Millennium Development Library: Investing in Development Jeffrey D. Sachs, The UN Millennium Project, 2019-06-03 The Millennium Development Goals, adopted at the UN Millennium Summit in 2000, are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015 income poverty, hunger, disease, exclusion, lack of infrastructure and shelter while promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. Achieving the Millennium Development Goals offers the prospect of a more secure, just, and prosperous world for all. The UN Millennium Project was commissioned by United Nations Secretary-General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals. As an independent advisory body directed by Professor Jeffrey D. Sachs, the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005. The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world, including scientists, development practitioners, parliamentarians, policymakers, and representatives from civil society, UN agencies, the World Bank, the IMF, and the private sector. Investing in Development: A Practical Plan to Achieve the Millennium Development Goals brings together the core recommendations of the UN Millennium Project. By outlining practical strategies and approaches to financing the,, the report presents an operational framework that will allow even the poorest countries to achieve the Millennium Development Goals by 2015.
