The surveys cover 30 countries and 33 capital or main cities. Where appropriate, the results are compared with those of the four earlier ICVS surveys, conducted in 1989, 1992, 1996 and 2000. The report presents data from the following 30

countries: Australia, Austria, Belgium, Bulgaria, Canada, Denmark, England & Wales, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Luxembourg, Mexico, the Netherlands, New Zealand, Northern Ireland, Norway, Poland, Portugal, Scotland, Spain, Sweden, Switzerland and the USA. The Opposite of Hate Sally Kohn,2018-04-10 "A stunning debut by a truly gifted writer—an eye-opening read for both liberals and conservatives—and it could not come at a better time."—Adam Grant, New York Times bestselling author of Option B, with Sheryl Sandberg What is the opposite of hate? As a progressive commentator on Fox News and now CNN, Sally Kohn has made a career out of bridging intractable political differences and learning how to talk respectfully with people whose views she disagrees with passionately. Her viral TED Talk on the need to practice emotional—rather than political—correctness sparked a new way of considering how often we amplify our differences and diminish our connections. But these days even famously "nice" Kohn finds herself wanting to breathe fire at her enemies. It was time, she decided, to look into the epidemic of hate all around us and learn how we can stop it. In The Opposite of Hate, Kohn talks to leading scientists and researchers and investigates the evolutionary and cultural roots of hate and how incivility can be a gateway to much worse. She travels to Rwanda, the Middle East, and across the United States, introducing us to former terrorists and white supremacists, and even some of her own Twitter trolls, drawing surprising lessons from dramatic and inspiring stories of those who left hate behind. As Kohn confronts her own shameful moments, whether it was back when she bullied a classmate or today when she harbors deep partisan

resentment, she discovers, "The opposite of hate is the beautiful and powerful reality of how we are all fundamentally linked and equal as human beings. The opposite of hate is connection." Sally Kohn's engaging, fascinating, and often funny book will open your eyes and your heart.

Smallholder Tree Growing for Rural Development and Environmental Services Denyse J. Snelder,Rodel D. Lasco,2008-07-19 Recent history reveals that both the large-scale reforestation projects of the 20th century have often been less successful than anticipated, and that tree growing by smallholders – as an alternative means to combat deforestation and promote sustainable land use – has received relatively little attention from the scientific and development communities. Taking a first step to addressing that balance, this

collection of peer-reviewed papers adopts a comparative approach to explore the potential role that tree growing by farmers can play in sustainable forest management. The goal of this approach is to identify common threads and to start to develop a framework for future research and practice. Presenting case studies from the Philippines and comparative data from a number of Asian countries the book reveals that farmer tree growing has the potential to play a significant role in sustainable forest management, and discusses the surrounding issues which must be addressed in order to realise this potential. The book is primarily aimed at research scientists and graduate students interested in relevant aspects of forestry, agroforestry, agricultural diversity, natural resource management and conservation in agricultural landscapes, as well as those involved in sustainable development and international development studies. It will also provide a valuable reference for professionals, managers, consultants, policy makers and planners dealing with issues in sustainable development, natural resource management, land use change issues and participatory approaches to resource management.

Climate Change-Resilient Agriculture and Agroforestry Paula Castro,Anabela Marisa Azul,Walter Leal Filho,Ulisses M. Azeiteiro,2019-01-24 This book collects wide-ranging contributions such as case studies, reviews, reports on technological developments, outputs of research/studies, and examples of successful projects, presenting current knowledge and raising awareness to

help the agriculture and forestry sectors find solutions for mitigating climate variability and adapting to change. It brings the topic of ecosystem services closer to education and learning, as targeted by the Framework Convention on Climate Change and the Paris Agreement, the 2030 Agenda for Sustainable Development and the EU Biodiversity Strategy to 2020. Climate change and its impacts on agriculture and agroforestry have been observed across the world during the last 50 years. Increasing temperatures, droughts, biotic stresses and the impacts of extreme events have continuously decreased agroforestry systems' resilience to the effects of climate change. As such, there is a need to adapt farming and agroforestry systems so as to make them better able to handle ever-changing climate conditions, and to preserve habitats and ecosystems services.
